TABLE S102. Incidence rates¹ for nonfatal occupational injuries and illnesses involving days away from work² per 10,000 full-time workers by nature of injury or illness and gender, state government, 2013 — Continued

Nature	Nature code ³	State government ⁴	Gender	
			Male	Female
Exposures to disease—no illness incurred	7	0.3	0.4	0.2
Nonclassifiable	9999	.2	.1	.2

¹ Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

= number of injuries and illnesses EΗ = total hours worked by all employees during the calendar year

20,000,000 = basefor 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year)

Note: Dash indicates data do not meet publication guidelines. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

Source: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

Days-away-from-work cases include those that resulted in days away from work, some of which also included job transfer or restriction.
 Based on the Occupational Injury and Illness Classification System 2.01 developed by the Bureau of Labor Statistics.
 Excludes farms with fewer than 11 employees.

⁵ Data too small to be displayed.
