

NEWS RELEASE

BUREAU OF LABOR STATISTICS
U. S. DEPARTMENT OF LABOR

For release 10:00 a.m. (EDT) Wednesday, April 4, 2018

USDL-18-0507

Technical information:

Employment: (202) 691-6559 • sminfo@bls.gov • www.bls.gov/sae
Unemployment: (202) 691-6392 • lausinfo@bls.gov • www.bls.gov/lau

Media contact: (202) 691-5902 • PressOffice@bls.gov

METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — FEBRUARY 2018

Unemployment rates were lower in February than a year earlier in 319 of the 388 metropolitan areas, higher in 48 areas, and unchanged in 21 areas, the U.S. Bureau of Labor Statistics reported today. Twenty-eight areas had jobless rates of less than 3.0 percent and six areas had rates of at least 10.0 percent. Nonfarm payroll employment increased over the year in 313 metropolitan areas, decreased in 69 areas, and was unchanged in 6 areas. The national unemployment rate in February was 4.4 percent, not seasonally adjusted, down from 4.9 percent a year earlier.

Metropolitan Area Unemployment (Not Seasonally Adjusted)

In February, Urban Honolulu, HI, had the lowest unemployment rate, 1.8 percent, closely followed by Ames, IA, 1.9 percent. El Centro, CA, had the highest unemployment rate, 16.0 percent. A total of 200 areas had February jobless rates below the U.S. rate of 4.4 percent, 173 areas had rates above it, and 15 areas had rates equal to that of the nation. (See table 1 and map 1.)

Rockford, IL, had the largest over-the-year unemployment rate decrease in February (-4.3 percentage points). An additional 86 areas had rate declines of at least 1.0 percentage point. The largest over-the-year rate increase occurred in Great Falls, MT (+0.7 percentage point).

Of the 51 metropolitan areas with a 2010 Census population of 1 million or more, Nashville-Davidson—Murfreesboro—Franklin, TN, and San Francisco-Oakland-Hayward, CA, had the lowest unemployment rates in February, 2.7 percent and 2.9 percent, respectively. Buffalo-Cheektowaga-Niagara Falls, NY, had the highest jobless rate among the large areas, 6.4 percent. Forty-five large areas had over-the-year unemployment rate decreases, four had increases, and two had no change. The largest rate decreases

Current Employment Statistics (CES) Data Corrections

This news release contains corrections to previously released employment data in tables 3 and 4 and map 2. A complete list of corrections in this news release and in the CES (State and Area) database can be found at www.bls.gov/bls/errata/sae_errata.htm.

occurred in Birmingham-Hoover, AL (-1.5 percentage points), and Cleveland-Elyria, OH (-1.4 points). No large area had an unemployment rate increase of more than 0.3 percentage point.

Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are made up of 38 metropolitan divisions, which are essentially separately identifiable employment centers. In February, San Francisco-Redwood City-South San Francisco, CA, and San Rafael, CA, had the lowest unemployment rates among the divisions, 2.5 percent each. Tacoma-Lakewood, WA, had the highest division rate, 6.0 percent. (See table 2.)

In February, 32 metropolitan divisions had over-the-year unemployment rate decreases, 2 had increases, and 4 had no change. The largest rate declines occurred in Elgin, IL (-1.4 percentage points), and Lake County-Kenosha County, IL-WI (-1.2 points). Neither of the over-the-year jobless rate increases exceeded 0.3 percentage point.

Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)

In February, 313 metropolitan areas had over-the-year increases in nonfarm payroll employment, 69 had decreases, and 6 had no change. The largest over-the-year employment increases occurred in New York-Newark-Jersey City, NY-NJ-PA (+124,200), Dallas-Fort Worth-Arlington, TX (+96,000), and Los Angeles-Long Beach-Anaheim, CA (+93,400). The largest over-the-year percentage gains in employment occurred in Midland, TX (+9.1 percent), Odessa, TX (+7.5 percent), and Ocean City, NJ (+6.3 percent). (See table 3 and map 2.)

The largest over-the-year decrease in employment occurred in Naples-Immokalee-Marco Island, FL (-4,300), followed by New Orleans-Metairie, LA (-3,900), and Toledo, OH (-3,800). The largest over-the-year percentage decrease in employment occurred in Enid, OK (-3.8 percent), followed by Sebring, FL (-3.0 percent), and Naples-Immokalee-Marco Island, FL (-2.9 percent).

