Nonclassifiable	9999	1.7	_	_	_	_	1.7	_	-	_	_	1.4	_	_

¹ Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

Ν = number of injuries and illnesses EΗ = total hours worked by all employees during the calendar year

20.000.000 = base full-time for 10.000 equivalent

(working 40 hours per week, 50 weeks per year)

Based on the Occupational Injury and Illness Classification System 2.01 developed by the Bureau of Labor Statistics. Excludes farms with fewer than 11 employees.

workers

Note: Dash indicates data do not meet publication guidelines. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals. Source: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

² Days-away-from-work cases include those that resulted in days away from work, some of which also included job transfer or restriction.

⁵ Data for Mining (Sector 21 in the North American Industry Classification System-- United States, 2007) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

Data too small to be displayed.
