USDL-12-1068

Technical information:

Employment: (202) 691-6559 • sminfo@bls.gov • www.bls.gov/sae
Unemployment: (202) 691-6392 • lausinfo@bls.gov • www.bls.gov/lau

Media contact: (202) 691-5902 • PressOffice@bls.gov

(NOTE: This news release contains corrections to previously released employment data in table 3. Data for March and April 2011 were corrected for Montana—Statewide. Additionally, data for September 2011 to March 2012 were corrected for Worcester, MA-CT NECTA. A complete listing of corrections in this news release and in the CES (state and area) database can be found at www.bls.gov/bls/errata/sae_errata.htm.)

METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — APRIL 2012

Unemployment rates were lower in April than a year earlier in 342 of the 372 metropolitan areas, higher in 25 areas, and unchanged in 5 areas, the U.S. Bureau of Labor Statistics reported today. Ten areas recorded jobless rates of at least 15.0 percent, while 32 areas registered rates of less than 5.0 percent. Two hundred forty-six metropolitan areas reported over-the-year increases in nonfarm payroll employment, 115 reported decreases, and 11 had no change. The national unemployment rate in April was 7.7 percent, not seasonally adjusted, down from 8.7 percent a year earlier.

Metropolitan Area Unemployment (Not Seasonally Adjusted)

In April, 41 metropolitan areas reported jobless rates of at least 10.0 percent, down from 79 areas a year earlier, while 163 areas posted rates below 7.0 percent, up from 100 areas in April of last year. El Centro, Calif., and Yuma, Ariz., recorded the highest unemployment rates in April, 26.8 and 26.0 percent, respectively. The remaining eight areas with jobless rates of at least 15.0 percent were all located in California. Bismarck, N.D., registered the lowest unemployment rate, 2.8 percent, followed by Fargo, N.D.-Minn., and Lincoln, Neb., 3.3 percent each. A total of 214 areas recorded April unemployment rates below the U.S. figure of 7.7 percent, 149 areas reported rates above it, and 9 areas had rates equal to that of the nation. (See table 1 and the map.)

Employment Data Corrections

This news release contains corrections to previously released employment data in table 3. Data for March and April 2011 were corrected for Montana—Statewide. A complete listing of corrections in this news release and in the CES (state and area) database can be found at www.bls.gov/bls/errata/sae_errata.htm.

The largest over-the-year unemployment rate decreases in April were registered in Detroit-Warren-Livonia, Mich., and El Centro, Calif. (-2.4 percentage points each). An additional 15 areas had decreases of 2.0 percentage points or more. Kennewick-Pasco-Richland, Wash., reported the only jobless rate increase greater than 1.0 percentage point (+1.4 points).

Among the 49 metropolitan areas with a Census 2000 population of 1 million or more, the highest unemployment rates in April were registered in Riverside-San Bernardino-Ontario, Calif., 11.7 percent, and Las Vegas-Paradise, Nev., 11.6 percent. Three additional large areas posted rates of 10.0 percent or more. The lowest jobless rate among the large areas was recorded in Oklahoma City, Okla., 4.0 percent. Forty-six of the large areas reported over-the-year unemployment rate decreases, while three areas registered increases. Detroit-Warren-Livonia, Mich., experienced the largest unemployment rate decline from April 2011 (-2.4 percentage points), followed by Miami-Fort Lauderdale-Pompano Beach, Fla. (-2.3 points). Three other large areas reported rate decreases of at least 2.0 percentage points, and 23 additional areas had decreases of at least 1.0 point. The largest over-the-year rate increase was recorded in Buffalo-Niagara Falls, N.Y. (+0.7 percentage point).

Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are made up of 34 metropolitan divisions, which are essentially separately identifiable employment centers. In April 2012, Los Angeles-Long Beach-Glendale, Calif., registered the highest jobless rate among the divisions, 11.0 percent. Framingham, Mass., reported the lowest division rate, 4.4 percent. (See table 2.)

Thirty of the metropolitan divisions recorded over-the-year jobless rate decreases in April, while four registered increases. Miami-Miami Beach-Kendall, Fla., posted the largest rate decline from a year earlier (-3.2 percentage points). Two other divisions reported rate decreases of at least 2.0 percentage points, and an additional 14 divisions had decreases of at least 1.0 point. No division experienced an unemployment rate increase greater than 0.5 percentage point.

In 5 of the 11 metropolitan areas that contain divisions, the ranges between the highest and lowest division jobless rates were 2.0 percentage points or more in April. Boston-Cambridge-Quincy, Mass.-N.H., recorded the largest rate difference among its divisions, 5.3 percentage points (Lawrence-Methuen-Salem, Mass.-N.H., 9.7 percent, compared with Framingham, Mass., 4.4 percent).

Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)

In April, 246 metropolitan areas reported over-the-year increases in nonfarm payroll employment, 115 reported decreases, and 11 had no change. The largest over-the-year employment increase occurred in New York-Northern New Jersey-Long Island, N.Y.-N.J.-Pa. (+85,000), followed by Houston-Sugar Land-Baytown, Texas (+81,200), Dallas-Fort Worth-Arlington, Texas (+52,000), and Los Angeles-Long Beach-Santa Ana, Calif. (+51,900). The largest over-the-year percentage gain in employment was reported in Columbus, Ind. (+11.7 percent), followed by Lafayette, La. (+10.3 percent), Odessa, Texas (+9.8 percent), and Blacksburg-Christiansburg-Radford, Va. (+7.4 percent). (See table 3.)

