## I. Topcoding and Other Nondisclosure Requirements

CE needs to ensure that users are not able to identify consumer units' (CU) who participated in the survey. CE ensures protects the respondents' identify by changing sensitive data with two methods: Topcoding and suppression.

Topcoding refers to the replacement of data if the value of the original data exceeds prescribed critical values. Critical values for each variable containing sensitive data are calculated in accordance with Census Disclosure Review Board guidelines. Each observation that falls outside the critical value is replaced with a topcoded value that represents the mean of the subset of all outlying observations. All five quarters of data in the CE microdata release are used when calculating the critical value and topcode amounts. If an observation is topcoded, the flag variable assigned to that observation is set to 'T.' for simplicity, this document will refer only to "topcoding," but the reader should be aware that outliers at the lower extremes may also be "bottom-coded."

Since the critical value and mean of the set of values outside the critical value may differ with each annual (five-quarter) release, the topcode values may change annually and be applied at a different starting point. By topcoding values in this manner, means are preserved for each fivequarter data release when using the total sample. This, however, will not be the case when means are estimated by characteristic, because topcode values are not calculated by characteristic.

Suppression refers to the suppression of data if the value of the original data could reveal the identity but topcoding is not suitable. For example, state information is suppressed by changing the code from one state to that of a neighboring state.

## II. Interview Survey

## A. CU Characteristics and Income File (FMLI)

## 1. Directly topcoded

The following table shows the FMLI file variables that are subject to topcoding and their associated critical values and topcode values. For multiple imputed income variables, it is possible for an upper topcode value to be less than the upper critical value or for a lower topcode value to be greater than the lower critical value.

| Variable | Description | Upper <br> Critical <br> Value | Lower <br> Critical <br> Value | Upper <br> Topcode <br> Value | Lower <br> Topcode <br> Value |
| :---: | :--- | :---: | :---: | :---: | :---: |
| CREDFINX | TOT AMT PAID <br> FINANCE LATE <br> CHARGE AND <br> INTEREST ALL CARDS <br> LAST MONTH | 1,370 |  | 2,735 |  |
| CREDITX | TOT AMT OWED ALL <br> CARDS | 30,000 |  | 51,839 |  |
| CREDTYRX | TOT AMT OWED ALL <br> CARDS YR AGO | 35,000 |  | 59,940 |  |
| INTRDVX | AMT RECEIVED IN <br> INTEREST LAST 12 <br> MNTHS | 40,000 |  | 114,642 |  |
| INTRDVXM | AMT RECEIVED IN <br> INTEREST LAST 12 <br> MNTHS | 40,000 |  | 67,951 |  |
| IRAX | TOT VALUE OF ALL <br> RET ACCOUNTS | $1,100,000$ |  | $1,788,226$ |  |
| IRAYRX | TOT VALUE OF ALL <br> RET ACCOUNTS YR <br> AGO | $1,050,000$ |  | $1,746,648$ |  |
| LIQUDYRX | TOT VALUE OF <br> ACOUNTS YR AGO | 150,000 |  | 380,627 |  |
| LIQUIDX | TOT VALUE OF <br> ACOUNTS | 175,000 |  | 391,152 |  |
| LUMPSUMX | Amount of lump sum <br> receipts | 157,000 |  | 503,254 |  |
| MISCTAXX | Amount of other taxes <br> paid during the past 12 <br> months | 35,000 |  | 700 |  |

