METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT – NOVEMBER 2010

Unemployment rates were higher in November than a year earlier in 182 of the 372 metropolitan areas, lower in 166 areas, and unchanged in 24 areas, the U.S. Bureau of Labor Statistics reported today. Thirteen areas recorded jobless rates of at least 15.0 percent, while 11 areas registered rates of less than 5.0 percent. One hundred eighty metropolitan areas reported over-the-year increases in nonfarm payroll employment, 176 reported decreases, and 16 had no change. The national unemployment rate in November was 9.3 percent, not seasonally adjusted, compared with 9.4 percent a year earlier.

Metropolitan Area Unemployment (Not Seasonally Adjusted)

In November 114 metropolitan areas reported jobless rates of at least 10.0 percent, down from 127 areas a year earlier, while 63 areas posted rates below 7.0 percent, down from 74 areas in November 2009. El Centro, Calif., again recorded the highest unemployment rate, 29.1 percent, followed by Yuma, Ariz., 24.8 percent. Among the 13 areas with jobless rates of at least 15.0 percent, 11 were located in California. Bismarck, N.D., again registered the lowest unemployment rate, 3.3 percent in November. The areas with the next lowest rates were Fargo, N.D.-Minn., and Lincoln, Neb., 3.5 percent each, and Grand Forks, N.D.-Minn., 3.7 percent. Of the 11 areas with jobless rates under 5.0 percent, 9 were located in the West North Central census division. Two hundred thirty areas recorded unemployment rates below the U.S. figure of 9.3 percent, 137 areas reported rates above it, and 5 areas had rates equal to that of the nation. (See table 1 and the map.)

Yuma, Ariz., registered the largest over-the-year unemployment rate increase in November (+4.3 percentage points). The only other area with a rate increase of 2.0 percentage points or more was Pueblo, Colo. (+2.4 points). Monroe, Mich., recorded the largest over-the-year jobless rate decrease (-3.5 percentage points), followed by Muskegon-Norton Shores, Mich. (-3.2 points), and Detroit-Warren-Livonia, Mich. (-3.0 points). Nine additional areas reported rate decreases of at least 2.0 percentage points, seven of which were also located in Michigan.

Of the 49 metropolitan areas with a Census 2000 population of 1 million or more, Las Vegas-Paradise, Nev., and Riverside-San Bernardino-Ontario, Calif., registered the highest unemployment rates in November, 14.3 percent each. Fourteen additional large areas posted rates of 10.0 percent or more. The lowest jobless rate among the large areas was recorded in Washington-Arlington-Alexandria, D.C.-Va.-

Md.-W.Va., 6.0 percent. Twenty-seven of the large areas reported over-the-year unemployment rate increases, while 18 areas recorded rate decreases and 4 had no rate change. Las Vegas-Paradise, Nev., and Denver-Aurora-Broomfield, Colo., posted the largest jobless rate increases over the year (+1.8 and +1.6 percentage points, respectively). The large areas with the next largest rate increases were Miami-Fort Lauderdale-Pompano Beach, Fla. (+1.4 percentage points), and New Orleans-Metairie-Kenner, La. (+1.1 points). Detroit-Warren-Livonia, Mich., experienced the largest unemployment rate decrease from November 2009 (-3.0 percentage points). Three other large areas recorded rate decreases of at least 1.0 percentage point, with the largest of these declines occurring in Chicago-Joliet-Naperville, Ill.-Ind.-Wis. (-1.3 points).

Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are made up of 34 metropolitan divisions, which are essentially separately identifiable employment centers. In November Detroit-Livonia-Dearborn, Mich., Los Angeles-Long Beach-Glendale, Calif., and Miami-Miami Beach-Kendall, Fla., registered the highest jobless rates among the divisions, 13.0 percent each. Bethesda-Rockville-Frederick, Md., and Nashua, N.H.-Mass., reported the lowest unemployment rates among the divisions, 5.6 percent each. (See table 2.)

