FOR RELEASE: 10:00 A.M. EST FRIDAY, DECEMBER 9, 2005

# EMPLOYER COSTS FOR EMPLOYEE COMPENSATION—SEPTEMBER 2005

Employer costs for employee compensation averaged \$26.05 per hour worked in September 2005, the U.S. Department of Labor's Bureau of Labor Statistics reported today. Wages and salaries, which averaged \$18.28, accounted for 70.2 percent of these costs, while benefits, which averaged \$7.77, accounted for the remaining 29.8 percent. (See table 1.) Employer Costs for Employee Compensation, based on the National Compensation Survey, measures employer costs for wages, salaries, and employee benefits for nonfarm private and State and local government workers.

Costs for legally required benefits, including Social Security, Medicare, unemployment insurance, and workers' compensation, averaged \$2.13 per hour (8.2 percent of total compensation). Employer costs for life, health, and disability insurance benefits averaged \$2.10 (8.0 percent); paid leave benefits (vacations, holidays, sick leave, and other leave) averaged \$1.72 (6.6 percent); and retirement and savings benefits averaged \$1.13 (4.3 percent) per hour worked.

Hurricanes Katrina and Rita, which struck the Gulf Coast during the reference period for the ECEC, have affected the lives of millions of Americans and resulted in significant disruptions in business both inside and outside of the impacted areas. Survey response rates in the affected areas were lower than usual, but the data from nonresponding establishments account for less than 1 percent of the overall sample. There does not appear to have been any tangible effects on the estimates.

### Private industry

In September 2005, private industry employer compensation costs averaged \$24.34 per hour worked. Wages and salaries averaged \$17.23 per hour (70.8 percent), while benefits averaged \$7.11 (29.2 percent). Employer costs for paid leave averaged \$1.55 per hour worked (6.4 percent), supplemental pay averaged 71 cents (2.9 percent), insurance benefits averaged \$1.78 (7.3 percent), retirement and savings averaged 90 cents (3.7 percent), and legally required benefits \$2.14 (8.8 percent) per hour worked. (See table 5.)

**NOTE:** Collection of severance pay and supplemental unemployment plans, which comprise "other benefits" and are published in all tables, will be discontinued beginning with the March 2006 estimates to reduce the burden on survey respondents.

## Compensation costs in State and local governments

In September 2005, employer costs in State and local governments averaged \$36.16 per hour worked. Wages and salaries, which accounted for 67.8 percent of the total, averaged \$24.52, while benefits, which accounted for the remaining 32.2 percent, averaged \$11.64. (See table 3.) Benefit costs increased from 31.4 percent of total compensation and \$10.89 per hour for State and local government workers in September 2004.

Among State and local government employees, average hourly compensation costs were higher for management, professional, and related occupations (\$44.11) than for service occupations (\$28.07) and sales and office occupations (\$24.74). Wages and salaries averaged \$31.37 per hour worked for management, professional, and related occupations, \$17.25 for service occupations, and \$15.49 for sales and office occupations. Wages and salaries accounted for about the same proportion of total compensation for service employees (61.5 percent) and sales and office employees (62.6 percent); for management, professional, and related employees, wages and salaries represented a significantly higher proportion of total compensation (71.1 percent). (See table 3.)

For State and local government employees, employer costs for insurance benefits ranged from \$3.27 per hour, or 11.6 percent of total compensation for service occupations, to \$4.32 per hour worked, or 9.8 percent of total compensation for management, professional, and related occupations. For sales and office occupations, employer insurance costs averaged \$3.69, or 14.9 percent of compensation. The largest component of insurance costs was health insurance, which averaged \$3.82, or 10.6 percent of total compensation for State and local government employees. Health insurance costs were higher in September 2005, rising from \$3.49 and 10.0 percent of total compensation in September 2004.

In September 2005, the average cost for retirement and savings benefits was \$2.48 per hour worked in State and local governments (6.9 percent of total compensation). Included in this amount were employer costs for defined benefit plans, which averaged \$2.21 per hour (6.1 percent), and defined contribution plans, which averaged 27 cents (0.7 percent). Defined benefit costs rose in the past year, increasing from \$1.97 per hour and 5.7 percent of total compensation in September 2004. Defined benefit plans specify a formula for determining future benefits, while defined contribution plans specify employer contributions but do not guarantee future benefits.

