CONSUMER PRICE MOVEMENTS

JULY 2010

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.3 percent in July on a seasonally adjusted basis, the U.S. Bureau of Labor Statistics reported today. (Before seasonal adjustment, the all items index was unchanged for the month.) Over the last 12 months, the index increased 1.2 percent before seasonal adjustment.

The energy index posted its first increase since January and accounted for over two thirds of the seasonally adjusted all items increase. Both the gasoline and household energy indexes turned up in July after a series of declines. The food index, in contrast, declined in July, largely due to the fourth consecutive decline in the fruits and vegetables index.

The index for all items less food and energy rose 0.1 percent in July after increasing 0.2 percent in June. The indexes for shelter, apparel, used cars and trucks, and tobacco all continued to increase in July. In contrast, the indexes for medical care and recreation turned down in July and the indexes for airline fares and household furnishings and operations continued to decline. The 12-month change in the index for all items less food and energy remained at 0.9 percent for the fourth month in a row.

Consumer Price Index Data for July 2010

Food

The food index fell 0.1 percent in July after being unchanged in each of the two previous months. The index for food away from home was unchanged in July after rising 0.1 percent in June. The food at home index declined 0.1 percent, the same decrease as last month. The index for fruits and vegetables fell sharply, declining 1.9 percent after falling 1.3 percent the previous month, and the index for cereals and bakery products fell 0.3 percent. These declines more than offset increases in the other four grocery store food groups. The index for nonalcoholic beverages rose 0.6 percent after falling in each of the previous two months, and the index for dairy and related products rose 0.5 percent. The index for meats, poultry, fish, and eggs, rose 0.3 percent, its seventh consecutive increase, and the index for other food at home advanced 0.2 percent. The food index now has risen 0.9 percent over the last 12 months, with the food at home index up 0.7 percent. The indexes for fruits and vegetables, cereals and bakery products, and nonalcoholic beverages have declined over the past 12 months; the other grocery store food groups have posted increases.

Energy

The energy index rose 2.6 percent in July after falling 2.9 percent in June. The gasoline index rose in July, increasing 4.6 percent after declining in each of the previous five months. (Before seasonal adjustment, gasoline prices fell 0.1 percent in July.) The household energy index, which fell 1.6 percent in June, rose 0.6 percent in July. The index for natural gas rose 1.7 percent after increasing 0.6 percent last month, and the electricity index turned up, increasing 0.5 percent after a 2.2 percent decline in June. These increases more than offset a 1.6 percent decline in the fuel oil index. The energy index has increased 5.2 percent over the last 12 months. The gasoline index has risen 7.4 percent over the last 12 months, with the index for household energy up 2.5 percent.

All items less food and energy

The index for all items less food and energy rose 0.1 percent in July after rising 0.2 percent in June. The shelter index rose 0.1 percent in July, the third consecutive such increase. Within the shelter component, the indexes for both rent and owners' equivalent rent repeated their June increases of 0.1 percent, while the index for lodging away from home increased 0.2 percent. The apparel index rose 0.6 percent in July after increasing 0.8 percent in June. The index for used cars and trucks rose 0.8 percent in July following a 0.9 percent increase in June. The index for new vehicles rose 0.1 percent in July, the same increase as in the previous two months. The index for tobacco increased 1.6 percent in July, its third straight increase of at least one percent. A number of indexes declined in July. The index for airline fares decreased 1.2 percent after a 0.6 percent decline in June, and the household furnishings and operations index fell 0.1 percent in July after a 0.4 percent June decline. The medical care index, which rose 0.3 percent in June, fell 0.1 percent in July as the indexes for prescription drugs, nonprescription drugs, and hospital services all declined. The recreation index also turned down in July, falling 0.1 percent.

Over the last 12 months, the index for all items less food and energy has risen 0.9 percent. Indexes that have increased over that time period include used cars and trucks (17.0 percent), medical care (3.2 percent), airline fares (10.2 percent) and tobacco (7.4 percent). In contrast, the shelter index has fallen 0.7 percent, the index for household furnishings and operations has declined 3.1 percent, and the indexes for recreation and for apparel have declined 0.8 percent and 0.3 percent, respectively.

Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 1.2 percent over the last 12 months to an index level of 218.011 (1982-84=100). For the month, the index was unchanged prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 1.6 percent over the last 12 months to an index level of 213.898 (1982-84=100). For the month, the index was unchanged prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 1.0 percent over the last 12 months. For the month, the index was unchanged on a not seasonally adjusted basis. Please note that the indexes for the post-2008 period are subject to revision.

