## **METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — FEBRUARY 2013**

Unemployment rates were lower in February than a year earlier in 287 of the 372 metropolitan areas, higher in 69 areas, and unchanged in 16 areas, the U.S. Bureau of Labor Statistics reported today. Eight areas had jobless rates of at least 15.0 percent, and 22 areas had rates of less than 5.0 percent. Three hundred three metropolitan areas had over-the-year increases in nonfarm payroll employment, 58 had decreases, and 11 had no change. The national unemployment rate in February was 8.1 percent, not seasonally adjusted, down from 8.7 percent a year earlier.

### **Metropolitan Area Unemployment (Not Seasonally Adjusted)**

In February, 61 metropolitan areas had jobless rates of at least 10.0 percent, down from 81 areas a year earlier, while 120 areas had rates below 7.0 percent, up from 87 areas in February 2012. Yuma, Ariz., and El Centro, Calif., had the highest unemployment rates in February 2013, at 25.6 and 24.2 percent, respectively. Midland, Texas, had the lowest unemployment rate, 3.2 percent. A total of 208 areas had February unemployment rates below the U.S. figure of 8.1 percent, 157 areas had rates above it, and 7 areas had rates equal to that of the nation. (See table 1 and the map.)

Yuba City, Calif., had the largest over-the-year unemployment rate decrease in February (-2.5 percentage points), followed by Ocala, Fla., and Salinas, Calif. (-2.4 points each). Eighty-nine other areas had rate declines of at least 1.0 percentage point. Yuma, Ariz., had the largest over-the-year jobless rate increase (+3.1 percentage points), followed by Decatur, Ill. (+2.8 points).

Of the 49 metropolitan areas with a Census 2000 population of 1 million or more, Riverside-San Bernardino-Ontario, Calif., had the highest unemployment rate in February, 10.8 percent. Three additional large areas had rates of 10.0 percent or more. Oklahoma City, Okla., had the lowest jobless rate among the large areas, 4.9 percent, followed by Austin-Round Rock-San Marcos, Texas, at 5.4 percent. Forty-one of the large areas had over-the-year unemployment rate decreases, while five areas had increases and three had no change. Las Vegas-Paradise, Nev., had the largest unemployment rate decline from February 2012 (-2.3 percentage points). Chicago-Joliet-Naperville, Ill.-Ind.-Wis., had the largest over-the-year jobless rate increase in a large area (+1.2 percentage points).

## **Metropolitan Division Unemployment (Not Seasonally Adjusted)**

Eleven of the most populous metropolitan areas are made up of 34 metropolitan divisions, which are essentially separately identifiable employment centers. In February 2013, Detroit-Livonia-Dearborn, Mich., had the highest jobless rate among the divisions, 11.3 percent. Bethesda-Rockville-Frederick, Md., had the lowest division rate, 5.2 percent. (See table 2.)

Twenty-seven of the metropolitan divisions had over-the-year jobless rate decreases in February, while five had increases and two had no change. Seattle-Bellevue-Everett, Wash., had the largest rate decline from a year earlier (-2.1 percentage points). Six other divisions had rate decreases of 1.0 percentage point or more. Chicago-Joliet-Naperville, Ill., and Gary, Ind., had the largest unemployment rate increases from a year earlier (+1.2 and +1.1 percentage points, respectively).

## **Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)**

In February, 303 metropolitan areas had over-the-year increases in nonfarm payroll employment, 58 had decreases, and 11 had no change. The largest over-the-year employment increases occurred in Los Angeles-Long Beach-Santa Ana, Calif. (+124,600), Houston-Sugar Land-Baytown, Texas (+118,700), New York-Northern New Jersey-Long Island, N.Y.-N.J.-Pa. (+110,000), and Dallas-Fort Worth-Arlington, Texas (+108,900). The largest over-the-year percentage gains in employment were in Midland, Texas, and Odessa, Texas (+8.1 percent each), followed by Santa Cruz-Watsonville, Calif. (+6.4 percent), and Napa, Calif. (+6.0 percent). (See table 3.)