| NETRENTM | NET RENTAL INCOME OR LOSS | 60,000 | $(21,000)$ | 72,089 | $(33,000)$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| NETRENTX | NET RENTAL INCOME OR LOSS | 60,000 | $(21,000)$ | 105,717 | $(33,000)$ |
| OTHASTX | VAL OF OTHER FINANCIAL ASSETS | 750,000 |  | 3,625,000 |  |
| OTHFINX | TOT AMT PAID IN FINANCE LATE CHARGES ALL OTHER LOANS | 1,062 |  | 1,920 |  |
| OTHLNYRX | TOT AMT OWED ALL OTHER LOANS YR AGO | 50,000 |  | 179,000 |  |
| OTHLONX | TOT AMT OWED ALL OTHER LOANS | 50,000 |  | 197,596 |  |
| OTHREGX | AMT INCOME FROM OTHER SOURCES | 36,826 |  | 55,862 |  |
| OTHREGXM | AMT INCOME FROM OTHER SOURCES | 36,826 |  | 41,074 |  |
| OTHRINCM | Amount received in other money income | 50,000 |  | 53,411 |  |
| OTHRINCX | Amount received in other money income | 50,000 |  | 77,582 |  |
| OTHSTYRX | VAL OF OTHER <br> FINANCIAL ASSETS YR AGO | 750,000 |  | 3,375,000 |  |
| RENTEQVX | Estimated monthly rental equivalence of owned home | 4,000 |  | 6,703 |  |
| RETSURVM | AMT INCOME FROM RET SURVIVOR DISABILITY | 74,880 |  | 96,696 |  |
| RETSURVX | AMT INCOME FROM RET SURVIVOR DISABILITY | 74,880 |  | 127,754 |  |
| ROYESTX | AMT INCOME FROM ROYALTY OR ESTATES AND TRUSTS | 130,000 |  | 462,818 |  |
| ROYESTXM | AMT INCOME FROM ROYALTY OR ESTATES AND TRUSTS | 130,000 |  | 245,688 |  |
| STOCKX | TOT VALUE DIRECTLY HELD STOCKS BONDS MUTUAL FUNDS | 1,100,000 |  | 2,481,143 |  |
| STOCKYRX | TOT VALUE DIRECTLY HELD STOCKS BONDS MUTUAL FUNDS YR AGO | 1,000,000 |  | 2,483,333 |  |

| WHLFYRX | TOT SURRENDER <br> VALUE OF POLICIES <br> YR AGO | 500,000 |  | 868,571 |  |
| :---: | :--- | :---: | :--- | :--- | :--- |
| WHOLIFX | TOT SURRENDER <br> VALUE OF POLICIES | 500,000 |  | 973,000 |  |

## 2. Indirectly topcoded

Some income variables that are subject to topcoding are constructed by summing up the values of "lower level" component variables from the MEMI or FMLI file. These variables are not topcoded by the conventional method of replacement with a topcode value. Instead the variables' components are summed normally and the variables are flagged as topcoded if one of their component variables is topcoded.

Following are the income variables that are calculated using values of their component variables. See the descriptions of each variable in the interview data dictionary for a list of component variables.

| Variable | Description |
| :--- | :--- |
| FSMPFRMX, <br> FSMPFRXM | Amount of income or loss received from self-employment income |
| FGOVRETX, <br> FGOVRETM | Amount of government retirement deducted from last pay, annualized for all CU <br> members |
| FINATXEM | Amount of CU income after taxes (Estimated) |
| FINCBTAX, <br> FINCBTXM | Amount of CU income before taxes |
| FINDRETX | Amount of money placed in individual retirement plan |
| FJSSDEDX, <br> FJSSDEDM | Estimated amount of annual Social Security contribution |
| FPRIPENX, <br> FPRIPENM | Amount of private pension fund deducted from last pay, annualized for all CU <br> members |
| FRRDEDX, <br> FRRDEDM | Amount of Railroad Retirement deducted from last pay, annualized for all CU <br> members |
| FSALARYX, <br> FSALARYM | Amount received from wage and salary income before deductions |
| NONINCMX | Amount of other money receipts excluded from family income |

| TOTXEST | Amount of personal taxes paid (Estimated) |
| :--- | :--- |

## Example of indirectly topcoded variable

Here are some examples of indirect topcoding. The value for the variable FSMPFRMX (family income or loss from self-employment) is computed as the sum of the values reported for the variable SEMPFRMX (member income or loss from self-employment) from the MEMI file. SEMPFRMX is subject to topcoding beyond the critical value of $\$ 150,000(-\$ 170,000)$. The topcode value for SEMPFRMX is $\$ 321,846(-\$ 435,000)$. See MEMBER CHARACTERISTICS AND INCOME FILE (MEMI).

