TECHNICAL NOTE

Employer Costs for Employee Compensation (ECEC) measures the average cost to employers for wages and salaries and benefits per employee hour worked. The ECEC includes the civilian economy, which includes data from both private industry and state and local government. Excluded from private industry are the self-employed and farm and private household workers. Federal government workers are excluded from the public sector. The private industry series and the state and local government series provide data for the two sectors separately.

Sample size

Data for the June 2017 reference period were collected from a probability sample of approximately 27,700 occupational observations selected from a sample of about 6,700 private industry establishments and approximately 8,100 occupational observations selected from a sample of about 1,400 state and local government establishments that provided data at the initial interview.

ECEC benchmarking by establishment size and industry

For information on benchmarking by industry, see *The Weighting Process Used in the Employer Costs for Employee Compensation Series for the National Compensation Survey*, at www.bls.gov/osmr/pdf/st110220.pdf.

Comparing private and public sector data

Compensation cost levels in state and local government should not be directly compared with levels in private industry. Differences between these sectors stem from factors such as variation in work activities and occupational structures. Manufacturing and sales, for example, make up a large part of private industry work activities but are rare in state and local government. Professional and administrative support occupations (including teachers) account for two-thirds of the state and local government workforce, compared with one-half of private industry.

ECEC quarterly publication focus

ECEC news releases are published quarterly, providing civilian, private industry, and state and local government cost per hour estimates as well as additional detail on a specific compensation cost topic of interest. This quarter focuses on retirement benefit costs in private industry. Topics of news releases for the upcoming reference periods are as follows:

- September 2017—Compensation costs in state and local government
- December 2017—Supplemental pay benefits in private industry

ECEC detailed information and measures

For detailed information on Employer Costs for Employee Compensation, see Chapter 8, "National Compensation Measures," of the *BLS Handbook of Methods* at www.bls.gov/opub/hom/pdf/homch8.pdf.

Employer costs for retirement and savings plans are affected by several factors, including the percentage of employees participating in employer-sponsored plans. The National Compensation Survey produces comprehensive estimates on the percentage of workers with access to and that participate in retirement plans. For the latest information on retirement and savings provisions, see www.bls.gov/ncs/ebs/detailedprovisions/home.htm and www.bls.gov/news.release/pdf/ebs2.pdf.