The Consumer Price Index for August 2010 is scheduled to be released on Friday, September 17, 2010, at 8:30 a.m. (EDT).

CPI-U 12-Month Changes, 2000 to Present

The Use of the CPI in Adjusting Federal Income Tax Brackets and other Federal Tax Parameters

More than 140 million individual federal tax returns are filed each year.^[1] Federal income tax brackets, as well as personal exemption amounts, standard deduction amounts, and other tax parameters, are adjusted each year by changes in the Consumer Price Index (CPI).

Before 1985, federal income tax brackets were not indexed to changes in the cost of living. As such, inflation eroded a family's purchasing power in multiple ways. First, families whose income did not keep up with inflation saw their real incomes fall. Second, even families whose pre-tax income kept pace with inflation were subject to reductions in real disposable income, as nominal increases in income forced taxpayers into higher tax brackets. For example, suppose a family's cost of living rose 5 percent in a year, as did its income. At first glance, the real income of this family has not changed, as its income has kept up with inflation. However, before 1985, the increase in the nominal income of this family would have resulted in higher federal income taxes, as more of the family's income would have been subject to the highest applicable tax bracket. This type of subtle tax increase is known as bracket creep. The Economic Recovery Tax Act (ERTA) of 1981 was passed, in part, to prevent bracket creep from adversely affecting American taxpayers.

Because of ERTA, and modifications made to that act in 1986, federal income tax brackets, as well as personal exemptions and standard deductions, are now tied to changes in the average CPI for All Urban Consumers (CPI-U) for the U.S. City Average for All items for the 12-month period ending in August of each year.

How the CPI-U affects federal income tax brackets

To see how the all items CPI-U affects federal income tax brackets, first take a look at the federal income tax brackets for 2008 for a married couple filing jointly. (See table 1.)

Table 1. Federal income tax brackets, married filing jointly, 2008 tax year	
Marginal tax rate (in percent)	Tax brackets
10	Under \$16,050
15	\$16,051–\$65,100
25	\$65,101–\$131,450
28	\$131,451–\$200,300
33	\$200,301–\$357,700
35	Over \$357,700

To determine the 2009 federal income tax brackets, the Internal Revenue Service (IRS) looked at the average CPI-U from September 2007 through August 2008, and compared that average with the one for the preceding 12 months. For the 12 months ending in August 2007, the average CPI-U was 204.873. For the 12 months ending August 2008, the average CPI-U was 213.605, an increase of 4.26 percent. Therefore, each of the individual federal income tax brackets for 2009 was adjusted upwards by approximately 4.26 percent.^[2] (See table 2.)

Table 2. Federal income tax brackets, married filing jointly, 2009 tax year	
Marginal tax rate (in percent)	Tax brackets
10	Under \$16,700
15	\$16,701–\$67,900
25	\$67,901–\$137,050
28	\$137,051–\$208,850
33	\$208,851–\$372,950
35	Over \$372,950

CPI data were used in the same way to estimate the federal income tax brackets for 2010. The CPI-U for the 12 months ending in August 2009 was 214.002, which was only 0.19 percent higher than the previous annual average of 213.605. This resulted in only very slight increases in these tax brackets for 2010. (See table 3.)

Table 3. Federal income tax brackets, married filing jointly, 2010 tax year	
Marginal tax rate (in percent)	Tax brackets
10	Under \$16,750
15	\$16,751–\$68,000
25	\$68,001–\$137,300
28	\$137,301–\$209,250
33	\$209,251–\$373,650
35	Over \$373,650

Again, tying changes in the tax brackets to the CPI has the effect of preventing taxpayers from being moved into higher marginal tax brackets for increases in income that do not exceed inflation. Similarly, this legislation has the effect of reducing taxes over time for families on a fixed income. For example, if a family made a constant \$67,000 in 2008, 2009, and 2010, their real income has fallen because their income has not kept pace with inflation. Since tax brackets are tied to the CPI, the federal tax burden for this family actually fell from 2008 to 2010, and its marginal tax rates dropped from 25 percent in 2008 to 15 percent in 2010.