|  |  | SEMPFRMX |  | FSMPFRMX |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | AFTER |  | $\begin{gathered} \text { FLAGGED } \\ \text { AS } \end{gathered}$ |
| CU |  | REPORTED | TOPCODING | VALUE | TOPCODED? |
| CU 1: | Member 1 | \$95,000 | \$95,000 | 170,000 | No |
|  | Member 2 | 75,000 | 75,000 |  |  |
| CU 2: | Member 1 | 160,000 | 321,846 | 331,846 | Yes |
|  | Member 2 | 10,000 | 10,000 |  |  |
| CU 3: | Member 1 | 450,000 | 321,846 | 643,692 | Yes |
|  | Member 2 | 350,000 | 321,846 |  |  |
| CU 4: | Member 1 | 300,000 | 321,846 | -113,154 | Yes |
|  | Member 2 | -200,000 | -435,000 |  |  |

While CUs 1 and 2 each originally report $\$ 100,000$ in FSMPFRMX, topcoding is done only on the value reported by MEMI1 of CU2. Thus, the value for FSMPFRMX for CU2 is higher than for CU1 and is flagged as topcoded while CU1 is not. By using the mean of the subset of observations that are above (below) the critical value as the topcode amount, values on the public use data can be either below or above the actual reported value. Note that while CU3 has a topcoded value lower than the reported value, CU2's topcoded SFMFRMX value
$(\$ 331,846)$ is higher than the amount that it reported $(\$ 170,000)$. The case of CU4 demonstrates that the reported value for FSMPFRMX can be positive, while the topcoded value can be negative. The reverse can also occur.

## B. Member Characteristics and Income File (MEMI)

## 1. Direct topcoding

The following table lists the MEMI file variables that are subject to topcoding. The table also shows the critical values and topcode values associated with each variable listed. For multiple imputed income variables, it is possible for an upper topcode value to be less than the upper critical value or for a lower topcode value to be greater than the lower critical value.

| Variable | Description | Upper <br> Critical <br> Value | Lower <br> Critical <br> Value | Upper <br> Topcode <br> Value | Lower <br> Topcode <br> Value |
| :---: | :--- | :---: | :---: | :---: | :---: |
| AGE | Age of member | 82 | 87 |  |  |
| ANGOVRTM | Annual amount <br> government retirement | 10,400 |  | 14,773 |  |
| ANGOVRTX | Annual amount <br> government retirement | 10,400 |  | 14,548 |  |
| ANPRVPNM | Annual amount private <br> pensions | 25,730 |  | 42,591 |  |
| ANPRVPNX | Annual amount private <br> pensions | 25,730 |  | 41,745 |  |
| ANRRDEDM | Annual amount Railroad <br> retirement | 6,500 |  | 7,712 |  |
| ANRRDEDX | Annual amount Railroad <br> retirement | 6,500 |  | 7,712 |  |
| GOVRETX | Government retirement <br> deducted from last pay | 4,100 |  | 17,354 |  |
| GROSPAYX | Amount of last gross pay | 7,764 |  | 23,087 |  |
| INDRETX | Self-employment <br> retirement plan <br> contributions | 42,000 |  | 124,518 |  |
| JSSDEDX | Estimated annual Social <br> Security contribution | 10,465 |  | 17,494 |  |
| JSSDEDXM | Estimated annual Social <br> Security contribution | 10,465 |  | 12,960 |  |
| PRIVPENX | Private pension deducted <br> from last pay | 4,000 |  | 56,539 |  |
| RRRDEDX | Railroad retirement <br> deducted from last pay | 300 |  | 9,125 |  |

| SALARYX | Wage and salary income <br> received before <br> deductions | 160,000 |  | 280,500 |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| SALARYXM | Wage and salary income <br> received before <br> deductions | 160,000 |  | 228,786 |  |
| SEMPFRMM | AMT OF SELF <br> EMPLOYMENT INCOME | 175,000 | $(36,000)$ | 241,175 | $(29,790)$ |
| OR LOSS |  |  |  |  |  | SEMPFRMX | AMT OF SELF |
| :--- |
| EMPLOYMENT INCOME <br> OR LOSS |
| SLFEMPSM |
| Self-employment Social <br> Security contribution |
| SLFEMPSS |
| Self-employment Social <br> Security contribution |

