

## Appendix B. 1994 Census of Fatal Occupational Injuries Fatality Rates

Both absolute numbers (or frequencies) and rates are useful when examining fatal work injuries for research or prevention efforts. A frequency shows "how many" fatal work injuries occurred. A rate indicates the relative danger.

The relative danger of an occupation or industry group can be indicated by combining frequency data with either employment or hours data to calculate a rate. An hours-based rate indicates the relative danger using time of exposure. An employment-based rate indicates the relative danger using the number of employed workers.

Each type of rate has a different purpose. An employment-based fatality rate measures the incidence of fatal injury for all workers in the group regardless of exposure time. It does not account for the fact that part-time workers may have fewer fatal work injuries because they spend less time in the work environment. An hours-based fatality rate accounts for different time of exposure levels among workers. Hours-based measurements are especially useful for industry and occupation comparisons, when the number of workers can vary greatly among industry or occupation groups for a given period.

Work fatality counts from the Bureau of Labor Statistics (BLS) Census of Fatal Occupational Injuries can be combined with employment or hours at work data to produce a fatal work injury rate. Since hours at work and employment data are not collected by CFOI, experimental fatality rates were calculated using estimates of employed civilian workers (age 16 and older) from the Current Population Survey (CPS).<sup>2</sup> In addition, resident military figures, derived from resident and civilian population data from the Bureau of the Census, were added to the CPS employment figures to maintain consistency with the CFOI fatality data.

The fatality rates were calculated as follows:  $(N / W) \times 100,000$

N = the number of fatally injured workers  
W = the number of employed workers

The ratio N/W is multiplied by 100,000 so that worker groups with widely varying employment levels can be expressed in common terms (i.e., per 100,000 workers) for comparisons.

**Example.** There were 6,588 total work fatalities in 1994 and 124,469,000 employed workers (123,060,000 employed civilian workers age 16 and older, and 1,409,000 resident military personnel).

"N" must be adjusted to maintain consistency with "W," so the 25 fatally injured workers under age 16 in 1994 are not included in the rate calculation. (Adjustments of "N" are not reflected in the "Number" and "Percent" columns of the tables, which include all fatalities regardless of age.)

$$\begin{aligned} N &= 6,588 - 25 = 6,563 \\ W &= 124,469,000 \\ (6,563 / 124,469,000) \times 100,000 &= 5 \\ &5 \text{ fatalities per } 100,000 \text{ workers} \end{aligned}$$

<sup>1</sup>The rates do not reflect the movement of persons in and out of the labor force, the length of their work week or year, or the effect of multiple jobholders. The Bureau of Labor Statistics will continue its research on fatality rates using employment and exposure hours.

<sup>2</sup> See the "Explanatory Notes and Estimates of Error" section (p. 227) in *Employment and Earnings* for January 1995 for an explanation of CPS sampling and estimation methodology, and standard error computations. The relative standard errors of the CPS employment estimates can be used to approximate confidence ranges for the fatality rates.

**Table B-1. Number, percent, and rate of fatal occupational injuries by selected worker characteristics, 1994. The rates are experimental measures using CPS employment.**

Characteristic	Fatalities		Employed <sup>1</sup> (in thousands)	Fatalities per 100,000 employed <sup>2</sup>
	Number	Percent		
Total .....	6,588	100.0	124,469	5
<b>Employee status</b>				
Wage and salary .....	5,336	81.0	113,641	5
Self-employed <sup>3</sup> .....	1,252	19.0	10,828	11
<b>Gender</b>				
Men .....	6,067	92.1	67,690	9
Women .....	521	7.9	56,779	1
<b>Age</b>				
Under 16 years .....	25	.4	—	—
16 to 17 years .....	42	.6	2,511	2
18 to 19 years .....	112	1.7	3,749	3
20 to 24 years .....	545	8.3	13,204	4
25 to 34 years .....	1,558	23.6	32,829	5
35 to 44 years .....	1,608	24.4	33,882	5
45 to 54 years .....	1,304	19.8	23,383	6
55 to 64 years .....	858	13.0	11,229	8
65 years and over .....	517	7.8	3,681	14
<b>Race</b>				
White .....	5,420	82.3	106,285	5
Black .....	702	10.7	13,102	5
Asian or Pacific Islander .....	181	2.7	—	—
American Indian, Aleut, Eskimo .....	40	.6	—	—
Other .....	245	3.7	—	—
<b>Hispanic origin</b>				
Hispanic <sup>4</sup> .....	611	9.3	10,867	6

