

# NEWS RELEASE

BUREAU OF LABOR STATISTICS  
U. S. DEPARTMENT OF LABOR

For release 10:00 a.m. (EDT) Wednesday, April 29, 2020

USDL-20-0719

Technical information:

Employment: [sminfo@bls.gov](mailto:sminfo@bls.gov) • [www.bls.gov/sae](http://www.bls.gov/sae)

Unemployment: [lausinfo@bls.gov](mailto:lausinfo@bls.gov) • [www.bls.gov/lau](http://www.bls.gov/lau)

Media contact: (202) 691-5902 • [PressOffice@bls.gov](mailto:PressOffice@bls.gov)

## METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — MARCH 2020

Unemployment rates were higher in March than a year earlier in 253 of the 389 metropolitan areas, lower in 123 areas, and unchanged in 13 areas, the U.S. Bureau of Labor Statistics reported today. A total of 45 areas had jobless rates of less than 3.0 percent and 11 areas had rates of at least 10.0 percent. Nonfarm payroll employment increased over the year in 21 metropolitan areas, decreased in 1 area, and was essentially unchanged in the remaining 367 areas. The national unemployment rate in March was 4.5 percent, not seasonally adjusted, up from 3.9 percent a year earlier.

This news release presents statistics from two monthly programs. The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the national household survey estimates. These data pertain to individuals by where they reside. The employment data are from an establishment survey that measures nonfarm employment, hours, and earnings by industry. These data pertain to jobs on payrolls defined by where the establishments are located. For more information about the concepts and statistical methodologies used by these two programs, see the Technical Note.

### Metropolitan Area Unemployment (Not Seasonally Adjusted)

In March, Kahului-Wailuku-Lahaina, HI, and Urban Honolulu, HI, had the lowest unemployment rates, 2.1 percent each, while El Centro, CA, had the highest unemployment rate, 20.5 percent. A total of 226 areas had March jobless rates below the U.S. rate of 4.5 percent, 150 areas had rates above it, and 13 areas had rates equal to that of the nation. (See table 1 and map 1.)

El Centro, CA, had the largest over-the-year unemployment rate increase in March (+3.9 percentage points). One hundred seventeen other areas had rate increases of at least 1.0 percentage point. The largest over-the-year rate decrease occurred in Yakima, WA (-2.5 percentage points).

Of the 51 metropolitan areas with a 2010 Census population of 1 million or more, Oklahoma City, OK, had the lowest unemployment rate in March, 2.5 percent. Cleveland-Elyria, OH, and Las Vegas-Henderson-Paradise, NV, had the highest jobless rates among the large areas, 7.3 percent and 6.7 percent, respectively. Forty-three large areas had over-the-year unemployment rate increases, seven had decreases, and one had no change. The largest jobless rate increases were in Cleveland-Elyria, OH (+3.0

percentage points), and Las Vegas-Henderson-Paradise, NV (+2.6 points). The largest rate decrease occurred in Portland-Vancouver-Hillsboro, OR-WA (-0.6 percentage point).

### **Metropolitan Division Unemployment (Not Seasonally Adjusted)**

Eleven of the most populous metropolitan areas are made up of 38 metropolitan divisions, which are essentially separately identifiable employment centers. In March, Boston-Cambridge-Newton, MA, had the lowest unemployment rate among the divisions, 2.7 percent. Philadelphia, PA, and Los Angeles-Long Beach-Glendale, CA, had the highest division rates, 6.6 percent and 6.4 percent, respectively. (See table 2.)

In March, 29 metropolitan divisions had over-the-year unemployment rate increases, 6 had decreases, and 3 had no change. Seattle-Bellevue-Everett, WA, had the largest rate increase (+2.5 percentage points), followed by Los Angeles-Long Beach-Glendale, CA, and Philadelphia, PA (+1.9 points each). The largest rate decline occurred in Elgin, IL (-1.7 percentage points).

### **Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)**

In March, 21 metropolitan areas had over-the-year increases in nonfarm payroll employment, 1 had a decrease, and 367 were essentially unchanged. The largest over-the-year employment increases occurred in Dallas-Fort Worth-Arlington, TX (+86,200), Houston-The Woodlands-Sugar Land, TX (+59,000), and Phoenix-Mesa-Scottsdale, AZ (+58,100). The largest over-the-year percentage gains in employment occurred in Yuba City, CA (+8.2 percent), and Boise City, ID, and Nashville-Davidson—Murfreesboro—Franklin, TN (+2.9 percent each). Employment fell in Lake Charles, LA (-6,300, or -5.4 percent). (See table 3 and map 2.)