## 2. Special suppression for MEMI file variables

In some scenarios it is possible to deduce revealing information because it is built into a formula. For example, the five MEMI file variables -- AMTFED, GOVRETX, PRIVPENX, RRRDEDX, and SLTAXX -- describe deductions from the most recent pay. These variables are used in conjunction with GROSPAYX (amount of last gross pay) and SALARYXM (annual wage and salary income) to derive ANFEDTX, ANGOVRTX, ANPRVPNX, ANRRDEDX, and ANSLTX, which represent the estimated annual deductions for each of these income deduction categories. The estimated annual Federal income tax deduction from pay is calculated as
(1) ANFEDTXM $=($ SALARYXM (AMTFED/GROSPAYX) $)$.

SALARYXM can be estimated by using the above terms and rearranging such that
(2) SALARYXM = (ANFEDTXM (GROSPAYX/AMTFED)).

In the above example, a problem with disclosure may arise when neither ANFEDTXM, GROSPAYX, nor AMTFED are topcoded, but SALARYXM is. In this situation, the original value of SALARYXM can be recalculated by inserting the non-topcoded values into equation (2) and solving for SALARYXM. To prevent this, the non-topcoded terms in equation (2) will be suppressed (blanked out) and their associated flags will be assigned a value of ' $T$ '.

The following chart describes the specific rules that CE applies to prevent the potential disclosure outlined above.

If SALARYXM is greater than the critical value but ANFEDTXM, GROSPAYX, and AMTFED are not, then the values for ANFEDTXM, GROSPAYX, and AMTFED are suppressed and their flag variables are assigned a value of 'T.'

If SALARYXM is greater than the critical value but ANGOVRTM, GROSPAYX, and GOVRETX are not, then the values for ANGOVRTM, GROSPAYX, and GOVRETX are suppressed and their flag variables are assigned a value of 'T.'

If SALARYXM is greater than the critical value but ANPRVPNM, GROSPAYX, and PRIVPENX are not, then the values for ANPRVPNM, GROSPAYX, and PRIVPENX are suppressed and their flag variables are assigned a value of ' $T$.'

If SALARYXM is greater than the critical value but ANRRDEDM, GROSPAYX, and RRRDEDX are not, then the values for ANRRDEDM, GROSPAYX, and RRRDEDX are suppressed and their flag variables are assigned a value of ' $T$.'

If SALARYXM is greater than the critical value but ANSLTXM, GROSPAYX, and SLTAXX are not, then the values for ANSLTXM, GROSPAYX, and SLTAXX are suppressed and their flag variables are assigned a value of ' $T$.'

The same special suppression for MEMI file variables occurs with the original (pre-income imputation) variables that correspond to the variables noted above (SALARYX, ANFEDTX).

## C. Monthly Expenditure File (MTBI)

The MTBI variable COST is subject to topcoding for some UCCs. The COST variable is not topcoded by the conventional method of replacement with a topcode value. First, variables are topcoded in the EXPN files. Then those variables are mapped to their appropriate UCC. If the variable was topcoded in the EXPN files, then the associated UCC will have a topcoded COST value, and the value of COST_ is set to 'T.' All the EXPN variables that are topcoded are listed in the EXPN section. To obtain the concordance file that lists what EXPN variables are mapped to which UCC, please contact the Consumer Expenditure Survey via the phone number or email address listed on the last page of this documentation.

Note: For some UCCs, multiple topcode values should be expected based on where the original value is mapped from.

## D. Income File (ITBI)

The ITBI variable COST is subject to topcoding for some UCCs. CE does not use the conventional method but topcodes the variable COST with three steps:

1. Topcode variables in the FMLI files.
2. Map topcoded variables to their appropriate UCC.
3. If the variable was topcoded in the FMLI files, the associated UCC will have a topcoded COST value and the value of COST_ is set to ' $T$.'

All topcoded FMLI variables are listed in FMLI section of this documentation. To obtain the concordance file that lists what FMLI variables are mapped to which UCC, contact the Consumer Expenditure Survey.

Note: For some UCCs, multiple topcode values should be expected based on where the original value is mapped from.