<sup>1</sup> The employment figures are annual average estimates of employed civilians 16 years of age and older, from the Bureau of Labor Statistics Current Population Survey (CPS), 1994. Resident military figures, derived from resident and civilian population data from the Bureau of the Census, were added to most of the CPS employment figures. CPS data for 1994 are not directly comparable with data for 1993 and earlier years because of the introduction of a major redesign of the survey questionnaire and collection methodology, and the introduction of 1990 census-based population controls adjusted for the estimated undercount. For additional information, see "Revisions in the Current Population Survey Effective January 1994," in the February 1994 issue of *Employment and Earnings*.

<sup>2</sup> The rate represents the number of fatal occupational injuries per 100,000 employed workers and was calculated as follows:  $(N/W) \times 100,000$ , where N = the number of fatal work

injuries, and W = the number of employed workers, as described in the previous footnote. There were 25 fatally injured workers under the age of 16 years that were not included in the rate calculations to maintain consistency with the CPS employment.

<sup>3</sup> Includes paid and unpaid family workers, and may include owners of incorporated businesses, or members of partnerships.

<sup>4</sup> Persons identified as Hispanic may be of any race.

NOTE: Totals for major categories may include subcategories not shown separately. Figures may not add to totals because of rounding. Dashes indicate data that are not available.

**Table B-2. Number, percent, and rate of fatal occupational injuries by selected<sup>1</sup> occupation, 1994. The rates are experimental measures using CPS employment.**

Occupation <sup>2</sup>	Fatalities		Employed <sup>1</sup> (in thousands)	Fatalities per 100,000 employed <sup>2</sup>
	Number	Percent		
Total .....	6,588	100.0	124,469	5
Managerial and professional specialty .....	768	11.7	33,847	2
Executive, administrative, and managerial .....	486	7.4	16,312	3
Managers, food serving and lodging places .....	74	1.1	1,255	6
Professional specialty .....	282	4.3	17,536	2
Technical, sales, and administrative support .....	943	14.3	37,306	3
Technicians and related support occupations .....	209	3.2	3,869	5
Airplane pilots and navigators .....	131	2.0	104	126
Sales occupations .....	588	8.9	14,817	4
Supervisors and proprietors .....	249	3.8	4,443	6
Sales counter clerks .....	27	.4	209	13
Cashiers .....	110	1.7	2,745	4
News vendors .....	23	.3	130	15
Administrative support jobs, including clerical .....	146	2.2	18,620	1
Messengers .....	25	.4	147	17
Service occupations .....	601	9.1	16,912	4
Protective service occupations .....	332	5.0	2,249	15
Fire fighting and prevention jobs, including supervisors .....	56	.9	260	22
Police and detectives, including supervisors .....	149	2.3	1,077	14
Guards, including supervisors .....	127	1.9	911	14
Farming, forestry, and fishing .....	944	14.3	3,629	26
Farm operators and managers .....	382	5.8	1,453	26
Other agricultural and related occupations .....	360	5.5	2,176	16
Farm workers, including supervisors .....	261	4.0	795	31
Groundskeepers and gardeners, except farm .....	78	1.2	864	9
Forestry and logging occupations .....	137	2.1	132	104
Timber cutting and logging occupations .....	112	1.7	86	130
Fishers, hunters, and trappers .....	65	1.0	52	125
Fishers .....	55	.8	42	131
Precision production, craft, and repair .....	1,090	16.5	13,489	8
Mechanics and repairers .....	294	4.5	4,419	7
Automobile mechanics .....	49	.7	864	6
Heavy equipment mechanics .....	24	.4	151	16
Construction trades .....	614	9.3	5,008	12
Carpenters .....	87	1.3	1,265	7
Electricians .....	99	1.5	659	15
Electrical power installers and repairers .....	35	.5	116	30
Painters, construction and maintenance .....	40	.6	543	7
Plumbers, pipefitters, and steamfitters .....	39	.6	508	8
Roofers .....	53	.8	180	29
Structural metal workers .....	48	.7	49	98
Extractive occupations .....	76	1.2	142	54
Drillers, oil wells .....	22	.3	26	85
Mining machine operators .....	29	.4	39	74
Operators, fabricators, and laborers .....	2,055	31.2	17,876	11
Machine operators, assemblers, and inspectors .....	256	3.9	7,754	3
Welders and cutters .....	67	1.0	577	12
Transportation and material moving occupations .....	1,169	17.7	5,136	23
Motor vehicle operators .....	925	14.0	3,882	24
Truck drivers .....	762	11.6	2,815	27
Drivers—sales workers .....	29	.4	164	18
Taxicab drivers and chauffeurs .....	113	1.7	241	47
Water transportation occupations .....	42	.6	68	62
Sailors and deckhands .....	25	.4	27	89
Material moving equipment operators .....	172	2.6	1,078	16
Operating engineers .....	41	.6	237	17
Excavating and loading machine operators .....	22	.3	95	23
Grader, dozer, and scraper operators .....	23	.3	88	26
Industrial truck and tractor equipment operators .....	39	.6	483	8

