¹ Data refer to people who worked during the survey reference week regardless of telework status. Excludes employed people absent from work the entire week due to holidays, vacation, illness, or other reasons.

² Aggregate hours teleworked or worked at home for pay as a percent of aggregate hours worked.

³ Unpaid family workers are included in total employed, but not shown separately.

NOTE: Usual full- or part-time status refers to hours at all jobs combined; full time is 35 hours or more per week, and part time is less than 35 hours. Occupation, industry, and class of worker refer to a person's main or sole job. Updated population controls are introduced annually with the release of January data. Effective with January 2025 data, industries reflect the introduction of the 2022 Census industry classification system, derived from the

2022 North American Industry Classification System (NAICS). No historical data have been revised. Data for 2025 are not strictly comparable with earlier years. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 35,000). Annual estimates for 2025 are 11-month averages that exclude October. (Data for October 2025 were not collected due to the federal government shutdown.) As a result, 2025 annual estimates are not strictly comparable with annual averages for other years.
