¹ Days away from work cases include those which result in days away from work with or without restricted work activity.

NOTE: Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals. Dashes indicate data that do not meet publication guidelines. The scientifically selected probability sample used in 1995 was one of many possible samples, each of which could have produced different estimates. A measure of sampling variability for each estimate is available upon request.
