Partial Federal Government Shutdown

The release of these data occurs about 2 weeks later than originally scheduled because of the recent partial Federal government shutdown. Data collection for the estimates in this release had not been completed prior to the shutdown. However, they were collected after the shutdown ended. In addition, the processing of estimates and the production of the Employment Cost Index news release were delayed due to the shutdown.

Corrections to ECI Data Series

Some Employment Cost Index estimates from September 2012 through March 2013 were corrected on June 26, 2013. (Seasonally adjusted estimates were subject to corrections back to March 2008.) For further information, see: www.bls.gov/bls/eci_corrections_043013.htm.

Updated Employment Weights

Beginning with the December 2013 news release, the Employment Cost Index will introduce new employment weights based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS).

TECHNICAL NOTE

The Employment Cost Index (ECI) measures the change in the cost of labor, free from the influence of employment shifts among occupations and industries. Detailed information on survey concepts, coverage, and methods can be found in *BLS Handbook of Methods*, Chapter 8, "National Compensation Measures," Bureau of Labor Statistics, on the Internet at www.bls.gov/opub/hom/pdf/homch8.pdf.

Sample size

Data for the September 2013 reference period were collected from a probability sample of approximately 45,400 occupational observations selected from a sample of about 9,100 establishments in private industry and approximately 9,100 occupations from a sample of about 1,400 establishments in state and local governments.

Health benefit data

Data from the ECI that provide 12-month percent changes in employer costs for health insurance in private industry are available at www.bls.gov/ect/sp/echealth.pdf.

Historical listings

Historical listings that provide all ECI data are available at www.bls.gov/ect/#tables. Included among these listings is one that provides continuous occupational and industry series. This listing uses the Standard Industrial Classification Manual and Census of Population series through 2005 and the North American Industry Classification System and Standard Occupational Classification from 2006 to the present. It provides the official series from the beginning of the ECI in 1975 through the current quarter. For more information on the criteria used in defining continuous series, see the article published in the *Monthly Labor Review* at www.bls.gov/opub/mlr/2006/04/art2full.pdf.

Employer Costs for Employee Compensation data

The costs per hour worked of compensation components, based on data from the ECI, are published in a separate news release titled "Employer Costs for Employee Compensation" (ECEC). The next ECEC release is scheduled for 10:00 a.m. (EST), Wednesday, December 11, 2013. Historical ECEC data are available in summary documents at www.bls.gov/ect/#tables. Since the ECEC is calculated with current employment weights rather than the fixed weights used in computing the ECI, year-to-year changes in the cost levels usually differ from those in the ECI.