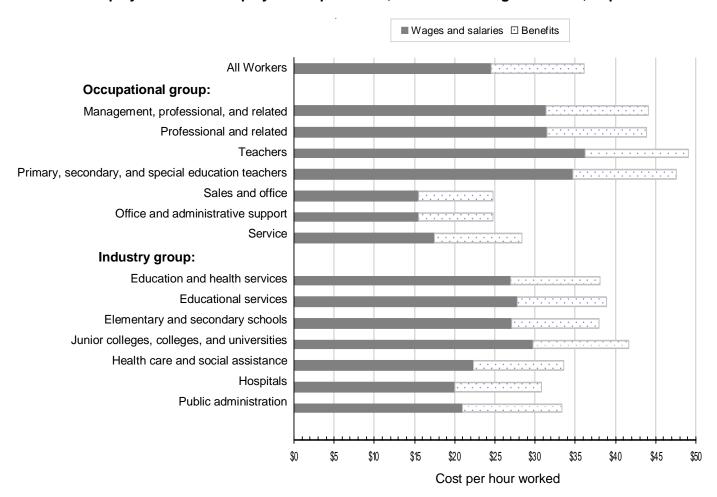

A major component of benefit costs is paid leave, including vacations, holidays, sick leave, and other leave such as personal leave, military leave, and funeral leave. The average cost for paid leave was \$2.72 per hour worked for State and local government employees. Among occupational groups, the average cost for management, professional, and related workers was \$2.93, significantly higher than the costs for sales and office workers, which averaged \$2.33, and for service workers, which averaged \$2.51.

Costs for legally required benefits, including Social Security, Medicare, unemployment insurance (both State and Federal), and workers' compensation, averaged \$2.12 per hour worked for State and local government employees. The average cost for management, professional, and related workers was \$2.43 per hour worked (5.5 percent of total compensation); sales and office workers averaged \$1.56 (6.3 percent), and service workers averaged \$1.75 (6.2 percent).

Chart A. Relative importance of employer costs for employee compensation, September 2005

Compensation component	Civilian workers	State and local government	Private industry

<sup>&</sup>lt;sup>1</sup> Includes workers in the private nonfarm economy excluding households and the public sector excluding the Federal government.
<sup>2</sup> Includes mining, construction, and manufacturing. The

agriculture, forestry, farming, and hunting sector is excluded.

<sup>3</sup> Includes utilities; wholesale trade; retail trade; transportation

and warehousing; information; finance and insurance; real estate and rental and leasing; professional and technical services; management of companies and enterprises; administrative and waste services; educational services; health care and social assistance; arts, entertainment and recreation; accommodation and food services; and other services, except public administration.

Includes premium pay for work in addition to the regular work schedule (such as overtime, weekends, and holidays).
 Cost per hour worked is \$0.01 or less.
 Less than .05 percent.

<sup>&</sup>lt;sup>7</sup> Comprises the Old-Age, Survivors, and Disability Insurance (OASDI) program.

8 Includes severance pay and supplemental unemployment

<sup>&</sup>lt;sup>1</sup> This table presents data for the three major occupational groups in State and local government: management, professional, and related occupations, including teachers; sales and office occupations, including clerical workers; and service occupations, including police and firefighters.
<sup>2</sup> Service-providing industries, which include health and educational services, employ a large part of the State and local government workforce.
<sup>3</sup> Includes premium pay for work in addition to the regular work schedule (such as overtime weekends, and holidays).

<sup>(</sup>such as overtime, weekends, and holidays).

<sup>&</sup>lt;sup>4</sup> Comprises the Old-Age, Survivors, and Disability Insurance (OASDI) program.

<sup>5</sup> Cost per hour worked is \$0.01 or less.
6 Less than .05 percent.
7

<sup>7</sup> Includes severance pay and supplemental unemployment benefits.

Table 4. Employer costs per hour worked for employee compensation and costs as a percent of total compensation: State and local government workers, by occupational and industry group, September 2005

 Less than .05 percent.

## **EXPLANATORY NOTES**

Employer Costs for Employee Compensation (ECEC) measures the average cost per employee hour worked that employers pay for wages and salaries and benefits.

Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions and include production bonuses, incentive earnings, commission payments, and cost-of-living adjustments. Not included in straight-time earnings are nonproduction bonuses such as lump-sum payments provided in lieu of wage increases, shift differentials, and premium pay for overtime and for work on weekends and holidays; these payments are included in the benefits component.