## E. Detailed Expenditure Files (EXPN)

CE topcodes the below EXPN file variables. The table also lists the critical values, the associated topcoded values, and the conditions that determine if CE topcodes a variable.

| Variable | Description | Condition | Upper <br> Critical <br> Value | Lower <br> Critical <br> Value | Upper <br> Topcode <br> Value | Lower <br> Topcode <br> Value |

## III. Diary Survey

## A. CU Characteristics and Income File (FMLD)

## 1. Directly topcoded

The following table shows the FMLD file variables that are subject to topcoding and their associated critical values and topcode values. For multiple imputed income variables, it is possible for an upper topcode value to be less than the upper critical value or for a lower topcode value to be greater than the lower critical value.

| Variable | Description | Upper <br> Critical <br> Value | Lower <br> Critical <br> Value | Upper <br> Topcode <br> Value | Lower <br> Topcode <br> Value |  |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| ADDFEDX | Amount of <br> Federal income <br> tax paid in <br> addition to that <br> withheld | 40,000 |  | 137,988 |  |  |
| ADDSTAX | State and local <br> tax paid in <br> addition to that <br> withheld | 10,000 |  | 22,556 |  |  |
| FEDREFX | Amount of refund <br> received from <br> Federal income <br> tax | 9,425 |  | 13,811 |  |  |
| INTRDVX | AMT RECEIVED <br> IN INTEREST <br> LAST 12 MNTHS | 50,000 |  | 147,769 |  |  |
| INTRDVXM | AMT RECEIVED <br> IN INTEREST <br> LAST 12 MNTHS | 50,000 |  | 68,804 |  |  |

| LUMPX | Amount of lump sum receipts | 157,000 |  | 379,571 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| NETRENTM | NET RENTAL INCOME OR LOSS | 130,000 | $(10,000)$ | 214,523 | $(33,497)$ |  |
| NETRENTX | NET RENTAL INCOME OR LOSS | 130,000 | $(10,000)$ | 243,000 | $(58,600)$ |  |
| OCCEXPNX | Amount of payment by CU for occupational expenses | 7,000 |  | 18,765 |  |  |
| OTHINX | Amount received in other money income | 50,000 |  | 121,750 |  |  |
| OTHINXM | Amount received in other money income | 50,000 |  | 70,959 |  |  |
| OTHREGX | AMT INCOME FROM OTHER SOURCES | 35,160 |  | 40,427 |  |  |
| OTHREGXM | AMT INCOME FROM OTHER SOURCES | 35,160 |  | 28,270 |  |  |
| RETSURVM | AMT INCOME FROM RET SURVIVOR DISABILITY | 90,000 |  | 85,536 |  |  |
| RETSURVX | AMT INCOME FROM RET SURVIVOR DISABILITY | 90,000 |  | 119,710 |  |  |
| ROYESTX | AMT INCOME FROM ROYALTY OR ESTATES AND TRUSTS | 120,000 |  | 173,333 |  |  |
| ROYESTXM | AMT INCOME FROM ROYALTY OR ESTATES AND TRUSTS | 120,000 |  | 111,228 |  |  |
| STATREFX | Refund received from state and local income tax | 2,500 |  | 4,153 |  |  |

## 2. Indirectly topcoded

Some income variables that are subject to topcoding are constructed by summing up the values of "lower level" component variables from the MEMD or FMLD. These variables are not topcoded by the conventional method of replacement with a topcode value. Instead the variables' components are summed normally and the variables are flagged as topcoded if one of their component variables is topcoded.

Following are the income variables that are calculated using values of their component variables. See the descriptions of each variable in the diary data dictionary for a list of component variables.

| Variable | Description |
| :--- | :--- |
| FSMPFRXM <br> FSMPFRX1-5 <br> FSMPFRMX | Amount of income received from self-employment income |
| FGVXM, <br> FGVX1-5 <br> FGVX | Amount of government retirement deducted from last pay, annualized for all CU <br> members |
| FINCBEFM <br> FINCBEF1-5 <br> FINCBEFX | Amount of CU income before taxes |
| FIRAX | Amount of money placed in individual retirement plan |
| FJSSDEDM <br> FJSSDED1-5 <br> FJSSDEDX | Estimated amount of annual Social Security contribution |
| FPVTXM <br> FPVTX | Amount of private pension fund deducted from last pay, annualized for all CU <br> members |
| FRRXM FRRX | Amount of Railroad Retirement deducted from last pay, annualized for all CU <br> members |
| FSTATXXM | Amount of State and local income taxes deducted from last pay, annualized for <br> all CU members |
| FSTATXX1-5 |  |
| FSTATXX |  |

For examples see the Interview Survey examples.