How the CPI-U affects standard deduction amounts and personal exemption amounts

Taxpayers who do not itemize can instead use a "standard deduction" amount to reduce the amount of income subject to federal tax. Similarly, "personal exemption" amounts can be deducted for each eligible member of the taxpayer's family. Similarly to the federal tax brackets, these federal tax parameters are also tied to annual changes in the CPI-U for each 12-month period ending in August. (See table 4.)

Table 4. Standard deduction and personal exemption amounts		
Tax year	Standard deduction amount	Personal exemption amount
2008	\$10,900	\$3,500
2009	11,400	3,650
2010	11,400	3,650

Note that, as with the tax brackets, the increase in standard deduction and personal exemption amounts rose more than four percent from 2008 to 2009. However, since the annual average CPI-U rose less than 0.2 percent for the next 12-month period, the standard deduction and personal exemption amounts (after rounding down to the next \$50 amount), remained unchanged from 2009 to 2010.

Current Price Trends: Decline in Energy Prices Dominates Second Quarter Retail Inflation Picture

All items

The all items Consumer Price Index for All Urban Consumers (CPI-U) declined at a 1.5-percent seasonally adjusted annual rate (SAAR) during the second quarter of 2010.^[3] For the first 6 months of 2010, the index has declined at a 0.3-percent SAAR. This compares with an increase of 2.7 percent in 2009. (See chart 1.)

Chart 1. CPI-U percent changes for all items, food, energy, and all items less food and energy for 2009, and first and second quarters, 2010

A downturn in the energy index is the main cause of the decline in the all items index thus far in 2010, but a deceleration in the index for all items less food and energy in the first quarter of the year is notable as well. The energy index rose significantly in 2009 but has declined so far in 2010. The index for all items less food and energy has risen so far in 2010, but at a rate lower than recent historical norms. In contrast, the food index has risen modestly in 2010 after declining in 2009.

Energy

Energy, typically, has been the most volatile of the major CPI components. It declined at a 25.7-percent SAAR in the second quarter of 2010 after rising at a 9.2-percent rate in the first quarter. (The monthly index has actually been declining since January.) For the first 6 months of 2010, the energy index has declined at a 9.9-percent SAAR after increasing 18.2 percent in 2009.

Within the energy component, the gasoline index fell at a 38.9-percent SAAR in the second quarter of 2010. This decline followed an increase at an 8.6-percent rate in the first quarter and a 53.5-percent rise over all of 2009. Sharp changes in gasoline prices are often a major factor in short-term CPI movements. Over the past few years, crude oil prices—and subsequently retail gasoline prices—have been quite volatile. From July 2007 to July 2008, gasoline prices rose sharply, increasing 37.9 percent; crude oil prices peaked in July 2008 at more than \$134 a barrel. During the last 5 months of 2008, as crude oil prices collapsed to under \$32 a barrel,

retail gasoline prices fell by more than 50 percent. In 2009, pump prices turned sharply higher again, increasing more than 50 percent, with crude oil prices increasing to around \$70 by the end of 2009.^[4]

The household energy index also turned down in the second quarter of 2010, falling at a 10.1-percent rate after rising at an 8.9-percent rate in the first quarter. All the major components of household energy declined in the second quarter after rising in the first. The sharpest downturn was in the natural gas index, which declined at a 17.7-percent SAAR in the second quarter after rising at a 29.8-percent annual rate in the first quarter. The electricity index turned down as well, falling at a 7.1-percent SAAR in the second quarter of 2010 after rising at a 2.0-percent rate in the first quarter. For 2010 so far, the natural gas index has risen at a 3.4-percent annual rate after falling 18.1 percent in 2009, while the electricity index has fallen at a 2.7-percent rate after falling 0.5 percent in 2009. The fuel oil index fell at an 8.9-percent rate in the second quarter after rising at an 18.2-percent rate in the first.

Food

Food prices rose at a 0.6-percent SAAR in the second quarter of 2010 after rising at a 2.3-percent rate in the first quarter. The food index had declined 0.5 percent in 2009. Grocery store food prices, which rose at a 3.7-percent rate in the first quarter, were flat in the second quarter.^[5] Of the six major grocery store food groups, only the meats, poultry, fish, and eggs group increased in second quarter. It rose at a 12.0-percent rate after rising at a 4.1-percent rate in the first quarter. Within this group, the beef and veal index (22.2 percent SAAR) and the pork index (16.6 percent SAAR) increased most rapidly. The other food at home groups posted declines, with fruits and vegetables falling the sharpest, at a 9.9-percent rate. The indexes for fresh fruits (at -16.9 percent SAAR) and fresh vegetables (at -9.0 percent SAAR) both declined sharply in the second quarter. Part of the decrease in the fresh vegetables index can be attributed to tomato prices, which dropped sharply in the second quarter after rising sharply in the first.

