

Part-time employment rates by sex, selected countries, 2009

CHART 2.7

The part-time employment rate for women was roughly 2 to 5 times higher than the men's rate in most countries.

- The largest difference between men and women's part-time employment rates was in the Netherlands, although it had the highest rate for both men (17.0 percent) and women (59.9 percent).
- Part-time employment was least common for both men and women in three Eastern European countries: Slovakia, Hungary, and the Czech Republic.