Over the year, nonfarm employment rose in 16 of the 51 metropolitan areas with a 2010 Census population of 1 million or more, while employment was essentially unchanged in 35 areas. The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in Nashville-Davidson—Murfreesboro—Franklin, TN (+2.9 percent), Phoenix-Mesa-Scottsdale, AZ (+2.7 percent), and Denver-Aurora-Lakewood, CO (+2.6 percent).

### **Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)**

In March, nonfarm payroll employment increased in 5 of the 38 metropolitan divisions over the year and was essentially unchanged in 33 divisions. The largest over-the-year increase in employment among the metropolitan divisions occurred in Dallas-Plano-Irving, TX (+77,500), followed by Los Angeles-Long Beach-Glendale, CA (+41,300), and Washington-Arlington-Alexandria, DC-VA-MD-WV (+34,900). (See table 4.)

The largest over-the-year percentage increases in employment occurred in Dallas-Plano-Irving, TX (+2.9 percent), Philadelphia, PA (+2.2 percent), and Seattle-Bellevue-Everett, WA (+1.6 percent).

---

**The State Employment and Unemployment news release for April is scheduled to be released on Friday, May 22, 2020, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for April is scheduled to be released on Wednesday, June 3, 2020, at 10:00 a.m. (EDT).**

## **Coronavirus (COVID-19) Impact on March 2020 Establishment and Household Survey Data**

March data from the establishment and household surveys broadly reflect some of the early effects of the coronavirus (COVID-19) pandemic on the labor market. We cannot precisely quantify the effects of the pandemic on state and local job markets in March. However, it is clear that the decreases in employment and hours and the increases in unemployment can be ascribed to effects of the illness and efforts to contain the virus. It is important to keep in mind that the March survey reference periods for both surveys predated many coronavirus-related business and school closures in the second half of the month. More information on the impacts of the coronavirus on the surveys is available in the “Frequently asked questions” document at [www.bls.gov/cps/employment-situation-covid19-faq-march-2020.pdf](http://www.bls.gov/cps/employment-situation-covid19-faq-march-2020.pdf).

For the March 2020 estimates of household employment and unemployment from the Local Area Unemployment Statistics (LAUS) program, BLS determined that no modifications to the estimation procedures for substate areas were necessary. At the state level, however, the LAUS program implemented level-shift outliers in employment and/or unemployment in many modeled areas based on statistical evaluation of movements in each area’s Current Population Survey inputs. These level shifts preserved movements in the published estimates that the models otherwise would have discounted, without requiring changes to how the models create estimates at other points in the time series. Household data for substate areas are controlled to the employment and unemployment totals for their respective model-based areas. Hence, the substate area estimates for March reflect level-shift outliers, where implemented, in the Current Population Survey inputs for their model-based control areas.

Due to the effects of the illness and efforts to contain the virus, Puerto Rico was not able to conduct normal data collection for its household survey in March 2020; therefore, its data were not published. Household data for Puerto Rico are not modeled, but rather are derived from a monthly household survey similar to the Current Population Survey. In the absence of total controls for March, data for substate areas in Puerto Rico could not be produced.

In anticipation of issues due to the pandemic, BLS carefully reviewed all estimation and methodological procedures for the establishment survey, which included the review of data, estimation processes, the application of the birth/death model, and seasonal adjustment. No changes were made; the estimation process for the production of the March 2020 establishment survey estimates followed standard protocol. Outlier detection is a usual part of the seasonal adjustment process. Outliers for seasonal adjustment are identified in the establishment survey seasonal adjustment documentation, which is available at [www.bls.gov/sae/seasonal-adjustment/home.htm](http://www.bls.gov/sae/seasonal-adjustment/home.htm).

## Technical Note

This news release presents civilian labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 389 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 7 areas in Puerto Rico. Estimates for 38 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release *State Employment and Unemployment*, and are republished in this news release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

### Civilian labor force and unemployment—from the LAUS program

**Definitions.** The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employed persons and unemployed persons on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and older. *Employed* persons are those who did any work at all for pay or profit in the reference week (typically the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *civilian labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the civilian labor force.

**Method of estimation.** Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimates are also produced for the following areas and their respective balances: the Chicago-Naperville-Arlington Heights, IL Metropolitan Division; Cleveland-Elyria, OH Metropolitan Statistical Area; Detroit-Warren-Dearborn, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; and Seattle-Bellevue-Everett, WA Metropolitan Division. Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate

areas in this news release, estimates are prepared through indirect estimation procedures using a building-block approach. Estimates of employed persons, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated model-based area totals. A detailed description of the estimation procedures is available from BLS upon request.