The other grocery store food groups decreased more modestly in the second quarter. Cereals and bakery products fell at the same 2.8-percent SAAR in the second quarter as it did in the first. Dairy and related products fell at a 1.7-percent rate after rising in each of the previous two quarters. The Nonalcoholic beverages index declined at a 2.6-percent rate, its fifth consecutive quarterly decline. Other food at home fell at a 0.5-percent SAAR in the second quarter.

Food away from home rose at a 1.4-percent rate in the second quarter after rising at a 0.4-percent rate in the first. It has risen just 1.2 percent over the past year after rising at an average 3.6-percent rate over the previous 5 years.

Grocery store prices have risen in 2010 after falling through much of 2009, but the current rate of increase is still below the recent historical average. From November 2002 to November 2007, grocery store food prices rose at a 3.1-percent average annual rate. They then accelerated, increasing 7.0 percent from November 2007 to November 2008. In the next 12 months, however, the index turned down, falling 2.9 percent, the sharpest annual drop since June 1959. Since then, the food at home index has risen at a 2.0-percent rate (seasonally adjusted). Currently none of the six major grocery store food groups have increased or decreased more than 2.0 percent over the last 12 months.

All items less food and energy

The index for all items less food and energy rose at a 1.3-percent rate in the second quarter of 2010 after falling at a 0.2-percent annual rate in the first quarter. Much of the reversal can be attributed to the shelter index, which rose at a 0.9-percent rate in the second quarter after falling at a 2.2-percent rate in the first. Within shelter, rent rose at a 0.4-percent SAAR in the second quarter and owners' equivalent rent rose at a 0.3-percent rate. Lodging away from home rose at a 23.1-percent rate after falling in the first quarter.

Several other indexes turned up in the second quarter as well. The sharpest upturn was the airline fare index, which rose at a 14.3-percent rate in the second quarter after declining at a 10.9-percent rate in the first. Similarly, the new vehicles index turned up in the second quarter, rising at a 0.4-percent rate after declining at a 1.2-percent rate in the first. Apparel, down at a 4.5-percent rate in the first quarter, rose at a 1.3-percent rate in the second, and Recreation rose at a 1.4-percent rate in the second quarter after falling at a 1.0-percent rate in the first.

Household furnishings and operations continued to decline in the second quarter of 2010, falling at the same 3.7-percent rate as it did in the first quarter, and the index for communication turned down, falling at a 1.3-percent rate after rising slightly in the first quarter. Used cars and trucks, which rose at an 11.4-percent SAAR in the first quarter, continued to advance in the second quarter but decelerated, rising at a 6.6-percent rate. The medical care index also decelerated in the second quarter, rising at a 2.3-percent rate after increasing at a 5.7-percent rate in the first. In contrast, the tobacco index accelerated in the second quarter, rising at a 9.9-percent rate after increasing at 1.8-percent rate in the first.

The rate of inflation for all items less food and energy has slowed recently. For the 5-year period from August 2003 to August 2008, the index for all items less food and energy increased at a 2.3-percent annual rate. (A very similar result holds if the period is extended back 10 or 15 years.) Since August 2008, however, the average annualized increase has fallen by nearly half, to 1.2 percent. (See chart 2.)

Much of this slower rate of inflation for the all items less food and energy index is attributable to the slowdown in the index for shelter, which is heavily weighted in the CPI. After increasing at a 3.0-percent average rate for the August 2003–08 period, the shelter index has risen at only a 0.2-percent annual rate since. Other indexes have decelerated as well, however, including airline fares and household furnishings and operations, which both turned down, as well as recreation, education, and medical care.

In contrast, some indexes within all items less food and energy actually accelerated recently. These include the tobacco index, which has risen sharply of late, in part due to excise tax increases, and the indexes for new vehicles and for used cars, which have both turned up after declining in the earlier period. Table 5 compares the changes of selected categories within all items less food and energy for the August 2003–August 2008 and August 2008–June 2010 periods.

