2003 SOII SUMMARY ESTIMATES

CHART PACKAGE

December 14, 2004
Incidence rates for injuries and illnesses ranged from 1.7 per 100 full-time workers in financial activities to 7.8 per 100 full-time workers in transportation and warehousing.

December 2004
Nonfatal workplace total recordable injury incidence rates by industry, 2003

Incidence rates for injuries ranged from 1.6 per 100 full-time workers in financial activities to 7.4 per 100 full-time workers in transportation and warehousing.

December 2004
Nonfatal workplace total recordable illness incidence rates by industry, 2003

Manufacturing had the highest incidence rate for illnesses of 79.2 cases per 10,000 full-time workers in 2003.

December 2004
Manufacturing, health care and social assistance, and retail trade combined accounted for nearly 52 percent of all reported occupational injuries for private industry in 2003.

December 2004
Manufacturing and health care and social assistance combined accounted for nearly 60 percent of all reported occupational illnesses for private industry in 2003.
Nationwide, incidence rates for injuries and illnesses combined ranged from 2.0 cases per 100 workers for small establishments (those employing 1 to 10 workers) to 6.2 for mid-size establishments (those employing 50 to 249 workers).
Fourteen industries, each having at least 100,000 injuries and illnesses, accounted for about 2.0 million injuries and illnesses, or 47 percent of the 4.4 million total cases in 2003.
Among industry sectors, only manufacturing had more cases with job transfer or restriction than cases with days away from work in 2003.

December 2004
Incidence rates for cases with days away from work, job transfer, or restriction, by case type and industry, 2003

Transportation and warehousing accounted for the highest incidence rate for days away from work, job transfer, or restriction (DART) of 5.4 per 100 full-time workers in 2003.

December 2004
Of the nearly 4.4 million nonfatal injuries and illnesses reported in 2003, 4.1 million were injuries. The remainder of these private industry cases (269.5 cases in thousands) were work-related illnesses. About three-fourths of the illness cases were reported in the “all other illnesses” category.