## B. Member Characteristics and Income File (MEMD)

The following table lists MEMD file variables that are subject to topcoding. The table also shows the critical values and topcode values associated with each variable listed. For multiple imputed income variables, it is possible for an upper topcode value to be less than the upper critical value or for a lower topcode value to be greater than the lower critical value.

| Variable | Description | Upper <br> Critical <br> Value | Lower <br> Critical <br> Value | Upper <br> Topcode <br> Value | Lower <br> Topcode <br> Value |
| :--- | :--- | :--- | :--- | :--- | :--- |
| AGE | Age of member | 82 |  | 87 |  |
| ANFEDTXM | Annual amount <br> federal tax <br> deducted from pay | 24,686 |  | 40,712 |  |
| ANFEDTXX | Annual amount <br> federal tax <br> deducted from pay | 24,686 |  | 40,712 |  |
| ANGVX | Annual amount <br> government <br> retirement | 10,400 |  | 14,604 |  |
| ANGVXM | Annual amount <br> government <br> retirement | 10,400 |  | 14,426 |  |
| ANPVTX | Annual amount <br> private pensions | 25,730 |  | 39,344 |  |
| ANPVTXM | Annual amount <br> private pensions | 25,730 |  | 40,786 |  |
| ANSTATXM | Annual amount <br> state and local <br> income tax | 9,264 |  | 13,162 |  |
| ANSTATXX | Annual amount <br> state and local <br> income tax | 9,264 |  | 13,162 |  |
| FEDTXX | Amount of federal <br> tax deducted from <br> last pay | 1,200 | 22,530 |  |  |
| GROSPAYX | Amount of last <br> gross pay | 7,764 | 2,572 |  |  |

| GVX | Government retirement deducted from last pay | 2,400 |  | 18,890 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| IRAX | Self-employment retirement plan contributions | 42,000 |  | 78,926 |  |
| JSSDEDX | Estimated annual Social Security contribution | 10,465 |  | 16,466 |  |
| JSSDEDXM | Estimated annual Social Security contribution | 10,465 |  | 11,818 |  |
| PVTX | Private pension deducted from last pay | 4,000 |  | 13,729 |  |
| SEMPFRMM | AMT OF SELF EMPLOYMENT INCOME OR LOSS | 200,000 | $(12,246)$ | 182,770 | $(14,714)$ |
| SEMPFRMX | AMT OF SELF EMPLOYMENT INCOME OR LOSS | 200,000 | $(12,246)$ | 392,933 | $(27,000)$ |
| SLFEMPSM | Self-employment Social Security contribution | 24,844 |  | 26,537 |  |
| SLFEMPSS | Self-employment Social Security contribution | 24,844 |  | 28,061 |  |
| STATXX | State and local income tax deducted last pay | 477 |  | 821 |  |
| WAGEX | Wage and salary income received before deductions | 160,000 |  | 246,332 |  |
| WAGEXM | Wage and salary income received before deductions | 160,000 |  | 194,331 |  |

## Special suppression for MEMD file variables

The five MEMD file variables-FEDTXX, GVX, PVTX, RRX, and STATXX—describe deductions from the most recent pay. These variables are used in conjunction with GROSPAYX (amount of last gross pay) and WAGEXM (annual wage and salary income) to derive ANFEDTXM, ANGVXM, ANPVTXM, ANRRXM, and ANSTATXM, which represent the estimated annual deductions for each of these income deduction categories. For example, the estimated annual Federal income tax deduction from pay is calculated as

ANFEDTXM $=($ WAGEXM (FEDTXX/GROSPAYX) $)$.

Note that WAGEX can be estimated by using the above terms and rearranging such that
(2) $\quad$ WAGEXM $=($ ANFEDTXM $(G R O S P A Y X / F E D T X X))$.