**Annual revisions.** Civilian labor force and unemployment data shown for the prior year reflect adjustments made at the beginning of each year, usually implemented with the issuance of January estimates. The adjusted model-based estimates typically reflect updated population data from the U.S. Census Bureau, any revisions in other input data sources, and model re-estimation. All substate estimates then are re-estimated using updated inputs and adjusted to add to the revised model-based totals. In early 2015, a new generation of time-series models was implemented, resulting in the replacement of data back to the series beginnings. At the same time, enhancements were made to the substate estimation methodology, and more timely inputs from the American Community Survey were incorporated.

### Employment—from the CES program

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2017 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a “weighted link relative” estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month’s employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, the sample of establishments is very small or highly variable. In these cases,

a model-based approach is used in estimation. These models use the direct sample estimates (described above), combined with forecasts of historical (benchmarked) data to decrease volatility in estimation. Two different models (Fay-Herriot Model and Small Domain Model) are used depending on the industry level being estimated. For more detailed information about each model, refer to the BLS Handbook of Methods.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Seasonal adjustment.** Payroll employment data are seasonally adjusted for states, metropolitan areas, and metropolitan divisions at the total nonfarm level. For states, data are seasonally adjusted at the supersector level as well. Revisions to historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

Payroll employment data are seasonally adjusted concurrently, using all available estimates, including those for the current month, to develop sample-based seasonal factors. Concurrent sample-based factors are created every month for the current month's preliminary estimate as well as the previous month's final estimate in order to incorporate real-time estimates.

## Reliability of the estimates

The estimates presented in this news release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

## Use of error measures

**Civilian labor force and unemployment estimates.** Measures of sampling error are not available for metropolitan areas or metropolitan divisions. Model-based error measures for states are available on the BLS website at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm). Measures of nonsampling error are not available for the areas contained in this news release. Information on recent data revisions for states and local areas is available online at [www.bls.gov/lau/launews1.htm](http://www.bls.gov/lau/launews1.htm).

**Employment estimates.** Changes in metropolitan area nonfarm payroll employment are cited in the analysis of this news release only if they have been determined to be statistically significant at the 90-percent confidence level. Measures of sampling error for the total nonfarm employment series are available for metropolitan areas and metropolitan divisions at [www.bls.gov/web/laus/790stderr.htm](http://www.bls.gov/web/laus/790stderr.htm). Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states at the supersector level and for the private service-providing, goods-producing, total private and total nonfarm levels are available on the BLS website at [www.bls.gov/web/laus/790stderr.htm](http://www.bls.gov/web/laus/790stderr.htm). Information on recent benchmark revisions is available online at [www.bls.gov/web/laus/benchmark.pdf](http://www.bls.gov/web/laus/benchmark.pdf).

## Area definitions

The substate area data published in this news release reflect the delineations issued by the U.S. Office of Management and Budget on April 10, 2018. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available online at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

## Additional information

Estimates of unadjusted and seasonally adjusted civilian labor force and unemployment data for states and seven substate areas are available in the news release *State Employment and Unemployment*. Estimates of civilian labor force and unemployment for all states, metropolitan areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available online at [www.bls.gov/lau/](http://www.bls.gov/lau/). Employment data from the CES program are available on the BLS website at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this news release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

# LABOR FORCE DATA

## NOT SEASONALLY ADJUSTED

**Table 1. Civilian labor force and unemployment by state and metropolitan area**

State and area	Civilian labor force				Unemployed

<sup>1</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>2</sup> The area boundary does not reflect the Office of Management and Budget delineation.

p Preliminary

— Data not available.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data refer to place of residence. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, NJ, are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, DC-VA-MD-WV, the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>2</sup> Area boundary does not reflect official OMB delineation.

<sup>p</sup> Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/usmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

