TRANSMISSION OF MATERIAL IN THIS RELEASE IS EMBARGOED UNTIL 8:30 A.M. (EST), THURSDAY, OCTOBER 30, 2003

## EMPLOYMENT COST INDEX—SEPTEMBER 2003

Total compensation costs for civilian workers rose 1.0 percent from June to September 2003, seasonally adjusted, virtually unchanged from the 0.9 percent gain from March to June, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. Benefit costs increased 1.5 percent and continued to outpace the gain in wages and salaries for civilian workers in September, 0.7 percent. The Employment Cost Index (ECI), a component of the National Compensation Survey, measures quarterly changes in compensation costs, which include wages, salaries, and employer costs for employee benefits for nonfarm private and State and local government workers.

Over 40 percent of the increase in compensation costs was attributable to changes in benefit costs during the September quarter. Among private industry workers, benefit costs accounted for over one-third of the gain in compensation during the June to September period. Among State and local government workers, benefit costs accounted for over 55 percent of compensation gains during the quarter, with health insurance and defined benefit retirement costs accounting for nearly half of the rise in compensation costs in State and local government.

## Quarterly changes, seasonally adjusted

Compensation costs for private sector workers rose 1.0 percent from June to September, compared with a gain of 0.8 percent in the prior quarter. For State and local government workers, the increase in compensation costs moderated to 0.7 percent in September, compared with a gain of 1.0 percent for the quarter ended in June. Gains in private sector compensation costs were led by increases in retail trade and whitecollar workers. Private sector compensation gains were dampened by transportation and public utilities and service workers. (See tables A and 1.)

Benefit costs advanced 1.5 percent for civilian workers (nonfarm private industry and State and local government) in the September 2003 quarter, following a gain of 1.4 percent in the June quarter. In the private sector, benefit costs rose 1.4 percent for the September quarter, following a 1.3 percent gain in the previous quarter. By contrast, the benefit increase for State and local governments jumped to 2.0 percent in the September quarter, following a more modest 1.3 percent increase in June 2003.

While gains in wages and salaries showed little change from the prior quarter for civilian workers, increasing 0.7 percent during the September quarter following a gain of 0.6 percent in June, the gains for private industry and State and local government workers varied widely during the quarter. After advancing
0.8 percent during the March to June quarter, the gain in State and local government wages and salaries slowed to 0.1 percent during the June to September period. In contrast, wages and salaries for private industry workers rose 0.9 percent for the September quarter, following a more modest 0.6 percent gain during the prior quarter. Private sector wage gains were led by service-producing industries, especially retail trade. Increases in wages and salaries in the private sector were slowed by nondurable manufacturing and transportation and public utilities.

Table A. 3-month percent changes in Employment Cost Index, seasonally adjusted

| Compensation Component | Dec. <br> Civilian workers | Mar. | June | Sep. | Dec. | Mar. | June | Sep. |

| Wages and salaries | 0.6 | 0.8 | 0.8 | 0.8 | 0.7 | 0.7 | 0.8 | 0.1 |
| Benefit costs | 0.9 | 1.0 | 1.1 | 2.2 | 1.7 | 1.5 | 1.3 | 2.0 |

Over-the-year changes, not seasonally adjusted
Annual compensation costs for civilian workers (not seasonally adjusted) increased 3.9 percent for the year ended September 2003, compared with a 3.7 percent over-the-year increase for September 2002. Compensation costs in private industry rose 4.0 percent in the year ended September 2003, compared with a more modest increase of 3.7 percent in September 2002. State and local government compensation costs increased 3.6 percent for the year ended September 2003, compared to an over-the-year gain of 3.8 percent in September 2002. (See tables B, 2, and 3.)

Although over-the-year compensation gains remained relatively constant for the years ended September 2002 and September 2003, the components of compensation continued to show significant differences. While increases in wages and salaries slowed, benefit costs rose sharply during the year ended September 2003. For private industry workers, wages and salaries rose 3.0 percent in the year ended September 2003, compared with a gain of 6.5 percent for benefits. Wages and salaries rose a modest 2.3 percent for State and local government workers, while benefits increased 6.7 percent for the year ending September 2003. (See tables B, 5,6 , and 8.)

| Benefit costs | 2.8 | 2.0 | 2.8 | 5.6 | 5.4 | 6.7 |

## Nonfarm private industry

For the year ended September 2003, compensation costs in private industry increased 4.5 percent for goods-producing industries, higher than the 3.6 percent advance for the year ended September 2002. Compensation costs for manufacturing advanced 4.7 percent in September 2003, after increasing 3.8 percent in September 2002. Compensation costs for construction rose 3.8 percent in September 2003, compared with a 3.0 percent rise in September 2002. (See table 3.)