Price movements described in this text reflect data as released on July 16, 2010. All 12-month and longer percent changes reflect not seasonally adjusted data except as noted. Percent changes covering less than a year are based on seasonally adjusted annual rates, unless otherwise noted. CPI seasonally adjusted indexes and percent changes are subject to annual revision.

Further information is available from the [CPI Information and Analysis section](#), at cpi_info@bls.gov or (202) 691-7000.

Notes

¹ See <http://www.irs.gov/pub/irs-soi/10winbulindincrtpre.pdf> (visited July 28, 2010).

² More precisely, each annual average is compared to an earlier initial base period, and the resulting numbers are rounded down to the next \$50.

³ Energy Information Administration; see http://tonto.eia.doe.gov/dnav/pet/pet_pri_wco_k_w.htm (visited July 28, 2010).

⁴ The six major grocery store food groups are: Cereals and bakery products; Meats, poultry, fish and eggs; Dairy and related products; Fruits and vegetables-Nonalcoholic beverages and beverage materials; Other food at home.

¹ Not seasonally adjusted.

² Indexes on a December 1997=100 base.

³ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁴ Indexes on a December 1984=100 base

⁵ Indexes on a December 1988=100 base.

⁶ Indexes on a December 2007=100 base.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ See region and area size on Table 10 for information about cross classifications.

² Indexes on a December 1997=100 base.

³ The 'All items' index size B/C is on a December 1996=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁵ Indexes on a December 1982=100 base.

⁶ Special index based on a substantially smaller sample.

⁷ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1997=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 2 (see Table 10) will appear next month.

² For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.

³ For Washington-Baltimore, index is on a November 1996=100 base.

⁴ For Washington-Baltimore, index is on a November 1997=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁶ Indexes on a December 1982=100 base.

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

⁹ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 2 (see Table 10) will appear next month.

² For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.

³ For Washington-Baltimore, index is on a November 1996=100 base.

⁴ For Washington-Baltimore, index is on a November 1997=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁶ Indexes on a December 1984=100 base.

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

⁹ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Special index based on a substantially smaller sample.

² Indexes on a December 1997=100 base.

³ Indexes on a December 2007=100 base.

⁴ Indexes on a December 2005=100 base.

⁵ This index series was calculated using a Laspeyres estimator.

All other item stratum index series were calculated using a geometric means estimator.

⁶ Indexes on a December 1982=100 base.

⁷ Indexes on a December 1986=100 base.

⁸ Indexes on a December 1983=100 base.

⁹ Indexes on a December 1990=100 base.

¹⁰ Indexes on a December 2001=100 base.

¹¹ Indexes on a December 1993=100 base.

¹² Indexes on a December 2009=100 base.

¹³ Indexes on a December 1996=100 base.

¹⁴ Indexes on a December 1988=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Nondurables	3.4	2.5	5.1	4.1	2.6	8.2	-5.6	7.8	.8
Apparel less footwear	-2.2	-1.5	-.5	-1.9	1.2	-.4	-1.6	1.2	-4.1
Services less rent of shelter	3.5	3.6	3.4	5.3	2.1	3.3	4.4	1.4	2.4

See footnotes at end of table.

Table 29. Historical Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W): U.S. city average, by commodity and service group and detailed expenditure categories-Continued

Item and group	Percent change from previous December								
	December								July 2010
	2002	2003	2004	2005	2006	2007	2008	2009	
Special aggregate indexes									
Services less medical care services	3.1	2.7	2.8	3.9	3.2	3.0	3.2	0.7	1.1
Energy	11.5	6.9	16.9	17.0	3.0	18.1	-22.6	20.0	5.1
All items less energy	1.7	1.2	2.2	2.0	2.4	2.8	2.4	1.7	.6
All items less food and energy	1.7	.7	2.1	2.0	2.5	2.3	1.7	2.2	.5
Commodities less food and energy commodities	-1.7	-3.1	.9	.4	.0	.3	-.8	4.0	.0
Energy commodities	23.8	6.9	26.7	16.7	6.0	29.6	-40.9	47.5	4.1
Services less energy services	3.5	2.5	2.7	2.8	3.6	3.3	2.8	1.5	.8
Domestically produced farm food8	5.6	2.6	1.2	1.1	6.0	6.5	-2.8	1.1
Utilities and public transportation	1.4	3.2	3.2	9.0	.9	3.3	5.1	-1.0	3.4

¹ This index series was calculated using a Laspeyres estimator.
All other item stratum index series were calculated using a geometric means estimator.

