**HIGHLIGHTS OF LOS ANGELES-LONG BEACH-RIVERSIDE, CA
NATIONAL COMPENSATION SURVEY APRIL 2010**

Workers in the Los Angeles-Long Beach-Riverside Combined Statistical Area (CSA) earned an average of \$23.24 per hour in April 2010, according to new survey results from the National Compensation Survey (NCS) released by the U.S. Bureau of Labor Statistics (BLS). Regional Commissioner Richard J. Holden noted that wages were reported for workers in a wide range of occupational groups, including average hourly earnings of \$47.96 for management occupations and \$36.82 for healthcare practitioner and technical occupations. Another occupational group, transportation and material moving occupations, had a mean hourly wage of \$15.39. The NCS data available for the Los Angeles-Long Beach-Riverside area include earnings for 21 major occupational groups with additional detail for selected occupations within those groups. (See table 1.)

Engineering managers, part of the management occupational group, earned \$61.11 per hour and financial managers earned \$48.56 per hour. Within the healthcare practitioner and technical occupational group, pharmacists averaged \$54.98 per hour and respiratory therapists earned \$33.54 per hour. Truck drivers, heavy and tractor-trailer, an occupation within transportation and material moving occupations group, registered an average hourly rate of \$21.44 per hour and taxi drivers and chauffeurs earned \$13.18 per hour.

Broad coverage of selected occupational characteristics is available from NCS for the local area. Full-time workers averaged \$24.66 per hour, while their part-time counterparts earned \$13.77. Union workers earned \$30.16 and non-union workers earned \$21.35. Workers in establishments with 1-99 workers averaged \$20.09 per hour, while those in establishments with 100-499 workers earned \$20.47, and those in establishments with 500 or more employees earned \$31.50.

The occupational wage data available from NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. NCS results also include the work level and respective earnings for occupations determined by a point factor leveling process. The four occupational leveling factors are: knowledge, job controls and complexity, contacts, and physical environment. Details on the NCS are available at www.bls.gov/ncs/home.htm.

The NCS data reported here covered 1,328 establishments with one or more workers in private industry and State and local governments. Agricultural establishments, private households, the self-employed, and the Federal Government were excluded from the survey. This sample of establishments represented

6,299,900 workers in the Los Angeles-Long Beach-Riverside Combined Statistical Area (CSA) which is comprised of Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties in California.

Survey Availability

Complete survey results are contained in the *Los Angeles-Long Beach-Riverside, CA National Compensation Survey, April 2010*, which is available on the Internet in both text and PDF formats at www.bls.gov/ncs/ocs/compub.htm.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau data, contact the West Information Office by calling (415) 625-2270 from 9:00 a.m. to 11:30 a.m. and 1:30 p.m. to 4:00 p.m. PT.

Table 1. **Civilian workers: Mean hourly earnings¹ for full-time and part-time workers², Los Angeles-Long Beach-Riverside, CA CSA, April 2010** — Continued

Occupation ³	Total		Full-time workers		Part-time workers	
	Mean	Relative error ⁴ (percent)	Mean	Relative error ⁴ (percent)	Mean	Relative error ⁴ (percent)
Transportation and material moving occupations —Continued						
Laborers and freight, stock, and material movers, hand	\$12.10	5.8	\$12.43	6.2	\$10.56	5.3
Machine feeders and offbearers	9.42	6.3	9.42	6.3	—	—
Packers and packagers, hand	10.34	6.7	10.40	7.4	9.87	2.3

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

² Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

³ Workers are classified by occupation using the 2000 Standard

Occupational Classification (SOC) system.

⁴ The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.
