County Employment and Wages in Texas – Third Quarter 2021

Employment rose in 23 of the 24 largest counties in Texas from September 2020 to September 2021, the U.S. Bureau of Labor Statistics reported today. (Large counties are those with annual average employment levels of 75,000 or more in 2020.) Regional Commissioner Michael Hirniak noted that Midland County and Travis County had the largest over-the-year increases in employment at 10.4 percent and 8.8 percent, respectively. (See [chart 1](#) and [table 1.](#))

Chart 1. Over-the-year percent change in covered employment among selected large counties in Texas, September 2021

Source: U.S. Bureau of Labor Statistics.

National employment increased 4.4 percent over the year, with 332 of the 343 largest U.S. counties reporting gains. Honolulu, HI, had the largest over-the-year increase in employment with a gain of 13.3 percent. Jefferson, LA, had the largest over-the-year percentage decrease in employment with a loss of 3.2 percent.

Among the 24 largest counties in Texas, employment was highest in Harris County (2,272,500) in September 2021. Within Harris County's private industry, health care and social assistance accounted for the largest employment. Together, the 24 largest Texas counties accounted for 79.0 percent of total employment within the state. Nationwide, the 343 largest counties made up 72.3 percent of total U.S. employment.

Employment and wage levels (but not over-the-year changes) are also available for the 230 counties in Texas with employment below 75,000. Wage levels in 216 of the 230 smaller counties were below the national average of \$1,251 in the third quarter of 2021. (See [table 2](#).)

Large county wage changes

Among the 24 large Texas counties, 23 reported average weekly wage gains from the third quarter of 2020 to the third quarter of 2021. (See [chart 2](#).) Five counties had rates of wage gains that were equal to or above the national rate of 6.7 percent. Travis County had the largest gain (+10.0 percent), followed by Midland County (+8.0 percent), Smith County (+7.7 percent), Dallas County (+7.3 percent), and Bell County (+6.7 percent). Over-the-year wage gains among 18 of Texas's other large counties ranged from 6.5 percent to 3.0 percent. Williamson County reported a wage decrease of 0.2 percent.

Chart 2. Over-the-year percent change in covered average weekly wages among selected large counties in Texas, third quarter 2021

Source: U.S. Bureau of Labor Statistics.

Among the 343 largest counties in the United States, 333 had over-the-year wage increases. San Mateo, CA, had the largest percentage wage increase (+27.2 percent). Union, NJ, had the largest over-the-year percentage decrease (-1.2 percent).

Large county average weekly wages

Weekly wages in 5 of the 24 largest counties in Texas were above the national average of \$1,251 in the third quarter of 2021. Average weekly wages in these five counties ranked among the top 50 nationwide: Travis (\$1,578, 22nd), Midland (\$1,466, 31st), Collin (\$1,454, 33rd), Dallas (\$1,448, 34th), and Harris (\$1,415, 40th).

Among the largest U.S. counties, 85 reported average weekly wages above the U.S. average in the third quarter of 2021. San Mateo, CA, had the highest average weekly wage at \$3,710. Average weekly wages were at or below the national average in the remaining 258 counties. At \$756 a week, Cameron, TX, had the lowest average weekly wage.

Average weekly wages in Texas's smaller counties

Among the 230 smaller counties in Texas—those with employment below 75,000—Carson County (\$1,740) and 13 other counties reported an average weekly wage above the national average. Menard County (\$572) reported the lowest average weekly wage in the state.

When all 254 counties in Texas were considered, 21 reported average weekly wages of less than \$749, 71 registered wages from \$750 to \$849, 64 had wages from \$850 to \$949, 48 had wages from \$950 to \$1,049, and 50 had average weekly wages of \$1,050 or higher. (See [chart 3](#).) The higher-paying counties were located in and around the four metropolitan areas of Amarillo, Austin, Dallas, and Houston, as well as in the Far West Texas region. The lower-paying counties, with weekly wages under \$749, were concentrated mainly in the northwestern and central parts of the state.

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. This publication is typically published in September of the following year of the reference period or shortly after the QCEW first quarter full data update. The *Employment and Wages Annual Averages Online* is available at www.bls.gov/cew/publications/employment-and-wages-annual-averages/.

The County Employment and Wages release for fourth quarter 2021 is scheduled to be released on Wednesday, May 25, 2022.

The County Employment and Wages full data update for fourth quarter 2021 is scheduled to be released on Wednesday, June 8, 2022.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS web site at www.bls.gov/cew. However, data in QCEW press releases have been revised and may not match the data contained on the Bureau's web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative

changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: (202) 691-5200; Telecommunications Relay Service: 7-1-1.

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