The largest over-the-year decrease in employment occurred in Shreveport-Bossier City, La. (-3,100), followed by Charlottesville, Va. (-2,800), and Atlantic City-Hammonton, N.J. (-2,700). The largest over-the-year percentage decrease in employment occurred in Decatur, Ill. (-4.4 percent), followed by Charlottesville, Va. (-2.8 percent), and Pine Bluff, Ark. (-2.2 percent).

Over the year, nonfarm employment rose in all 37 metropolitan areas with annual average employment levels above 750,000 in 2012. The largest over-the-year percentage increase in employment in these large metropolitan areas was in Houston-Sugar Land-Baytown, Texas (+4.5 percent), followed by Austin-Round Rock-San Marcos, Texas (+4.0 percent), and Nashville-Davidson—Murfreesboro—Franklin, Tenn. (+3.9 percent).

## **Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)**

Nonfarm payroll employment data were available in February 2013 for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Thirty-one of the 32 metropolitan divisions had over-the-year employment gains and 1 had a loss. The largest over-the-year increases in employment within the metropolitan divisions occurred in Los Angeles-Long Beach-Glendale, Calif. (+89,400), Dallas-Plano-Irving, Texas (+72,200), and New York-White Plains-Wayne, N.Y.-N.J. (+66,500). The only over-the-year decrease in employment within the metropolitan divisions was in Lake County-Kenosha County, Ill.-Wis. (-2,600). (See table 4.)

The largest over-the-year percentage increase in employment among the metropolitan divisions was in Fort Worth-Arlington, Texas (+4.2 percent), followed by San Francisco-San Mateo-Redwood City, Calif. (+3.6 percent), and Dallas-Plano-Irving, Texas (+3.5 percent). The only over-the-year percentage decrease in employment occurred in Lake County-Kenosha County, Ill.-Wis. (-0.7 percent).

---

**The Regional and State Employment and Unemployment news release for March is scheduled to be released on Friday, April 19, 2013, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for March is scheduled to be released on Wednesday, May 1, 2013, at 10:00 a.m. (EDT).**

#### **Changes to Local Area Unemployment Statistics Data**

Labor force and unemployment data for the non-modeled metropolitan areas and divisions presented in tables 1 and 2 of this news release have been revised for 2012 to incorporate updated inputs and adjustment to new state control totals. However, historical estimates in the BLS time series database will not be updated until Friday, April 19th. For more information, see [www.bls.gov/lau/launews1.htm](http://www.bls.gov/lau/launews1.htm).

#### **Current Employment Statistics (CES) Data Corrections**

This news release contains corrections to previously released area employment data in tables 3 and 4. More information and a complete list of corrections to the CES State and Area database can be found at [www.bls.gov/bls/errata/sae\\_errata.htm](http://www.bls.gov/bls/errata/sae_errata.htm).

## Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 372 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 8 areas in Puerto Rico. Estimates for 34 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for most of the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

### Labor force and unemployment—from the LAUS program

**Definitions.** The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. *Employed* persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the labor force.

**Method of estimation.** Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimation was extended to the following areas and their respective balances of state in 2005: the Chicago-Joliet-Naperville, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; New Orleans-Metairie-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. (Model-based estimation of the New Orleans--Metairie-Kenner metropolitan area was suspended following Hurricane Katrina; the indirect estimation methods described below will be used for this area until further notice.) Modeling improves the statistical basis of the estimation for these areas

and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

**Annual revisions.** Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted model-based estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

### Employment—from the CES program

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a “weighted link relative” estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month’s employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, relatively small sample sizes limit the reliability of the weighted link-relative estimates. In these cases, BLS uses the CES small domain model (SDM) to generate employment estimates. The SDM combines the direct sample estimates (described above) and forecasts of historical (benchmarked) data to decrease the volatility of the estimates. With the January 2013 estimates published on March 18, 2013, BLS will refine the SDM

methodology to incorporate more real-time information in the model. For more detailed information about the CES small domain model, refer to the BLS Handbook of Methods.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Seasonal adjustment.** Payroll employment data are seasonally adjusted at the statewide supersector level. In some states, the seasonally adjusted payroll employment total is computed by aggregating the independently adjusted supersector series. In other states, the seasonally adjusted payroll employment total is independently adjusted. Revisions of historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

### **Reliability of the estimates**

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. Unemployment rates are computed from unrounded data and thus may differ slightly from rates computed using the rounded data displayed in the tables.

