TABLE R103. **Incidence rates[1] for nonfatal occupational injuries and illnesses involving days away from work[2] per 10,000 full-time workers by nature of injury or illness and summary occupational groups, private industry, 2012[3]** — Continued

Nature	Summary occupational groups[6]					
	Office and administrative support occupations	Farming, fishing, and forestry occupations	Construction and extraction occupations	Installation, maintenance, and repair occupations	Production occupations	Transportation and material moving occupations
Multiple diseases, conditions, and disorders	([7])	–	0.1	0.1	([7])	0.2
Nonclassifiable	([7])	1.1	.5	.3	.3	1.2

[1] The incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000, where
N = number of injuries and illnesses
EH = total hours worked by all employees during the calendar year
20,000,000 = base for 10,000 equivalent full-time workers
(working 40 hours per week, 50 weeks per year)

[2] Days-away-from-work cases include those that resulted in days away from work, some of which also included job transfer or restriction.

[3] Incorrect national-level estimates of nonfatal occupational injuries and illnesses were published for the Survey of Occupational Injuries and Illnesses (SOII) for reference year 2012. This table includes corrected estimates. For additional information see: http://www.bls.gov/bls/errata/iif_errata_1014.htm.

[4] Based on the Occupational Injury and Illness Classification System 2.01 developed by the Bureau of Labor Statistics.

[5] Excludes farms with fewer than 11 employees.

[6] *Standard Occupational Classification Manual,* 2010, Office of Management and Budget.

[7] Data too small to be displayed.

Note: Dash indicates data do not meet publication guidelines. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.