See footnotes at end of table.

**Table B-2. Number, percent, and rate of fatal occupational injuries by selected<sup>1</sup> occupation, 1994. The rates are experimental measures using CPS employment.—Continued**

Occupation <sup>2</sup>	Fatalities		Employed <sup>1</sup> (in thousands)	Fatalities per 100,000 employed <sup>2</sup>
	Number	Percent		
Handlers, equipment cleaners, helpers, and laborers .....	630	9.6	4,986	13
Construction laborers .....	247	3.7	740	33
Garbage collectors .....	22	.3	50	44
Garage and service station related occupations .....	23	.3	184	13
Laborers, except construction .....	229	3.5	1,240	18
Military .....	109	1.7	1,409	8

<sup>1</sup> Selected occupations had more than 20 reported work injury fatalities in 1994.

<sup>2</sup> Based on the 1990 population census occupation classification system developed by the Bureau of the Census.

<sup>3</sup> The employment figures, except for military, are annual average estimates of employed civilians 16 years of age and older, from the Bureau of Labor Statistics Current Population Survey (CPS), 1994. The resident military figure, derived from resident and civilian population data from the Bureau of the Census, was added to the CPS employment total. CPS data for 1994 are not directly comparable with data for 1993 and earlier years because of the introduction of a major redesign of the survey questionnaire and collection methodology, and the introduction of 1990 census-based population controls adjusted for the estimated undercount. For additional information, see "Revisions in the Current Population Survey Effective January 1994," in the February 1994 issue of *Employment and Earnings*.

<sup>4</sup> The rate represents the number of fatal occupational injuries per 100,000 employed workers and was calculated as follows:

$(N/W) \times 100,000$ , where N = the number of fatal work injuries, and W = the number of employed workers, as described in the previous footnote. There were 25 fatally injured workers under the age of 16 years that were not included in the rate calculations to maintain consistency with the CPS employment.

NOTE: Totals for major categories may include subcategories not shown separately. Figures may not add to totals because of rounding. There were 79 fatalities for which there was insufficient information to determine an occupation classification.

<sup>1</sup>Based on the *Standard Industrial Classification Manual*, 1987 Edition.

<sup>2</sup>The employment figures are annual average estimates of employed civilians 16 years of age and older, from the Bureau of Labor Statistics Current Population Survey (CPS), 1994. A resident military figure, derived from resident and civilian population data from the Bureau of the Census, was added to the CPS employment total and figures for government and federal government. CPS data for 1994 are not directly comparable with data for 1993 and earlier years because of the introduction of a major redesign of the survey questionnaire and collection methodology, and the introduction of 1990 census-based population controls adjusted for the estimated undercount. For additional information, see "Revisions in the Current Population Survey Effective January 1994," in the February 1994 is-

sue of *Employment and Earnings*.

<sup>3</sup>The rate represents the number of fatal occupational injuries per 100,000 employed workers and was calculated as follows:  $(N/W) \times 100,000$ , where N = the number of fatal work injuries, and W = the number of employed workers, as described in the previous footnote. There were 25 fatally injured workers under the age of 16 years that were not included in the rate calculations to maintain consistency with the CPS employment.

NOTE: Totals for major categories may include subcategories not shown separately. Figures may not add to totals because of rounding. There were 124 fatalities for which there was insufficient information to determine an industry classification.