Over the year, nonfarm employment rose in 50 out of 51 metropolitan areas with a 2010 Census population of 1 million or more and fell in New Orleans-Metairie, LA (-0.7 percent). The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in Riverside-San Bernardino-Ontario, CA (+3.9 percent), Austin-Round Rock, TX (+3.7 percent), and Orlando-Kissimmee-Sanford, FL (+3.5 percent).

Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)

In February, nonfarm payroll employment increased in 34 of the 38 metropolitan divisions over the year and fell in 4. The largest over-the-year increase in employment among the metropolitan divisions occurred in New York-Jersey City-White Plains, NY-NJ (+96,100), followed by Dallas-Plano-Irving, TX (+70,400), and Los Angeles-Long Beach-Glendale, CA (+61,500). The over-the-year decreases occurred in Gary, IN (-2,100), Wilmington, DE-MD-NJ (-1,800), and Framingham, MA, and Peabody-Salem-Beverly, MA (-1,300 each). (See table 4.)

The largest over-the-year percentage increase occurred in Seattle-Bellevue-Everett, WA (+3.2 percent), followed by Dallas-Plano-Irving, TX; Dutchess County-Putnam County, NY; and Haverhill-Newburyport-Amesbury Town, MA-NH (+2.8 percent each). The over-the-year percentage decreases

occurred in Peabody-Salem-Beverly, MA (-1.3 percent), Framingham, MA, and Gary, IN (-0.8 percent each), and Wilmington, DE-MD-NJ (-0.5 percent).

The State Employment and Unemployment news release for March is scheduled to be released on Friday, April 20, 2018, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for March is scheduled to be released on Wednesday, May 2, 2018, at 10:00 a.m. (EDT).

Changes to Local Area Unemployment Statistics Data

Effective with the release of Regional and State Unemployment 2017 Annual Averages on Tuesday, February 27, 2018, civilian labor force and unemployment data for all states, the District of Columbia, and the modeled substate areas presented in tables 1 and 2 of this news release were revised from 2013 through 2017 to incorporate updated inputs, new population controls, re-estimation of models, and adjustment to new census division and national control totals. Revisions for all model-based area estimates were loaded into the BLS time series database at that time.

Civilian labor force and unemployment data for the non-modeled metropolitan areas and divisions presented in tables 1 and 2 of this news release have been revised for 2017 to incorporate updated inputs and adjustment to new state control totals. Revised estimates for these areas and divisions have not been loaded into the BLS time series database; therefore, the database does not match the data for 2017 in this news release. Revisions for all non-modeled metropolitan areas and divisions from 2013 through 2017 will be loaded into the database on April 20, 2018. For more information, see www.bls.gov/lau/launews1.htm.

Technical Note

This release presents civilian labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 388 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 7 areas in Puerto Rico. Estimates for 38 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release *State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

Civilian labor force and unemployment—from the LAUS program

Definitions. The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employed persons and unemployed persons on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and older. *Employed* persons are those who did any work at all for pay or profit in the reference week (typically the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *civilian labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the civilian labor force.

Method of estimation. Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimates are also produced for the following areas and their respective balances: the Chicago-Naperville-Arlington Heights, IL Metropolitan Division; Cleveland-Elyria, OH Metropolitan Statistical Area; Detroit-Warren-Dearborn, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; and Seattle-Bellevue-Everett, WA Metropolitan Division. Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate

areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Estimates of employed persons, which are based largely on "place of work" estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated model-based area totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Civilian labor force and unemployment data shown for the prior year reflect adjustments made at the beginning of each year, usually implemented with the issuance of January estimates. The adjusted model-based estimates typically reflect updated population data from the U.S. Census Bureau, any revisions in other input data sources, and model re-estimation. All substate estimates then are re-estimated using updated inputs and adjusted to add to the revised model-based totals. In early 2015, a new generation of time-series models was implemented, resulting in the replacement of data back to the series beginnings. At the same time, enhancements were made to the substate estimation methodology, and more timely inputs from the American Community Survey were incorporated.

Employment—from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2017 version of the North American Industry Classification System.