The over-the-year increase in compensation for service-producing industries was 3.7 percent, the same as the gain for the year ended September 2002. Among service-producing industries, the 12-month increase for finance, insurance, and real estate was 7.3 percent for the year ended in September 2003, led by a large increase in banking, savings and loan, and other credit agencies. Compensation costs rose modestly in retail trade, increasing 2.5 percent in the year ended September 2003.

Over-the-year compensation cost increases were 4.0 percent for white-collar occupations, 4.2 percent for blue-collar occupations, and 3.0 percent for service occupations for the year ended September 2003. Among white-collar occupational groups, compensation changes ranged from 3.5 percent for professional specialty and technical employees and for sales workers to 4.8 percent for executive, administrative, and managerial employees. Among blue-collar workers, compensation cost increases ranged from 3.8 percent for transportation and material moving workers to 4.6 percent for machine operators, assemblers, and inspectors. (See table 3.)

Compensation costs for union workers advanced 4.8 percent over the year ended September 2003, greater than the 3.8 percent increase for nonunion workers. Compensation costs among blue-collar union workers rose 5.1 percent, higher than the gain of 3.6 percent for blue-collar nonunion workers. In goodsproducing industries, a 5.4 percent increase for union workers was greater than the 4.1 percent advance for nonunion workers. (See tables C and 4.)

Wages and salaries for union workers rose a modest 2.6 percent for the 12 months ended in September 2003. This compares with an over-the-year increase of 3.1 percent for nonunion workers. Benefit costs for union workers rose sharply, 8.5 percent, greater than the increase of 5.9 percent for nonunion workers in September 2003. (See tables C, 7, and 8.)

Table C. 12-month percent changes in Employment Cost Index, not seasonally adjusted

|  | Sep. | Sep. | Sep. | Sep. | Sep. | Sep. |
| :--- | :--- | :--- | :--- | :--- | ---: | ---: |
| Compensation Component | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
| $\quad$ Union workers |  |  |  |  |  |  |
| Compensation costs | 2.7 | 2.5 | 4.2 | 3.4 | 4.7 | 4.8 |
| Wages and salaries | 3.2 | 2.5 | 3.2 | 3.6 | 4.3 | 2.6 |
| Benefit costs | 2.0 | 2.3 | 6.1 | 2.9 | 5.5 | 8.5 |
| $\quad$ Nonunion workers |  |  |  |  |  |  |
| Compensation costs | 4.0 | 3.2 | 4.7 | 4.1 | 3.5 | 3.8 |
| Wages and salaries | 4.4 | 3.3 | 4.3 | 3.6 | 3.1 | 3.1 |
| Benefit costs | 2.9 | 3.0 | 5.9 | 5.4 | 4.6 | 5.9 |

Among the four geographic regions, increases in compensation costs ranged from 2.7 percent in the South to 5.0 percent in the Midwest for the year ended in September 2003. Compensation costs rose 4.0 percent in the Northeast and 4.6 percent in the West. (See table 4.)

## State and local government

Employer costs for wages and salaries among State and local government workers rose 2.3 percent for the year ended September 2003. Wage and salary increases for State and local government workers from September 1982 through September 2002 ranged from 2.7 in September 1992 and September 1997 to 8.2 percent in September 1982. Benefit costs rose 6.7 percent for the year ended September 2003. Benefit
increases from September 1992 through September 2002 ranged from 1.5 percent in September 1997 to 5.6 percent in September 2001.

For the year ended September 2003, compensation costs increased 3.2 percent for educational services, compared with 3.3 percent for the year ended September 2002. Among educational services, over-the-year gains were 3.4 percent for elementary and secondary schools and 2.7 percent for colleges and universities. Among occupational groups, compensation costs of service workers rose 4.1 percent for the year ended September 2003, compared with gains of 3.5 percent for white-collar workers and 3.3 percent for blue-collar workers. (See tables B, 5, and 8.)

