HIGHLIGHTS OF CHARLESTON-NORTH CHARLESTON-SUMMERVILLE, S.C. NATIONAL COMPENSATION SURVEY – MAY 2010

Workers in the Charleston-North Charleston-Summerville Metropolitan Statistical Area (MSA) earned an average of \$17.70 per hour in May 2010, the U.S. Bureau of Labor Statistics reported today, according to new survey results from the National Compensation Survey (NCS). Regional Commissioner Janet S. Rankin noted that wage data were reported for workers in a wide range of occupational groups, including average hourly earnings of \$19.32 for installation, maintenance, and repair occupations and \$14.02 for office and administrative support occupations. Another occupational group, food preparation and serving related occupations, had a mean hourly wage rate of \$7.62. The NCS data available for the Charleston-North Charleston-Summerville area include earnings for 17 major occupational groups with additional detail for selected occupations within those groups. (See table 1.)

Industrial machinery mechanics, part of the installation, maintenance, and repair occupational group, earned \$22.75 per hour. Within the office and administrative support occupations, general office clerks averaged \$13.16 per hour, while shipping, receiving, and traffic clerks earned \$12.92. Combined food preparation and serving workers, including fast food, an occupation within the food preparation and serving related occupational group, averaged \$7.98 per hour. (See table 1.)

Broad coverage of selected occupational characteristics is available from NCS for the local area. Full-time workers averaged \$18.81 per hour while their part-time counterparts earned \$11.25. Union workers earned \$23.69 and non-union workers, \$17.54. Workers in establishments with 1-99 workers averaged \$14.09 per hour, those in establishments with 100-499 workers earned \$19.17, and those in establishments with 500 or more employees earned \$23.99.

The occupational wage data available from NCS may be used by businesses for establishing pay plans, making decisions concerning plant location, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. NCS results also include the work level and respective earnings for occupations determined by a point factor leveling process. The four occupational leveling factors are: knowledge, job controls and complexity, contacts, and physical environment. Details on the NCS are available at www.bls.gov/ncs/home.htm.

The NCS data reported here covered 193 establishments with one or more workers in private industry and State and local governments. Agricultural establishments, private households, the self-employed,

and the Federal Government were excluded from the survey. This sample of establishments represented 247,400 workers in the Charleston-North Charleston-Summerville Metropolitan Statistical Area (MSA) which is comprised of Berkeley, Charleston, and Dorchester Counties in South Carolina.

Survey availability

Complete survey results are contained in the Charleston-North Charleston-Summerville, SC National Compensation Survey May 2010 which is available on the Internet in both text and PDF formats at www.bls.gov/ncs/ocs/compub.htm.

For personal assistance or further information on the National Compensation Survey data, as well as other Bureau data, contact the Southeast Information Office by calling (404) 893-4222 from 9:00 a.m. to 12:00 p.m. and 1:00 p.m. to 4:00 p.m. ET.

Laborers and freight, stock, and material movers, hand	11.85	5.2	—	—	—	—

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

² Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

³ Workers are classified by occupation using the 2000 Standard

Occupational Classification (SOC) system.

⁴ The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.