**Labor force and unemployment estimates.** Model-

based error measures are available for states on the Internet at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm). Measures of nonsampling error are not available, but additional information on the subject is provided in *Employment and Earnings Online* at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm).

**Employment estimates.** Measures of sampling error for state CES data at the total nonfarm and supersector levels are available online at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). BLS uses a 90-percent confidence level in determining whether changes in CES employment levels are statistically significant. Information on recent benchmark revisions for states is available online at [www.bls.gov/sae/](http://www.bls.gov/sae/).

### **Area definitions**

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

### **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings Online*.

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and seven substate areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the Internet at [www.bls.gov/lau/](http://www.bls.gov/lau/). Employment data from the CES program are available on the BLS website at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

<sup>1</sup> Area boundaries do not reflect official OMB definitions.

P = preliminary.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and are available on the BLS website at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are

Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appear first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., is the exception in that it is listed under Illinois for operational reasons. Data for 2012 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 34 metropolitan divisions.  
<sup>2</sup> Part of the area (or division) is in one or more adjacent states.  
<sup>3</sup> All of the division is in one or more adjacent states.  
<sup>P</sup> = preliminary.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that corresponds to the first city in their title. Metropolitan divisions

are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Three sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. For the Boston-Cambridge-Quincy, Mass.-N.H., and Chicago-Joliet-Naperville, Ill.-Ind.-Wis., metropolitan areas, the division titles are similar but include only Massachusetts and Illinois, respectively. Data for 2012 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

1 Area boundaries do not reflect official OMB definitions.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill. is the exception since it is listed under Illinois for operational reasons.

