Pacific .....	100	64	—	22	8	—	2	—

<sup>1</sup> A composite rate is a set contribution covering more than one benefit area, for example, health care and life insurance. Cost data for individual plans cannot be determined.

<sup>2</sup> Based on worker attributes. For example, employee contributions may vary based on earnings, length of service, or age.

<sup>3</sup> Amount varies by options selected under a "cafeteria plan" or employer-sponsored reimbursement account.

<sup>4</sup> Less than 0.5 percent.

<sup>5</sup> The categories are based on the average wage for each occupation surveyed,

which may include workers with earnings both above and below the threshold. The average wages are based on the estimates published in the "National Compensation Survey: Occupational Earnings in the United States, 2009." See Technical Note for more details.

NOTE: Because of rounding, sums of individual items may not equal totals. Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at [www.bls.gov/ncs/ebs/glossary20092010.htm](http://www.bls.gov/ncs/ebs/glossary20092010.htm).