## NOTES:

The ECI for December 2003 is scheduled to be released Thursday, January 29, 2004, at 8:30 a.m. (EST).
Supplemental data from the ECI, providing 12-month percent changes in employer costs for health insurance in private industry from June 1982 to September 2003, will be available shortly after publication of this news release on the Internet site http://www.bls.gov/ect/home.htm, by e-mail request ocltinfo@bls.gov, or by telephone (202) 691-6199.

The costs per hour worked of compensation components, based on data from the ECI, were published on August 26, 2003, in a news release titled "Employer Costs for Employee Compensation-June 2003."

ECI data are available on the Compensation Cost Trends page at http://www.bls.gov/ncs/ect/home.htm. To access data using Anonymous FTP, use the Internet address ftp://ftp.bls.gov.

For technical assistance in using the BLS Internet site, send e-mail to webmaster@bls.gov. For ECI data requests, send e-mail to ocltinfo@bls.gov.

The ECI news release is available through an e-mail subscription service. See the subscription link on http://www.bls.gov/ncs/ect/home.htm or http://www.bls.gov/bls/newsrels.htm.

News releases and other information are available from the BLS fax-on-demand service. To request a document fax, call (202) 691-6325. To request a catalog of available documents, select option 2 at the initial voice prompt. To request data found in this news release, enter the following codes:

[^6]wholesale and retail trade; finance, insurance, and real estate; and service industries.

## EXPLANATORY NOTES

The Employment Cost Index (ECI) is a measure of the change in the cost of labor, free from the influence of employment shifts among occupations and industries. The compensation series includes changes in wages and salaries and employer costs for employee benefits. The wage and salary series and the benefit cost series provide the change for the two components of compensation.

Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions, excluding premium pay for overtime and for work on weekends and holidays, shift differentials, and nonproduction bonuses such as lump-sum payments provided in lieu of wage increases. Production bonuses, incentive earnings, commission payments, and cost-of-living adjustments are included in straight-time wage and salary rates.

Benefits covered by the ECI are: Paid leave-vacations, holidays, sick leave, and other leave; supplemental pay-premium pay for work in addition to the regular work schedule (such as overtime, weekends, and holidays), shift differentials, and nonproduction bonuses (such as referral bonuses and lumpsum payments provided in lieu of wage increases); insurance benefits-life, health, short-term disability, and long-term disability; retirement and savings benefits-defined benefit and defined contribution plans; legally required benefits-Social Security, Medicare, Federal and State unemployment insurance, and workers' compensation; and other benefits-severance pay and supplemental unemployment plans.

The ECI provides data for the civilian economy, which includes the total private nonfarm economy excluding households and the public sector excluding the Federal government. The private industry series and the State and local government series provide data for the two sectors separately.

Data for this quarter were collected from a probability sample of approximately 36,750 occupational observations within about 8,400 sample establishments in private industry and approximately 3,650 occupations within about 800 sample establishments in State and local governments. Data are collected for the pay period including the $12^{\text {th }}$ day of the survey months of March, June, September, and December.

The sampled establishments are classified by industry categories based on the 1987 Standard Industrial Classification (SIC), as defined by the U.S. Office of Management and Budget. Details on the sample design are included in the bulletin, Employment Cost Indexes, 1975-99, (Bulletin 2532). Within an establishment, specific job categories are selected and classified into about 500 occupational classifications according to the 1990 Census of Population. Individual occupations are combined into broader occupational groups. Fixed employment weights are used each quarter to calculate the most aggregate series-civilian, private, and State and local government. These fixed weights are also used to derive all of the industry and occupation series indexes. Since March 1995, 1990 employment counts, primarily from the Bureau's Occupational Employment Statistics survey, have been used. For more information on these topics, see the articles, "Introducing New Weights for the Employment Cost Index," in the June 1985 issue of the Monthly Labor Review and "Introducing 1990 Weights for the Employment Cost Index" in the June 1995 issue of Compensation and Working Conditions.

