This directory contains the industry employment projections data files released in August of 2025, as well as the related industry employment and output data used to develop those projections. The projections are available only on a national basis and only for the year 2034. The historical data are available on an annual basis and only on a national basis.

The directory contains the following files:

PDF Files

readme.pdf

This document

IndOut&Emp_Description.pdf

Notes on the sources and development of the historical data

EXCEL File

SectorPlan2034.xlsx

Current industry sector plan (176 detailed industries and 54 aggregate sectors); also includes the stubs for all sectors, both detailed and aggregate levels.

CSV (Comma Separated Values) Files

Historical

EMP24.csv

Industry employment

IND24.csv

Industry output: Data for the year 2024 utilize different estimation methods due to the limited availability of final data.

COM24.csv

Commodity output: Data for the year 2024 utilize different estimation methods due to the limited availability of final data.

Projected

PROJ2034.csv

Industry output and employment: 2024 historical and projected for the year 2034

FORMAT OF DATA FILES

The data values are in row and column formats, with each column separated by a comma and each row being a new line. The first row is a header row in each of the files, indicating the meaning of the data in each column. The first two values in each row are integer values that indicate the data series and industry sector, respectively. The remaining values in each row are data. The projections data file contains historical data for 2024 and projected data for the year 2034.

DATA SERIES CODES

- '1' Domestic industry output, in millions of current dollars
- '2' Domestic industry output, in millions of chain-weighted (2017) dollars
- '3' Industry output chain-weighted deflator, 2017=100
- '4' Total jobs, in thousands
- '5' Total hours of all persons, in millions
- '6' Wage and salary jobs, in thousands
- '7' Wage and salary hours, in millions
- '10' Self-employed worker jobs, in thousands
- '11' Self-employed worker hours, in millions
- '12' Domestic commodity output, in millions of current dollars
- '13' Domestic commodity output, in millions of chain-weighted (2017) dollars
- '14' Commodity output chain-weighted deflator, 2017=100

Please refer to the SectorPlan2034.xlsx file for the industry titles.