Method of estimation. CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a "weighted link relative" estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, the sample of establishments is very small or highly variable. In these cases,

a model-based approach is used in estimation. These models use the direct sample estimates (described above), combined with forecasts of historical (benchmarked) data to decrease volatility in estimation. Two different models (Fay-Herriot Model and Small Domain Model) are used depending on the industry level being estimated. For more detailed information about each model, refer to the BLS Handbook of Methods.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Seasonal adjustment. Payroll employment data are seasonally adjusted for states, metropolitan areas, and metropolitan divisions at the total nonfarm level. For states, data are seasonally adjusted at the supersector level as well. Revisions to historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

Civilian labor force and unemployment estimates. Measures of sampling error are not available for metropolitan areas or metropolitan divisions. Model-based error measures

for states are available on the BLS website at www.bls.gov/lau/lastderr.htm. Measures of nonsampling error are not available for the areas contained in this release. Information on recent data revisions for states and local areas is available online at www.bls.gov/lau/launews1.htm.

Employment estimates. Measures of sampling error for the total nonfarm employment series are available for metropolitan areas and metropolitan divisions at www.bls.gov/web/laus/790stderr.htm. Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states down to the supersector level are available on the BLS website at www.bls.gov/web/laus/790stderr.htm. Measures of nonsampling error are not available for the areas contained in this news release. Information on recent benchmark revisions is available online at www.bls.gov/web/laus/benchmark.pdf.

Area definitions

The substate area data published in this release reflect the delineations issued by the U.S. Office of Management and Budget on July 15, 2015. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Additional information

Estimates of unadjusted and seasonally adjusted civilian labor force and unemployment data for states and seven substate areas are available in the news release *State Employment and Unemployment*. Estimates of civilian labor force and unemployment for all states, metropolitan areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available online at www.bls.gov/lau/. Employment data from the CES program are available on the BLS website at www.bls.gov/sae/.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

LABOR FORCE DATA

¹ For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

² The area boundary does not reflect the Office of Management and Budget delineation.

^p Preliminary

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/lausma.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Data for 2017 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

¹ These 11 areas contain all of the 38 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

³ All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data refer to place of residence. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, NJ, are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, DC-VA-MD-WV, the metropolitan area and division titles are identical. Data for 2017 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

¹ For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

² Area boundary does not reflect official OMB delineation.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/lausma.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

¹ These 11 areas contain all of the 38 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

