NOTE: The prevailing Federal minimum wage was \$5.15 per hour in 2004. Data are for wage and salary workers, excluding the incorporated self-employed. They refer to a person's earnings on their sole or principal job, and pertain only to workers who are paid hourly rates. Salaried workers and other nonhourly workers are not included. The presence of workers with bourly, earnings below the minimum wage does not precessarily indicate. hourly earnings below the minimum wage does not necessarily indicate

violations of the Fair Labor Standards Act, as there are exceptions to the minimum wage provisions of the law. In addition, some survey respondents might have rounded hourly earnings to the nearest dollar, and, as a result, reported hourly earnings below the minimum wage even though they earned the minimum wage or higher. Beginning in January 2004, data reflect revised population controls used in the household survey.