Benefits include: Paid leave–vacations, holidays, sick leave, and other leave; supplemental pay–overtime and premium pay for work in addition to the regular work schedule (such as weekends and holidays), shift differentials, and nonproduction bonuses (such as referral bonuses and lump-sum payments provided in lieu of wage increases); insurance benefits—life, health, short-term disability, and long-term disability; retirement and savings benefits—defined benefit and defined contribution plans; legally required benefits—Social Security, Medicare, Federal and State unemployment insurance, and workers' compensation; and other benefits—severance pay and supplemental unemployment plans.

The Employer Costs for Employee Compensation includes data for the civilian economy, which includes data from both private industry and State and local government. Excluded from private industry are the self-employed and farm and private household workers. Federal government workers are excluded from the public sector. The private industry series and the State and local government series provide data for the two sectors separately.

The cost levels for this quarter were collected from a probability sample of about 41,000 occupations within approximately 9,500 sample establishments in private industry and about 3,500 occupations within approximately 800 sample establishments in State and local governments. Data are collected for the pay period including the 12<sup>th</sup> day of the survey months of March, June, September, and December.

Beginning with the March 2004 estimates, the ECEC percent of total compensation estimates are calculated from dollar aggregates and then rounded to the published level of precision. This change in method provides the most precise estimates of the percent of total compensation; however, estimates of the percentage of total compensation calculated from the published cost estimates may differ slightly from those calculated from the unpublished dollar aggregates.

Sample establishments are classified by industry categories based on the 2002 North American Industry Classification (NAICS) system, as defined by the U.S. Office of Management and Budget. Within a sample establishment, specific job categories are selected and classified into about 800 occupational classifications according to the 2000 Standard Occupational Classification (SOC) system. Individual occupations are combined to represent one of eight intermediate aggregations such as professional and related occupations, or one of five higher-level aggregations such as management, professional, and related occupations. Employees in occupations included in the survey receive cash payments from the establishment for services performed, while the establishment pays the employer's portion of Medicare taxes on that individual's wages. Major exclusions from the survey are the self-employed, individuals who set their own pay (for example proprietors, owners, major stockholders, and partners in unincorporated firms), volunteers, unpaid workers, family members being paid token wages, individuals receiving long-term disability compensation, and U.S. citizens working overseas. For more detailed information on NAICS and SOC, including background and definitions, see the BLS websites: (http://www.bls.gov/bls/naics.htm and http://www.bls.gov/soc/home.htm.)

Additional occupational and industrial series were introduced in March 2004 with the introduction of the NAICS and SOC definitions. An article on the transition, "Comparing Current and Former Industry and Occupational ECEC Series" is available on the e-journal, Compensation and Working Conditions Online, posted August 25, 2004, on the website <a href="http://www.bls.gov/opub/cwc/cm20040823ar01p1.htm">http://www.bls.gov/opub/cwc/cm20040823ar01p1.htm</a>. Information on the transition may be obtained by calling (202) 691-6199 or by sending an e-mail message to ocltinfo@bls.gov.

Current employment weights are used to calculate cost levels. The September 2005 cost levels were calculated using the September 2005 employment counts from the Bureau of Labor Statistics Current Employment Statistics (CES) program, benchmarked to the March 2004 universe of all private nonfarm establishments. For more information on the CES updating of employment estimates, see "BLS Establishment Estimates Revised to Incorporate March 2004 Benchmarks" on the Internet site <a href="http://www.bls.gov/web/cesbmart.htm">http://www.bls.gov/web/cesbmart.htm</a>.

In most instances, private industry employment counts used in the ECEC were total employment estimates for 3-digit sub-sector industry groups, such as machinery manufacturing (NAICS 333) or gasoline stations (NAICS 447), as defined by the NAICS system. In a few cases, more detailed private industry employment counts were used. These include 4-digit educational establishments--elementary and secondary schools (6111), junior colleges (6112), and colleges and universities (6113)--as well as the 6-digit aircraft manufacturing industry (336411). For State and local governments, a more aggregated level was used reflecting the level of detailed published by the CES program. For both private and government establishments, the employment data were apportioned based on the sampling weights assigned to the Employment Cost Index (ECI) sample. For more information on NAICS coding, see "Recent changes in the national Current Employment Statistics survey" in the June 2003 issue of the Monthly Labor Review.

The ECI, which measures the change in employer costs for employee compensation, is calculated with fixed 1990 employment counts to prevent employment shifts among occupations and industries from influencing the changes. Therefore, year-to-year changes in Employer Costs for Employee Compensation will differ from those in the ECI.