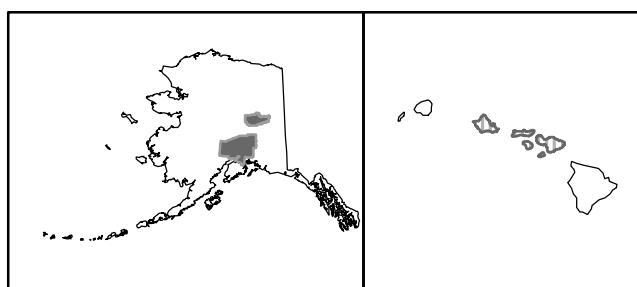

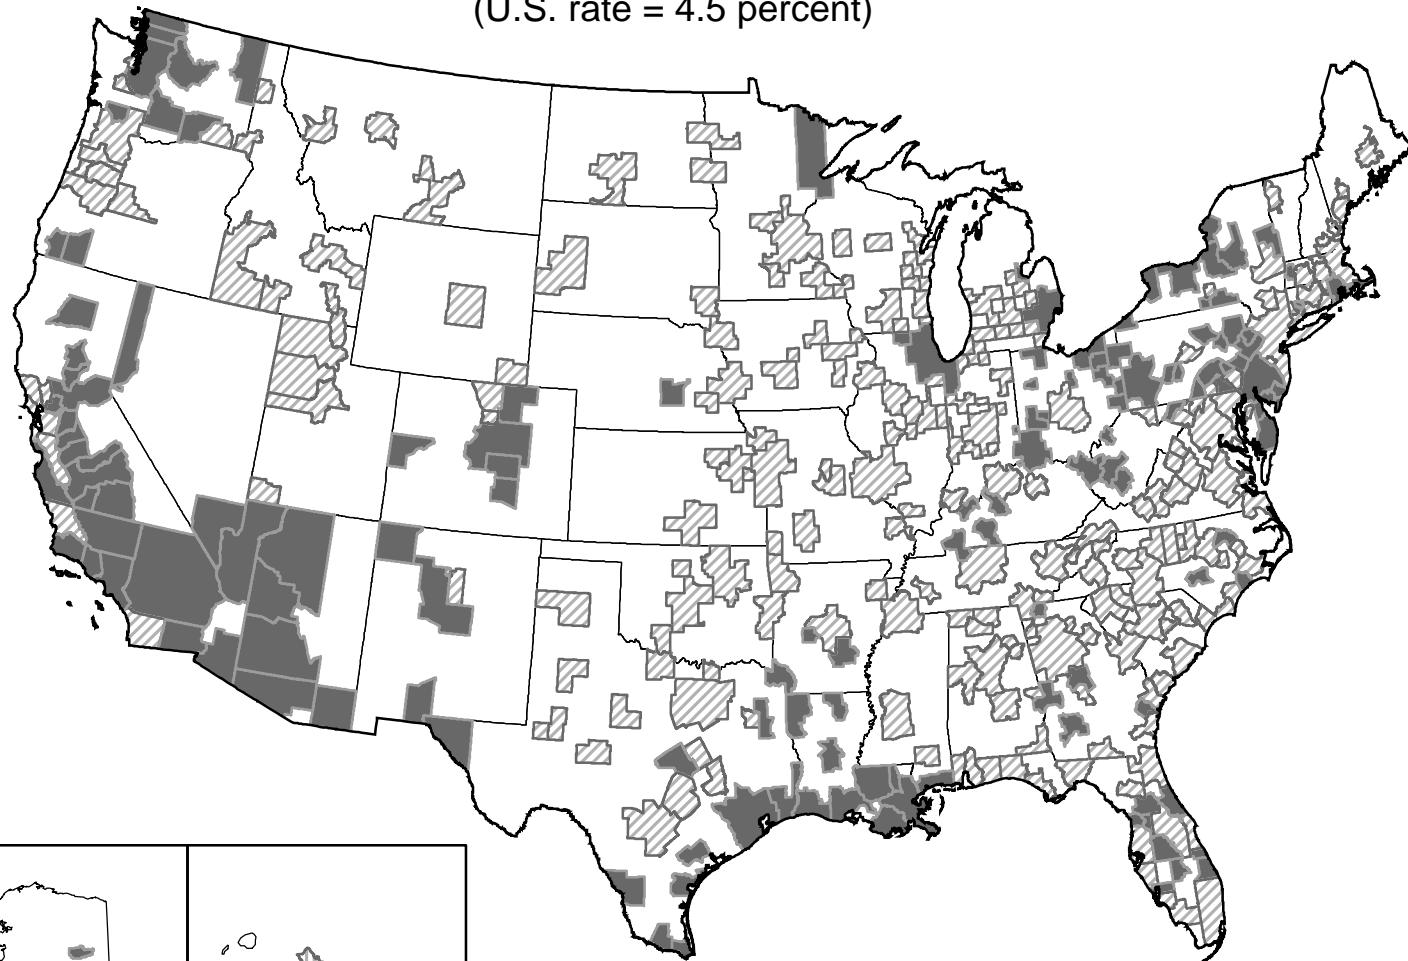

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and available at <https://www.bls.gov/lau/lausma.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, NJ, are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, DC-VA-MD-WV, the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.