1 Part of the area is in one or more adjacent states.

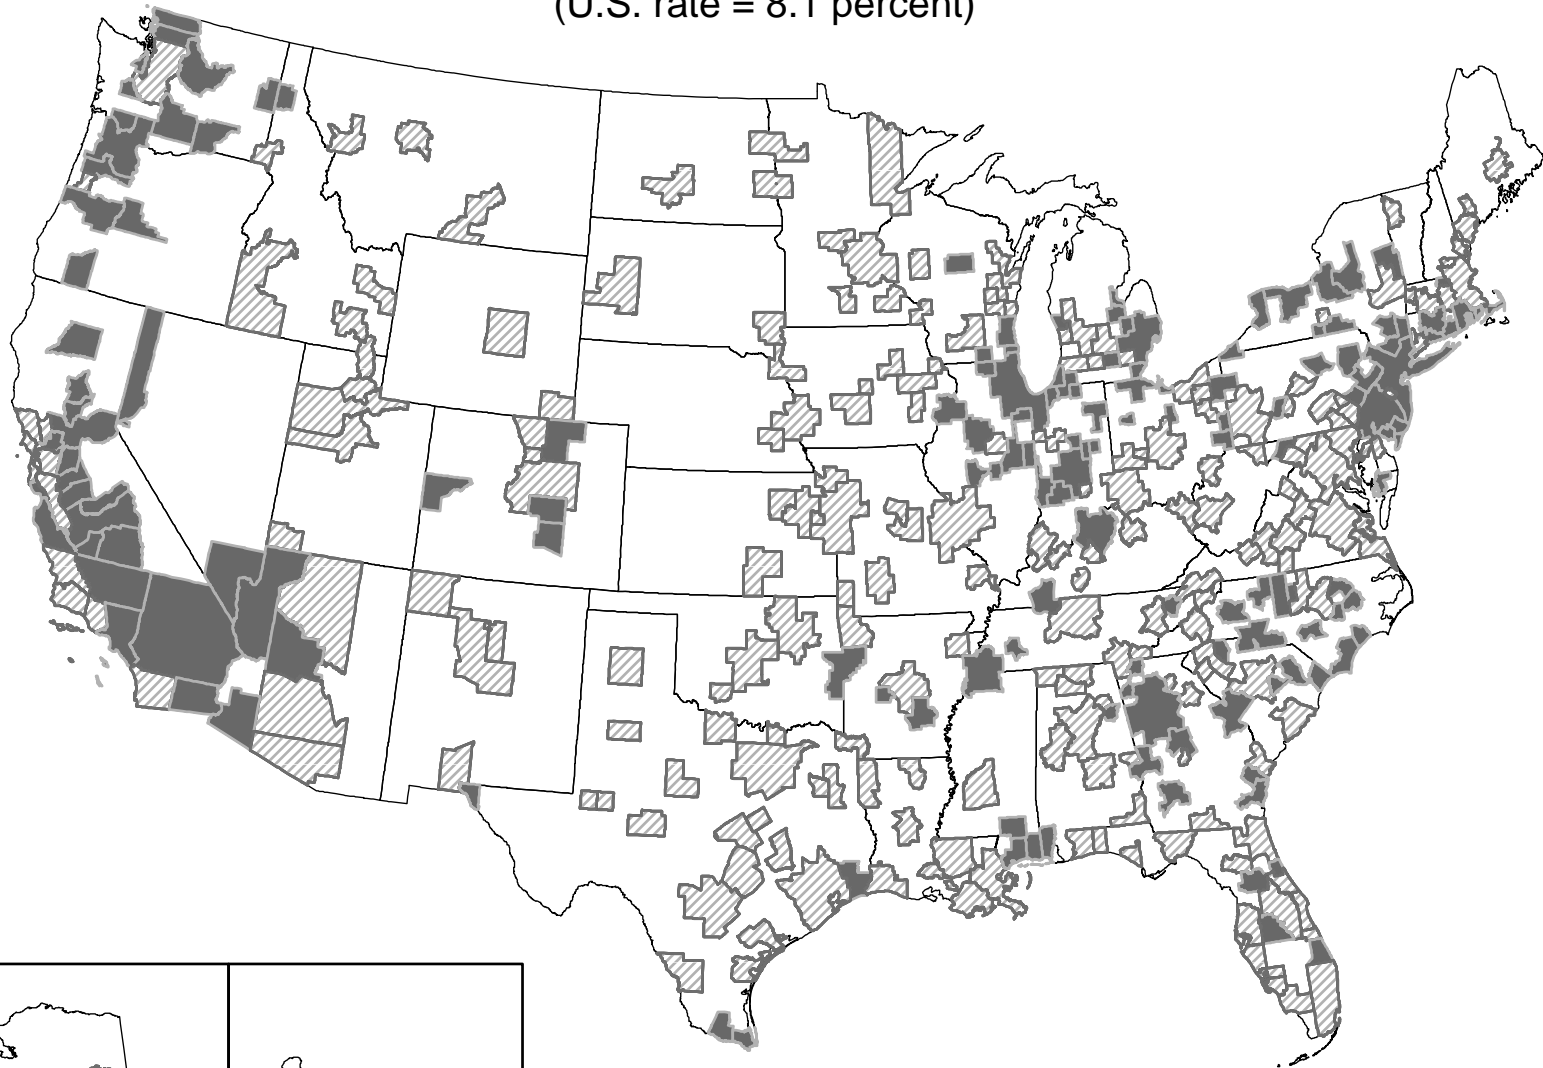

2 All of the area is in one or more adjacent states.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed.

# Unemployment rates for metropolitan areas, not seasonally adjusted, February 2013

(U.S. rate = 8.1 percent)

NOTE: Map includes data for 372 metropolitan areas based on Office of Management and Budget Bulletin No. 10-02. Areas in the six New England states are Metropolitan New England City and Town areas (NECTAs), while areas in other states are county-based.