In November 21 metropolitan divisions recorded over-the-year jobless rate decreases and 13 divisions reported rate increases. The two divisions that compose the Detroit-Warren-Livonia, Mich., metropolitan area posted the largest rate decreases from November 2009: Detroit-Livonia-Dearborn (-3.0 percentage points) and Warren-Troy-Farmington Hills (-2.8 points). Miami-Miami Beach-Kendall, Fla., experienced the largest unemployment rate increase among divisions (+2.5 percentage points).

In 4 of the 11 metropolitan areas that contain divisions, the ranges between the highest and lowest division jobless rates were 2.0 percentage points or more in November. Boston-Cambridge-Quincy, Mass.-N.H., recorded the largest rate difference among its divisions, 6.4 percentage points (Lawrence-Methuen-Salem, Mass.-N.H., 12.0 percent, compared with Nashua, N.H.-Mass., 5.6 percent).

Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)

In November 180 metropolitan areas reported over-the-year increases in nonfarm payroll employment, 176 reported decreases, and 16 had no change. The largest over-the-year employment increase occurred in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+49,200); followed by Dallas-Fort Worth-Arlington, Texas (+40,600); Boston-Cambridge-Quincy, Mass.-N.H. (+26,500); Phoenix-Mesa-Glendale, Ariz. (+25,500); and Minneapolis-St. Paul-Bloomington, Minn.-Wis. (+22,900). The largest over-the-year percentage gain in employment occurred in Ocean City, N.J. (+17.6 percent); followed by Manhattan, Kan. (+5.4 percent); Kennewick-Pasco-Richland, Wash. (+5.0 percent); and St. Joseph, Mo.-Kan. (+3.9 percent). (See table 3.)

The largest over-the-year employment decrease was recorded in Chicago-Joliet-Naperville, Ill.-Ind.-Wis. (-52,100); followed by San Francisco-Oakland-Fremont, Calif. (-32,200); Detroit-Warren-Livonia, Mich. (-27,700); Sacramento-Arden-Arcade-Roseville, Calif. (-21,500); and Las Vegas-Paradise, Nev. (-21,300). The largest over-the-year percentage decreases in employment were reported in Yuba City, Calif. (-3.7 percent), Great Falls, Mont. (-3.6 percent), and Holland-Grand Haven, Mich. (-3.4 percent).

Over the year, nonfarm employment increased in 24 of the 36 large metropolitan areas with annual average employment levels above 750,000 in 2009. The large area with the largest over-the-year

percentage increase in employment was Austin-Round Rock-San Marcos, Texas (+2.2 percent), followed by Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+1.7 percent), and Phoenix-Mesa-Glendale, Ariz. (+1.5 percent). The largest over-the-year percentage decreases in employment among the large metropolitan areas were posted in Las Vegas-Paradise, Nev., and Sacramento-Arden-Arcade-Roseville, Calif. (-2.6 percent each), and Kansas City, Mo.-Kan. (-2.0 percent).

Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)

Nonfarm payroll employment data were available in November for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Sixteen of the 32 metropolitan divisions reported over-the-year employment gains and 16 reported losses. The largest over-the-year employment increases in the metropolitan divisions were registered in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+37,600), Dallas-Plano-Irving, Texas (+31,700), and Santa Ana-Anaheim-Irvine, Calif. (+19,100). The largest over-the-year employment decrease in the metropolitan divisions occurred in Chicago-Joliet-Naperville, Ill. (-36,400); followed by Warren-Troy-Farmington Hills, Mich. (-21,100); Edison-New Brunswick, N.J. (-19,400); and Oakland-Fremont-Hayward, Calif. (-17,300). (See table 4.)

The largest over-the-year percentage increases in employment among the metropolitan divisions were posted in Bethesda-Rockville-Frederick, Md. (+2.1 percent); Dallas-Plano-Irving, Texas, and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+1.6 percent each); and Framingham, Mass., and Santa Ana-Anaheim-Irvine, Calif. (+1.4 percent each). The largest over-the-year percentage decrease in employment among the metropolitan divisions was reported in Lake County-Kenosha County, Ill.-Wis. (-3.9 percent), followed by Peabody, Mass. (-2.3 percent), and Edison-New Brunswick, N.J., and Warren-Troy-Farmington Hills, Mich. (-2.0 percent each).