² Special index based on a substantially smaller sample.

³ Indexes on a December 2009=100 base.

⁴ Indexes on a December 2005=100 base.

⁵ Indexes on a December 2007=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 30. Consumer Price Index for All Urban Consumers (CPI-U): Selected areas, semiannual averages, all items index

(1982-84=100, unless otherwise noted)

Area	All items						
	Semiannual average indexes				Percent change from preceding semiannual average

¹ For Phoenix-Mesa, indexes are on a December 2001=100 base.

² Indexes on a 1987=100 base.

³ For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.

⁴ For Washington-Baltimore, index is on a November 1996=100 base.

⁵ Index is on a November 1977=100 base in Miami and an October 1967=100 base in Anchorage.

⁶ For Washington-Baltimore, index is on a November 1997=100 base.

⁷ Indexes are on a November 1982=100 base in Anchorage, Boston, Cincinnati,

Denver, Miami, Milwaukee, Portland, St. Louis, San Diego, and Seattle. Indexes are on a December 1982=100 base in Atlanta, Chicago, Cleveland, Dallas, Detroit, Honolulu, Houston, Kansas City, Los Angeles, Minneapolis, New York, Philadelphia, Pittsburgh, and San Francisco.

⁸ Special index based on a substantially smaller sample.

⁹ Indexes on a December 1993=100 base.

¹⁰ Indexes on a December 1997=100 base.

- Data not available.

¹ For Phoenix-Mesa, indexes are on a December 2001=100 base.

² Indexes on a 1987=100 base.

³ For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.

⁴ For Washington-Baltimore, index is on a November 1996=100 base.

⁵ Index is on a November 1977=100 base in Miami and an October 1967=100 base in Anchorage.

⁶ For Washington-Baltimore, index is on a November 1997=100 base.

⁷ Indexes are on a November 1984=100 base in Anchorage, Boston, Cincinnati,

Denver, Miami, Milwaukee, Portland, St. Louis, San Diego, and Seattle. Indexes are on a December 1984=100 base in Atlanta, Chicago, Cleveland, Dallas, Detroit, Honolulu, Houston, Kansas City, Los Angeles, Minneapolis, New York, Philadelphia, Pittsburgh, and San Francisco.

⁸ Special index based on a substantially smaller sample.

⁹ Indexes on a December 1993=100 base.

¹⁰ Indexes on a December 1997=100 base.

Nondurables	3.0	-2.0	2.7	2.1	4.2	4.2	2.3	7.1	-3.9	8.1	.5
All items less food and energy	1.9	2.2	1.6	.8	2.3	1.8	2.2	2.0	1.7	1.4	.4
Energy	12.6	-12.7	10.5	7.2	15.5	15.0	2.3	17.6	-21.3	22.8	4.7

Indexes for 2010 are initial estimates. Indexes for 2009 are interim adjustments. Indexes for 2008 and earlier are final.

NOTE: Index applies to a month as a whole, not to any specific date.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The U.S. Bureau of Labor Statistics (BLS) publishes CPIs for two population groups: (1) The CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 32 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include, in addition to wage earner and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPIs are based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained through personal visits or telephone calls by BLS trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes also are published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 27 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. It is important to note that the CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and is subject to two annual revisions.

The index measures price change from a designated reference date. For the CPI-U and the CPI-W, the reference base is 1982–84 = 100.0. The reference base for the C-CPI-U is December 1999=100.0. An increase of 16.5 percent from the reference base, for example, is shown as 116.5. This change also can be expressed in dollars as follows: the price of a base-period market basket of goods and services in the CPI has risen from \$10 in 1982–84 to \$11.65.

For further details, visit the CPI homepage on the Internet at <https://www.bls.gov/cpi> or contact our **CI** Information and Analysis Section at (202) 691-7000.

Calculating index changes

Movements of the indexes from one month to another usually are expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example shown in the box on this page illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index point change

CPI	202.416
Less previous index	201.800
Equals index point change	.616

Percent change

Index point difference	.616
Divided by the previous index	201.800
Equals	0.003
Results multiplied by one hundred	0.003×100
Equals percent change	0.3

Regions defined

The states in the four regions are listed below.

The Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New York, New Jersey, Pennsylvania, Rhode Island, and Vermont.

The Midwest--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

The South--Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia.