Historical ECEC data, using the industry categories based on the 1987 Standard Industrial Classification System and classifying jobs into occupational classifications according to the Census of Population, are available from several sources. Data and related articles are included in the bulletin, <a href="Employee Costs for Employee Compensation">Employee Compensation</a>, 1986-99 (Bulletin 2508). An annual historical listing from March 1986 through March 2002 is also available on the Internet site (<a href="http://www.bls.gov/ncs/ect/home.htm">http://www.bls.gov/ncs/ect/home.htm</a>) or upon request. Data on a quarterly basis from June 2002 through December 2003 is also available.

Beginning with the March 2004 quarter, historical data are available based on the 2002 North American Industry Classification System and the 2000 Standard Occupational Classification. The new historical tables are available on the Internet site (<a href="http://www.bls.gov/ncs/ect/home.htm">http://www.bls.gov/ncs/ect/home.htm</a>) or upon request. Information on how costs are calculated appears in "Measuring Trends in the Structure and Levels of Employer Costs for Employee Compensation," <a href="https://compensation.org/compensation">Compensation and Working Conditions</a>, Summer 1997. An article on changes in employer compensation costs, "Tracking Changes in Benefit Costs," appears in <a href="https://compensation.org/conditions">Compensation and Working Conditions</a>, Spring 1999.

# **Relative Standard Errors**

Because the ECEC is a sample survey, it is subject to sampling errors. Sampling errors are differences that occur between the results computed from a sample of observations and those computed from all observations in the population. The estimates derived from different samples selected using the same sample design may differ from one another. A measure of the variation among these differing estimates is the standard

error. It can be used to measure the precision with which an estimate from a particular sample approximates the expected result of all possible samples. The chances are about 68 out of 100 that an estimate from the survey differs from a complete population figure by less than the standard error. The chances are about 90 out of 100 that this difference would be less than 1.6 times the standard error. All the statements of comparisons appearing in this publication are significant at a 1.6 standard error level or better, unless otherwise indicated. This means that for differences cited, the estimated difference is greater than 1.6 times the standard error of the difference.

The relative standard error (RSE) for all estimates will be available shortly after the release is issued. This information can be obtained directly from the BLS Internet site (<a href="http://www.bls.gov/ncs/ect/home.htm">http://www.bls.gov/ncs/ect/home.htm</a>), by e-mail request (ocltinfo@bls.gov), or by telephone (202) 691-6199.

For a more detailed explanation of relative standard errors, see "Measuring Trends in the Structure and Levels of Employer Costs for Employee Compensation," <u>Compensation and Working Conditions</u>, Summer 1997. For a detailed explanation of how to use standard error data to analyze differences in year-to-year changes, see "Analyzing Year-to-Year Changes in Employer Costs for Employee Compensation," <u>Compensation and Working Conditions</u>, Spring 1998. This article supplements an article from the Summer 1997 issue of <u>Compensation and Working Conditions</u>, "Explaining the Differential Growth Rates of the ECI and ECEC," which examined how differences in the construction of these measures contribute to differing trends.

Standard errors relate to differences that occur from sampling errors, but not from nonsampling errors. Nonsampling errors are not measured and include survey nonresponse and data collection and processing errors. Survey nonresponse occurs when sample members are unwilling or unable to participate in the survey. Data collection errors include inaccurate data by respondents and definitional difficulties. Processing errors include errors in recording, coding, and entering data. Although nonsampling errors are not measured, BLS quality assurance programs contain procedures for reducing such errors. These procedures include data collection reinterviews, observed interviews, computer data edits, and systematic review of reports on which data are recorded. Extensive field economist training also is conducted to maintain high data collection standards.

# Comparing private and public sector data

Aggregate compensation cost levels in State and local government should not be directly compared with those in private industry. Differences between these sectors stem from factors such as variation in work activities and occupational structures. Manufacturing and sales, for example, make up a large part of private industry work activities, but are rare in State and local government. Professional and administrative support occupations (including teachers) account for two-thirds of the State and local government workforce, compared with one-half of private industry.

A detailed examination of differences in compensation levels and trends between private industry and State and local government may be found in "Cost of Employee Compensation in Public and Private Sectors," Monthly Labor Review, May 1993, and "Compensation Cost Trends in Private Industry and State and Local Governments," Compensation and Working Conditions, Fall 1999.

# Obtaining information

Articles, bulletins, and other information may be obtained by calling (202) 691-6199, sending an e-mail message to <u>octtinfo@bls.gov</u>, or visiting the Internet site (<a href="http://www.bls.gov/ncs/ect/home.htm">http://www.bls.gov/ncs/ect/home.htm</a>). Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service Number: 1-800-877-8339.
