[1] Indexes in this table are derived from the primary product indexes in table 5 that are weighted using 2002 input/output relationships. These indexes only include inputs to construction which are produced by the mining and manufacturing sectors of the economy excluding capital equipment. Since they do not include labor or capital costs, these indexes should not be regarded as comprehensive measures of construction costs. See note on page 190 of the July 1986 issue of *Producer Price Indexes*.

[2] The indexes for September 2006 have been recalculated to incorporate late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
