

A total of 1,221 fatal railroad-related work injuries occurred from 1993 through 2002. Fatalities involving railroading workers accounted for less than two-fifths of the 1,221 fatal railroad-related work injuries. Railroad-related fatalities involving nonrailroading workers, such as workers in rail transportation occupations outside railroading or truckdrivers in other industries who are fatally injured in at-grade crossing collisions with trains, accounted for more than three-fifths of railroad-related work fatalities.

Workplace fatalities related to railroads, 1993–2002

Total fatalities = 1,221

NOTE: Data from 2001 exclude fatalities resulting from the September 11 terrorist attacks.
