Survey Comparisons
Comparisons to Other Surveys: Similar Question Topics, but Different Approaches

Research questions:

- Who received stimulus checks?
- How were the stimulus checks used – to spend, pay down/off debt, or save?

Independent data collection efforts produced results with noticeable differences possibly driven by differences in:

- Field period (e.g., early, mid, late pandemic)
- Sample size/sampling error
- Nonresponse bias and/or selection effects
- Question wording (e.g., “increase” vs. simply “spend”)
- Recall period (e.g., last week, last month, etc.)
Comparison Surveys

- Nielsen Homescan Panel (Nielsen)
- University of Michigan Survey of Consumers (Michigan)
