## Consumer Price Index, San Diego - Second Half 2015

Area prices were up 1.6 percent over the past six months, up 2.4 percent from a year ago
Prices in the San Diego Area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), increased 1.6 percent in the second half of 2015, the U.S. Bureau of Labor Statistics reported today. (See table A.) Regional Commissioner Richard J. Holden noted that this latest six-month increase was influenced by higher prices for shelter and recreation. (Data in this report are not seasonally adjusted. Accordingly, six-month-to-six-month changes may reflect seasonal influences.)

Over the last 12 months, the CPI-U advanced 2.4 percent. (See chart 1 and table A.) Energy prices fell 3.8 percent, largely the result of a decrease in the price of gasoline. The index for all items less food and energy advanced 3.1 percent over the year. (See table 1.)

Chart 1. Over-the-year percent change in CPI-U, San Diego, second half 2012-second half 2015

Source: U.S. Bureau of Labor Statistics.

## Food

Food prices increased 1.4 percent in the second half of 2015. (See table 1.) Prices for food away from home increased 2.4 percent, and prices for food at home rose 0.6 percent for the same period.

Over the year, food prices advanced 1.8 percent. Prices for food away from home increased 3.7 percent since a year ago, and prices for food at home rose 0.1 percent.

## Energy

The energy index increased 0.9 percent since the first half of 2015 . The increase was mainly due to higher prices for electricity ( 2.4 percent). Prices for natural gas service increased 1.8 percent, and prices for gasoline rose 0.1 percent for the same period.

Energy prices fell 3.8 percent over the year, largely due to lower prices for gasoline (-8.4 percent). Prices paid for natural gas service decreased 1.3 percent, but prices for electricity increased 7.4 percent during the past year.

## All items less food and energy

The index for all items less food and energy rose 1.6 percent in the latest six-month period. Components contributing to the increase included shelter (2.3 percent) and recreation (2.3 percent).

Over the year, the index for all items less food and energy advanced 3.1 percent. Components contributing to the increase included apparel ( 6.5 percent) and shelter ( 4.3 percent). Partly offsetting the increases were price declines in education and communication ( -0.7 percent) and other goods and services ( -0.2 percent).

Table A. San Diego CPI-U monthly and annual percent changes (not seasonally adjusted)

| Month | 2010 |  | 2011 |  | 2012 |  | 2013 |  | 2014 |  | 2015 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Semiannual | Annual | Semiannual | Annual | Semiannual | Annual | Semiannual | Annual | Semiannual | Annual | Semiannual | Annual |
| First Half | 0.2 | 1.4 | 2.3 | 3.4 | 1.3 | 1.7 | 0.6 | 0.9 | 1.4 | 2.4 | 0.9 | 0.8 |
| Second Half. | 1.0 | 1.2 | 0.4 | 2.7 | 0.3 | 1.5 | 1.1 | 1.7 | -0.1 | 1.3 | 1.6 | 2.4 |

## The First Half of 2016 Consumer Price Index for the San Diego is scheduled to be released on July 15, 2016.

## Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5 . This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from $\$ 10$ in 1982-84 to $\$ 11.65$. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/ homch17_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.

The San Diego, CA metropolitan area covered in this release consists of San Diego County in the State of California.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