For the series based on bargaining status, region, and area size, employment data are not available. The employment weights are reallocated within these series each quarter based on the current ECI sample. The indexes for these series, consequently, are not strictly comparable to those for the aggregate, industry, and occupation series. A fuller explanation of the calculation of index numbers appears in an article, "Estimation Procedures for the Employment Cost Index," in the May 1982 issue of the Monthly Labor Review. Beginning with the March 1990 ECI release, indexes were rebased to June 1989=100. A description of the rebasing is included in the article "Employment Cost Index Rebased to June 1989," in the April 1990 issue of the Monthly Labor Review.

Beginning with the December 1990 ECI release, seasonally adjusted data are available for selected ECI series. Seasonal adjustment removes the effects of events that follow a more or less regular pattern each year. These adjustments make nonseasonal patterns easier to identify. For more information on the methodology used to seasonally adjust ECI series, see the bulletin, Employment Cost Indexes, 1975-99, (Bulletin 2532). The seasonal adjustment factors are recalculated once a year. The March release contains data reflecting the
newly updated seasonal adjustment factors. The historical data for the last five years are then revised based on the newly estimated factors. The new seasonal factors for 2003 and revised seasonally adjusted indexes for the past five years are available on the Internet site (http://www.bls.gov/ncs/ect/home.htm) or upon request.

The ECI sample is rotated over approximately five years, which makes the sample more representative and reduces respondent burden. The sample is replaced on a cross-area, cross-industry basis.

Because the ECI is a sample survey, it is subject to sampling errors. Sampling errors are differences that occur between the results computed from a sample of observations and those computed from all observations in the population. The estimates derived from different samples selected using the same sample design may differ from one other. A measure of the variation among these differing estimates is the standard error. It can be used to measure the precision with which an estimate from a particular sample approximates the expected result of all possible samples. The chances are about 68 out of 100 that an estimate from the survey differs from a complete population figure by less than the standard error. The chances are about 90 out of 100 that this difference would be less than 1.6 times the standard error. The statements of comparisons appearing in this publication are significant at a 1.6 standard error level or better, unless otherwise indicated. This means that for differences cited, the estimated difference is greater than 1.6 times the standard error of the difference.

Because standard errors vary from quarter to quarter, the ECI uses a five-year moving average of standard errors to evaluate published series. To assist users in ascertaining the reliability of series, the fiveyear moving average of standard errors for all estimates (excluding seasonally adjusted series) will be available on the Internet site (http://www.bls.gov/ncs/ect/home.htm) shortly after publication of the news release.

When determining data to be used in contract negotiations, it is important to note that differences by bargaining status may be due to factors other than union status, such as occupational and industry mix. For example, union occupations tend to be concentrated in blue-collar occupations within manufacturing industries. Thus, differences between blue-collar and white-collar pay or differences in manufacturing versus nonmanufacturing industries could explain such differences. An important consideration when choosing a series for escalation is the number of workers covered. Series with smaller numbers of workers may have larger sampling errors or be dominated by a smaller number of employers. For more information, see the web site: (http://www.bls.gov/ect/escalator.htm).

More detailed information on the ECI is available from several sources. These include an historical bulletin-Employment Cost Indexes, 1975-99, (Bulletin 2532), a chapter, "National Compensation Measures," in the BLS Handbook of Methods (Bulletin 2490), and several articles published in the Monthly Labor Review and Compensation and Working Conditions. The bulletin is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or Bureau of Labor Statistics, Publications Sales Center, P.O. Box 2145, Chicago, Illinois 60690, (312) 353-1880. Reprints of the articles and other descriptive pieces are available upon request by calling (202) 691-6199 or sending e-mail to (ocltinfo@bls.gov). Current and historical data are available at the web site: (http://www.bls.gov/ncs/ect/home.htm).

The costs per hour worked of compensation components, based on data from the ECI, were recently published in a separate news release titled "Employer Costs for Employee Compensation-June 2003." Historical data and related articles are included in the bulletin, Employer Costs for Employee Compensation, 1986-99, (Bulletin 2526). An annual historical summary from March 1986 through March 2002 is also available on the Internet site (http://www.bls.gov/ncs/ect/home.htm) or upon request. Data are also available on a quarterly basis beginning with June 2002 data. The September 2003 data are expected to be published in November 2003. The cost levels are calculated with current employment weights, rather than the fixed 1990 weights used in computing the ECI. Therefore, year-to-year changes in the cost levels usually differ from those in the ECI.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service Number: 1-800-877-8339.