The Regional and State Employment and Unemployment news release for December is scheduled to be released on Tuesday, January 25, 2011, at 10:00 a.m. (EST). The Metropolitan Area Employment and Unemployment news release for December is scheduled to be released on Wednesday, February 2, 2011, at 10:00 a.m. (EST).

Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 372 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 8 areas in Puerto Rico. Estimates for 34 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for most of the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

Labor force and unemployment—from the LAUS program

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. *Employed* persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the labor force.

Method of estimation. Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimation was extended to the following areas and their respective balances of state in 2005: the Chicago-Joliet-Naperville, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; New Orleans-Metairie-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. (Model-based estimation of the New Orleans-Metairie-Kenner metropolitan area was suspended following

Hurricane Katrina; the indirect estimation methods described below will be used for this area until further notice.) Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted model-based estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

Employment—from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2007 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to

adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the particular estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. Unemployment rates are computed from unrounded data and thus may differ slightly from rates computed using the rounded data displayed in the tables.

Labor force and unemployment estimates. Model-based error measures are available for states on the Internet at www.bls.gov/lau/lastderr.htm. Measures of nonsampling error are not available, but additional information on the subject is provided in *Employment and Earnings Online* at www.bls.gov/opub/ee/home.htm.

Employment estimates. Measures of sampling error for state CES data at the supersector level and for metro-

politan area CES data at the total nonfarm level are available online at www.bls.gov/sae/790stderr.htm. Information on recent benchmark revisions for states is available on the BLS Web site at www.bls.gov/sae/.

Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

Additional information

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings Online*.

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and seven substate areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the Internet at www.bls.gov/lau/. Employment data from the CES program are available on the BLS Web site at www.bls.gov/sae/.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

¹ Area boundaries do not reflect official OMB definitions.

P = preliminary.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and are available on the BLS Web site at

www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., is the exception in that it is listed under Illinois for operational reasons. Estimates for the latest month are subject to revision the following month.

¹ These 11 areas contain all of the 34 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

³ All of the division is in one or more adjacent states.

P = preliminary.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, available at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that corresponds to the first city in their title. Metropolitan divisions

are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Three sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. For the Boston-Cambridge-Quincy, Mass.-N.H., and Chicago-Joliet-Naperville, Ill.-Ind.-Wis., metropolitan areas, the division titles are similar but include only Massachusetts and Illinois, respectively. Data for 2009 have been revised to incorporate updated inputs and adjustments to new state controls. Estimates for the latest month are subject to revision the following month.

¹ Area boundaries do not reflect official OMB definitions.

^P = preliminary.

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at www.bls.gov/lau/lausmsa.htm. Areas in the

six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill. is the exception since it is listed under Illinois for operational reasons.

¹ Part of the area is in one or more adjacent states.

² All of the area is in one or more adjacent states.