The West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Energy prices

Prices usually are available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI not only are for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.* The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than 1 gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, miniservice, and self-service gas stations. Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTUs (U.S. Department of Energy)

1 kwh = 3,412 BTUs (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTUs (U.S. Department of Energy)

Food and beverage prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help to satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary

disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. For cases in which the proportion of estimated prices used to calculate the average is considered too high, the average price is not published, and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. Detailed specifications are available from BLS information offices or from the Washington office, upon request.

Seasonally adjusted and unadjusted data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year--such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. Seasonally adjusted indexes and seasonal factors are computed annually. Each year, the last 5 years of seasonally adjusted data are revised. Data from January 2005 through December 2009 were replaced in January 2010. Exceptions to the usual revision schedule were: the updated seasonal data at the end of 1977 replaced data from 1967 through 1977; and, in January 2002, dependently seasonally adjusted series were revised for January 1987-December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, please see "Aggregation of Dependently Adjusted Seasonally Adjusted Series," in the October 2001 issue of the [CPI Detailed Report](#).

The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes will be used before that period. Note: 46 of the 73 components are seasonally adjusted for 2010.

Seasonally adjusted data, including the all items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

For the seasonal factors introduced in January 2010, BLS adjusted 30 series using Intervention Analysis Seasonal Adjustment, including selected food and beverage items, motor fuels, electricity and vehicles. For example, this procedure was used for the Motor fuel series to offset the effects of events such as damage to oil refineries from Hurricane Katrina.

For a complete list of Intervention Analysis Seasonal Adjustment series and explanations, please refer to the article "Intervention Analysis Seasonal Adjustment", located on our website at <https://www.bls.gov/cpi/cpisapage.htm>

For additional information on seasonal adjustment in the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or contact David Levin at (202) 691-6968, or by e-mail at Levin.David@bls.gov. If you have general questions about the CPI, please call our information staff at (202) 691-7000.

Metropolitan areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for an additional 11 metropolitan areas are published every other month [on an odd- (January, March, etc.) or even- (February, April, and so forth) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-	
NH -ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even
Philadelphia-Wilmington	
-Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland	
-San Jose, CA	-even
Seattle-Tacoma-Bremerton,	
WA	-even
Washington-Baltimore,	
DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 13 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Phoenix-Mesa, AZ
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

CPI information is available from BLS electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists also are available in the national and information offices to provide help and to respond to questions.

Electronic access to CPI data

[BLS on the Internet](#). Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI, is accessible.

World Wide Web. BLS maintains a Web site at <https://www.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <https://www.bls.gov/cpi/> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI program handles special items, such as medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to the regional office home pages from the main BLS Web site listed above.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information may be obtained by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data also may be obtained by calling any one of the metropolitan area CPI hotlines listed next. These hotline summaries typically include data for the U.S. city average, as well as for the specified area. The recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

<i>Area</i>	<i>Hotline number</i>
Anchorage	(907) 271-2770
Atlanta	(404) 893-4222
Baltimore	(410) 962-4898
Boston	(617) 565-2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(816) 285-7000
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(214) 767-6970
Indianapolis	(317) 226-7885
Kansas City	(816) 285-7000
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579

Philadelphia	(215) 656-3948
Phoenix-Mesa	(480) 503-9075
Pittsburgh	(412) 644-2900
Portland	(503) 326-5818
San Diego	(619) 557-6538
San Francisco	(415) 625-2270
Seattle	(206) 553-0645
St. Louis	(816) 285-7000
Washington, DC	(202) 691-6994

Other sources of CPI data

Fax-on-Demand. This fax service has been discontinued as of April 27, 2007.

Technical information may be obtained during normal working hours, Monday through Friday, by calling the Washington, DC national office at (202) 691-7000 or any of the information offices listed below.

<i>Office</i>	<i>Telephone</i>
Atlanta	(404) 331-3415
Boston	(617) 565-2327
Chicago	(312) 353-1880
Dallas	(214) 767-6970
Kansas City	(816) 285-7000
New York	(212) 337-2400
Philadelphia	(215) 597-3282
San Francisco	(415) 625-2270
Washington, DC	(202) 691-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables may be obtained via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices just listed.

Descriptive publications. These publications describe the CPI and ways in which to use it. They include simple factsheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question-and-answer format, and a technical and thorough description of the CPI and its methodology. These publications may be obtained by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained by writing the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, or by calling any of the information offices listed earlier.