In the above example, a problem with disclosure may arise when neither ANFEDTXM, GROSPAYX, nor FEDTXX (calculation components) are topcoded, but WAGEXM is. In this situation WAGEXM can be recalculated to obtain its original value by inserting the non-topcoded values into equation (2) and solving it. In order to prevent this, the non-topcoded terms in equation (2) will be suppressed (blanked out) and their associated flags will be assigned a value of ' $T$.'

The following chart describes in detail the specific rules that are applied to prevent the potential disclosure outlined above.

- If WAGEXM is greater than the critical value but ANFEDTXM, GROSPAYX, and FEDTXX are not, then the values for ANFEDTXM, GROSPAYX, and FEDTXX are suppressed and their flag variables are assigned a value of ' $T$.'
- If WAGEXM is greater than the critical value but ANGVXM, GROSPAYX, and GVX are not, then the values for ANGVXM, GROSPAYX, and GVX are suppressed and their flag variables assigned a value of 'T.'
- If WAGEXM is greater than the critical value but ANPVTXM, GROSPAYX, and PVTX are not, then the values for ANPVTXM, GROSPAYX, and PVTX are suppressed and their flag variables assigned a value of ' $T$.'
- If WAGEXM is greater than the critical value but ANRRXM, GROSPAYX, and RRX are not, then the values for ANRRXM, GROSPAYX, and RRX are suppressed and their flag variables assigned a value of 'T.'
- If WAGEXM is greater than the critical value but ANSTATXM, GROSPAYX, and STATXX are not, then the values for ANSTATXM, GROSPAYX, and STATXX are suppressed and their flag variables assigned a value of ' $T$.'

The same special suppression for MEMD file variables occurs with the original (pre-income imputation) variables that correspond to the variables noted above (WAGEX, ANFEDTXX, etc.).

## C. Detailed Expenditure File (EXPD)

The following table lists UCCs for which the EXPD variable COST is subject to topcoding as well as their associated critical values and topcode values (rounded to the nearest dollar). If the value of COST is greater (less) than the designated critical values for the above UCCs, COST is set to the topcode value and the associated flag variable, COST_, is set to 'T.'

| Variable | Description | 2015 <br> Upper Critical Value | 2015 <br> Lower Critical Value | 2015 <br> Upper Topcode Value | 2015 Lower Topcode Value |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 001000 | Purchase price of stocks, bonds, mutual funds | 337 |  | 751 |  |
| 009000 | Mortgage payment including coop | 3,100 |  | 6,405 |  |
| 210110 | Rent of dwelling | 2,311 |  | 3,076 |  |
| 210210 | Lodging away from home | 557 |  | 630 |  |
| 210310 | Housing for someone at school | - |  | 280 |  |
| 550320 | Purchase of medical equipment for general use | 88 |  | 1,732 |  |
| 550330 | Purchase of supportive/convalescent medical equipment | 603 |  | 768 |  |
| 560110 | Physicians' services | 244 |  | 612 |  |
| 560210 | Dental services | 1,712 |  | 3,432 |  |
| 560310 | Eyecare services | 800 |  | 1,176 |  |
| 560330 | Lab tests, x-rays | 304 |  | 901 |  |
| 560400 | Serv by pros oth than physicians | 300 |  | 684 |  |
| 570000 | Hospital care, not specified | 1,622 |  | 24,395 |  |
| 570230 | Other medical care service | - |  | 595 |  |
| 570901 | Rental of medical equipment | 58 |  | 875 |  |

## D. Income File (DTBD)

The DTBD variable AMOUNT is subject to topcoding for some UCCs. The AMOUNT variable is not topcoded by the conventional method of replacement with a topcode value. First, variables are topcoded in the FMLD files. Then those variables are mapped to their appropriate UCC. If the variable was topcoded in the FMLD files, then the associated UCC will have a topcoded

AMOUNT value, and the value of AMOUNT_ is set to 'T.' All the FMLD variables that are topcoded are listed in Section IV, A of this documentation. To obtain the concordance file that lists what FMLD variables are mapped to which UCC, please contact the Consumer Expenditure Survey via the phone number or email address listed on the last page of this documentation.

Note: For some UCCs multiple topcode values should be expected based on where the original value is mapped from.