The largest over-the-year decreases in employment occurred in Cleveland-Elyria-Mentor, Ohio (-7,900), and Milwaukee-Waukesha-West Allis, Wis. (-7,800). The largest over-the-year percentage decrease in employment was reported in Dalton, Ga. (-6.4 percent), followed by Ithaca, N.Y. (-5.6 percent), and Fort Smith, Ark.-Okla. (-4.8 percent).

Among the 37 metropolitan areas with annual average employment levels above 750,000 in 2011, nonfarm employment rose over the year in 33 areas, decreased in 3, and was unchanged in 1. The largest over-the-year percentage increases in employment in these large metropolitan areas were posted in San Jose-Sunnyvale-Santa Clara, Calif. (+3.3 percent), and Houston-Sugar Land-Baytown, Texas (+3.1 percent). The largest over-the-year percentage decreases in employment occurred in Milwaukee-Waukesha-West Allis, Wis. (-1.0 percent), and Cleveland-Elyria-Mentor, Ohio (-0.8 percent).

Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)

Nonfarm payroll employment data were available in April 2012 for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Twenty-six of the 32 metropolitan divisions reported over-the-year employment gains, while 6 reported losses. The largest over-the-year increases in the metropolitan divisions occurred in New York-White Plains-Wayne, N.Y.-N.J. (+70,700), Chicago-Joliet-Naperville, Ill. (+36,100), and Dallas-Plano-Irving, Texas (+35,700). The largest over-the-year decrease in the metropolitan divisions was in Detroit-Livonia-Dearborn, Mich. (-3,800). (See table 4.)

The largest over-the-year percentage increase in employment among the metropolitan divisions was reported in Warren-Troy-Farmington Hills, Mich. (+2.8 percent), followed by San Francisco-San Mateo-Redwood City, Calif. (+2.7 percent), Peabody, Mass. (+2.4 percent), Seattle-Bellevue-Everett, Wash. (+2.2 percent), and Fort Worth-Arlington, Texas (+1.9 percent). The largest over-the-year percentage decrease in employment occurred in Nashua, N.H.-Mass. (-2.2 percent).

The Regional and State Employment and Unemployment news release for May is scheduled to be released on Friday, June 15, 2012, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for May is scheduled to be released on Wednesday, June 27, 2012, at 10:00 a.m. (EDT).

Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 372 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 8 areas in Puerto Rico. Estimates for 34 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for most of the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

Labor force and unemployment—from the LAUS program

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. *Employed* persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the labor force.

Method of estimation. Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimation was extended to the following areas and their respective balances of state in 2005: the Chicago-Joliet-Naperville, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; New Orleans-Metairie-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. (Model-based estimation of the New Orleans-Metairie-Kenner metropolitan

area was suspended following Hurricane Katrina; the indirect estimation methods described below will be used for this area until further notice.) Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted model-based estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

Employment—from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2007 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by

employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the particular estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. Unemployment rates are computed from unrounded data and thus may differ slightly from rates computed using the rounded data displayed in the tables.

Labor force and unemployment estimates. Model-based error measures are available for states on the Internet at www.bls.gov/lau/lastderr.htm. Measures of nonsampling error are not available, but additional information on the subject is provided in *Employment and Earnings Online* at www.bls.gov/opub/ee/home.htm.

Employment estimates. Measures of sampling error for

state CES data at the supersector level are available online at www.bls.gov/sae/790stderr.htm. Information on recent benchmark revisions is available on the BLS website at www.bls.gov/sae/.

Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

Additional information

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings Online*.

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and seven substate areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the Internet at www.bls.gov/lau/. Employment data from the CES program are available on the BLS website at www.bls.gov/sae/.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

¹ Area boundaries do not reflect official OMB definitions.

P = preliminary.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and are available on the BLS Web site at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are

Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., is the exception in that it is listed under Illinois for operational reasons. Data for 2011 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

¹ These 11 areas contain all of the 34 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

³ All of the division is in one or more adjacent states.

P = preliminary.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, available at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that corresponds to the first city in their title. Metropolitan divisions

are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Three sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. For the Boston-Cambridge-Quincy, Mass.-N.H., and Chicago-Joliet-Naperville, Ill.-Ind.-Wis., metropolitan areas, the division titles are similar but include only Massachusetts and Illinois, respectively. Data for 2011 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

1 Area boundaries do not reflect official OMB definitions.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill. is the exception since it is listed under Illinois for operational reasons.

¹ Part of the area is in one or more adjacent states.

² All of the area is in one or more adjacent states.

^p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at www.bls.gov/lau/lausmsa.htm. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed.

Unemployment rates for metropolitan areas, not seasonally adjusted, April 2012

(U.S. rate = 7.7 percent)

NOTE: Map includes data for 372 metropolitan areas based on Office of Management and Budget Bulletin No. 10-02. Areas in the six New England states are Metropolitan New England City and Town areas (NECTAs), while areas in other states are county-based.