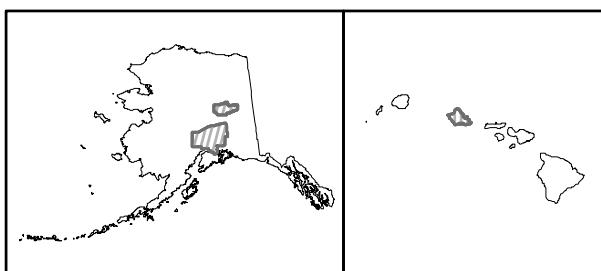

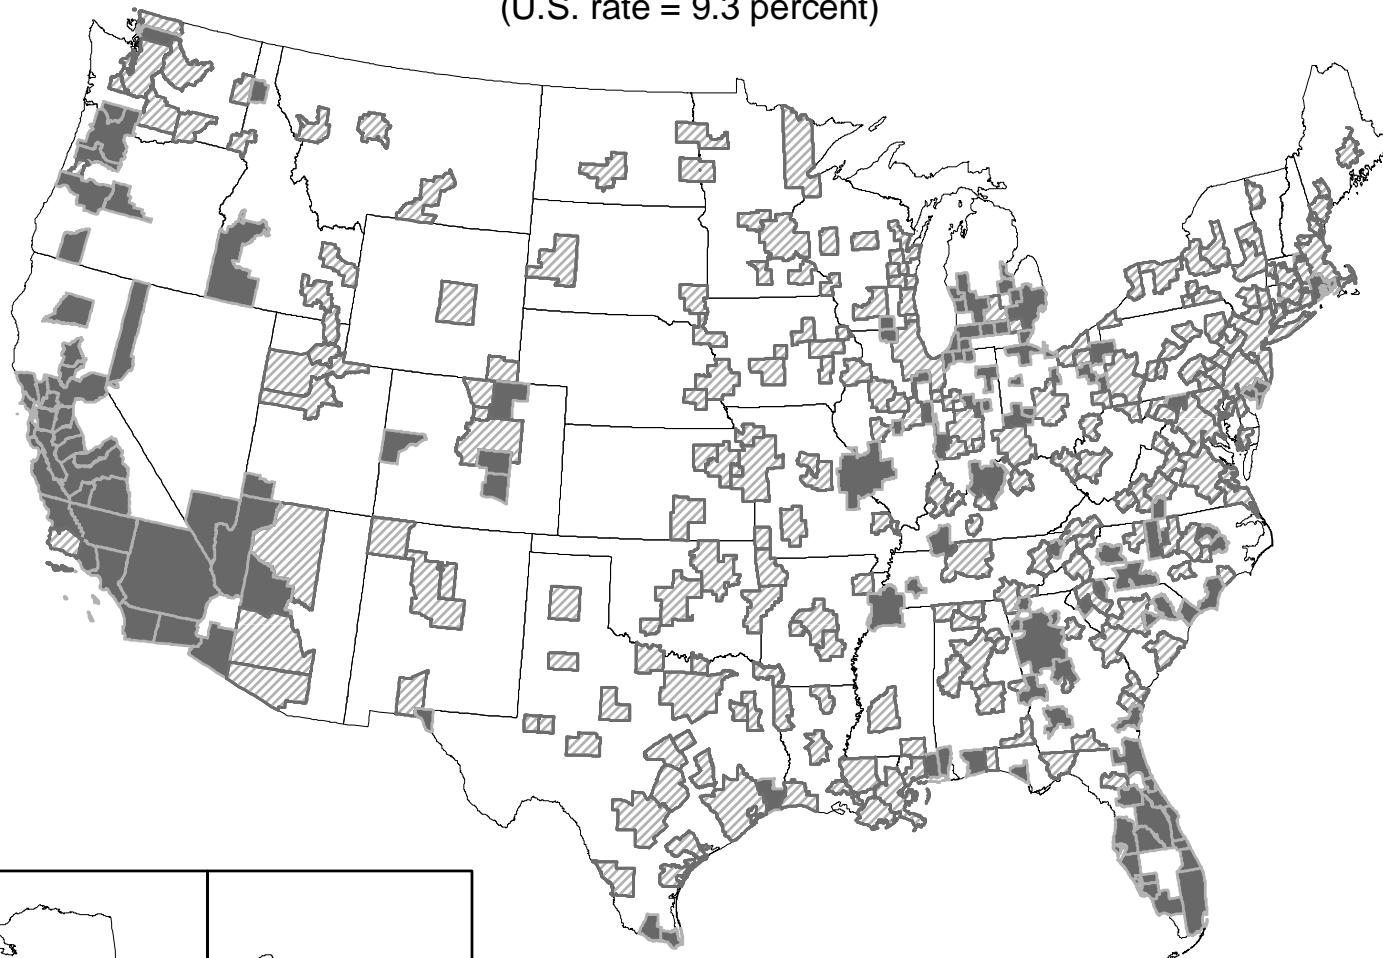

P = preliminary.

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02,

dated December 1, 2009, and available at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed.

Unemployment rates for metropolitan areas, not seasonally adjusted, November 2010

(U.S. rate = 9.3 percent)

NOTE: Map includes data for 372 metropolitan areas based on Office of Management and Budget Bulletin No. 10-02. Areas in the six New England states are Metropolitan New England City and Town areas (NECTAs), while areas in other states are county-based.