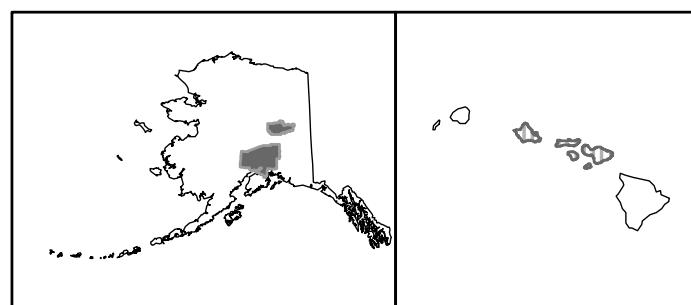

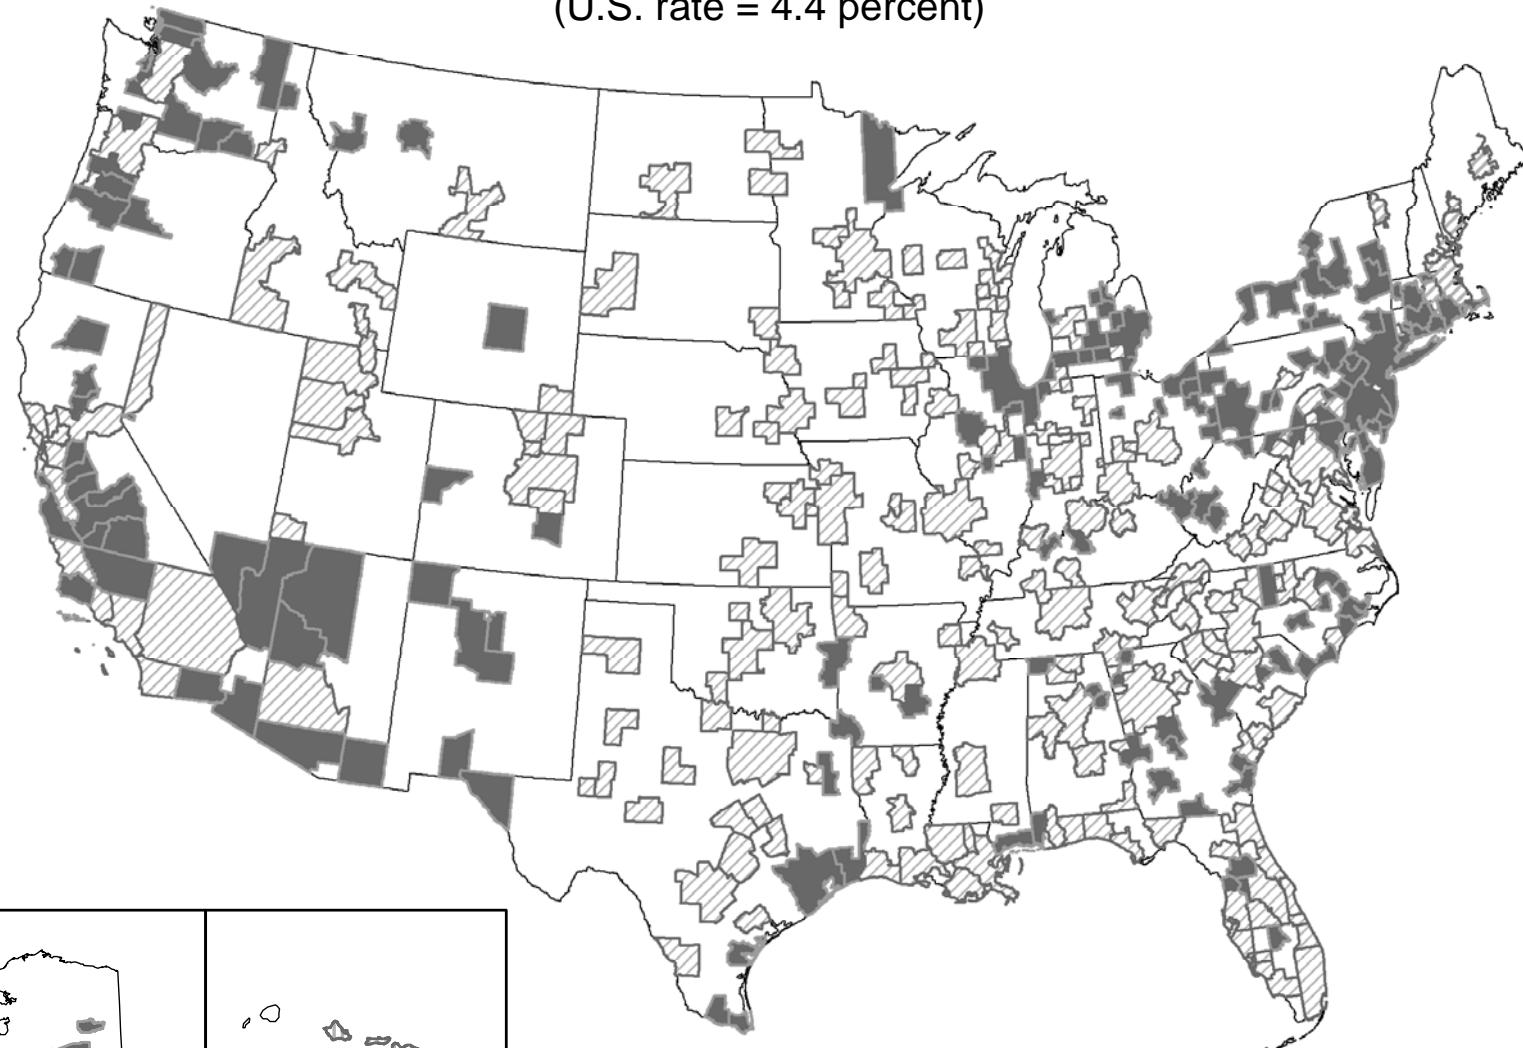

³ All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and available at <https://www.bls.gov/lau/lausma.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.
