

# NEWS RELEASE

BUREAU OF LABOR STATISTICS  
U. S. DEPARTMENT OF LABOR

For release 10:00 a.m. (ET) Wednesday, June 28, 2023

USDL-23-1418

Technical information:

Employment: (202) 691-6559 • sminfo@bls.gov • www.bls.gov/sae  
Unemployment: (202) 691-6392 • lausinfo@bls.gov • www.bls.gov/lau

Media contact: (202) 691-5902 • PressOffice@bls.gov

## METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — MAY 2023

Unemployment rates were lower in May than a year earlier in 177 of the 389 metropolitan areas, higher in 158 areas, and unchanged in 54 areas, the U.S. Bureau of Labor Statistics reported today. A total of 12 areas had jobless rates of less than 2.0 percent and 6 areas had rates of at least 8.0 percent. Nonfarm payroll employment increased over the year in 84 metropolitan areas, decreased in 1 area, and was essentially unchanged in 304 areas. The national unemployment rate in May was 3.4 percent, not seasonally adjusted, the same as a year earlier.

This news release presents statistics from two monthly programs. The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the national household survey estimates. These data pertain to individuals by where they reside. The employment data are from an establishment survey that measures nonfarm employment, hours, and earnings by industry. These data pertain to jobs on payrolls defined by where the establishments are located. For more information about the concepts and statistical methodologies used by these two programs, see the Technical Note.

### Metropolitan Area Unemployment (Not Seasonally Adjusted)

In May, Burlington-South Burlington, VT, had the lowest unemployment rate, 1.3 percent. The next lowest rate was in Manchester, NH, 1.4 percent. El Centro, CA, had the highest rate, 16.0 percent. A total of 215 areas had May jobless rates below the U.S. rate of 3.4 percent, 153 areas had rates above it, and 21 areas had rates equal to that of the nation. (See table 1 and map 1.)

The largest over-the-year unemployment rate decreases in May occurred in New Bedford, MA, and Pittsfield, MA (-1.8 percentage points each). Eighteen other areas had rate declines of at least 1.0 percentage point. El Centro, CA, had the largest over-the-year rate increase in May (+3.7 percentage points).

Of the 51 metropolitan areas with a 2010 Census population of 1 million or more, Birmingham-Hoover, AL, had the lowest jobless rate in May, 2.0 percent. The next lowest rate was in Boston-Cambridge-Nashua, MA-NH, 2.1 percent. Las Vegas-Henderson-Paradise, NV, had the highest rate, 5.6 percent. Twenty-two large areas had over-the-year unemployment rate decreases, 21 had

increases, and 8 had no change. The largest rate declines occurred in Boston-Cambridge-Nashua, MA-NH (-1.2 percentage points), and Cleveland-Elyria, OH (-1.1 points). The largest jobless rate increases were in Riverside-San Bernardino-Ontario, CA, and San Jose-Sunnyvale-Santa Clara, CA (+1.0 percentage point each).

### **Metropolitan Division Unemployment (Not Seasonally Adjusted)**

Eleven of the most populous metropolitan areas are made up of 38 metropolitan divisions, which are essentially separately identifiable employment centers. In May, Nashua, NH-MA, had the lowest division unemployment rate, 1.6 percent. Los Angeles-Long Beach-Glendale, CA, had the highest rate among the divisions, 4.8 percent. (See table 2.)

In May, 23 metropolitan divisions had over-the-year unemployment rate decreases, 13 had increases, and 2 had no change. The largest rate decline occurred in Lawrence-Methuen Town-Salem, MA-NH (-1.6 percentage points). The largest over-the-year jobless rate increase occurred in Oakland-Hayward-Berkeley, CA (+0.9 percentage point).

### **Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)**

In May, nonfarm payroll employment increased over the year in 84 metropolitan areas, decreased in 1 area, and was essentially unchanged in 304 areas. The largest over-the-year employment increases occurred in New York-Newark-Jersey City, NY-NJ-PA (+254,700), Dallas-Fort Worth-Arlington, TX (+172,300), and Los Angeles-Long Beach-Anaheim, CA (+143,400). The largest over-the-year percentage gains in employment occurred in Midland, TX (+7.7 percent), and Corvallis, OR (+6.3 percent), followed by Charleston-North Charleston, SC, and Hanford-Corcoran, CA (+5.9 percent each). The over-the-year decrease in employment occurred in Elkhart-Goshen, IN (-6,600, or -4.4 percent). (See table 3 and map 2.)

Over the year, nonfarm employment increased in 35 metropolitan areas with a 2010 Census population of 1 million or more, while employment was essentially unchanged in 16 areas. The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in San Antonio-New Braunfels, TX (+4.6 percent), and Tampa-St. Petersburg-Clearwater, FL (+4.3 percent), followed by Dallas-Fort Worth-Arlington, TX, and Las Vegas-Henderson-Paradise, NV (+4.2 percent each).

### **Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)**

In May, nonfarm payroll employment increased over the year in 18 metropolitan divisions and was essentially unchanged in 20 divisions. The largest over-the-year increases in employment among the metropolitan divisions occurred in New York-Jersey City-White Plains, NY-NJ (+212,600), Dallas-Plano-Irving, TX (+121,800), and Los Angeles-Long Beach-Glendale, CA (+97,800). (See table 4.)

The largest over-the-year percentage increases in employment occurred in Fort Worth-Arlington, TX (+4.4 percent), Dallas-Plano-Irving, TX (+4.2 percent), and Miami-Miami Beach-Kendall, FL (+4.1 percent).

---

**The State Employment and Unemployment news release for June is scheduled to be released on Friday, July 21, 2023, at 10:00 a.m. (ET). The Metropolitan Area Employment and Unemployment news release for June is scheduled to be released on Wednesday, August 2, 2023, at 10:00 a.m. (ET).**

**Current Employment Statistics (CES) Data Corrections**

This news release contains corrections to errors in previously released employment data in table 3. A complete list of corrections in this news release and in the CES (State and Area) database can be found at [www.bls.gov/bls/errata/sae\\_errata.htm](http://www.bls.gov/bls/errata/sae_errata.htm).

# Technical Note

This news release presents civilian labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 389 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 7 areas in Puerto Rico. Estimates for 38 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release *State Employment and Unemployment*, and are republished in this news release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

## Civilian labor force and unemployment—from the LAUS program

**Definitions.** The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employed persons and unemployed persons on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and older. *Employed* persons are those who did any work at all for pay or profit in the reference week (typically the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *civilian labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the civilian labor force.

**Method of estimation.** Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimates are also produced for the following areas and their respective balances: the Chicago-Naperville-Arlington Heights, IL Metropolitan Division; Cleveland-Elyria, OH Metropolitan Statistical Area; Detroit-Warren-Dearborn, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; and Seattle-Bellevue-Everett, WA Metropolitan Division. Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate

areas in this news release, estimates are prepared through indirect estimation procedures using a building-block approach. Estimates of employed persons, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state Unemployment Insurance (UI) laws and entrants to the labor force from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated model-based area totals. A detailed description of the estimation procedures is available from BLS upon request.

**Annual revisions.** Civilian labor force and unemployment data shown for the prior year reflect adjustments made at the beginning of each year, usually implemented with the issuance of January estimates. The adjusted model-based estimates typically reflect updated population data from the U.S. Census Bureau, any revisions in other input data sources, and model re-estimation. All substate estimates then are re-estimated using updated inputs and adjusted to add to the revised model-based totals. In early 2021, a new generation of time-series models was implemented, resulting in the replacement of data back to the series beginnings.

## Employment—from the CES program

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2022 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible, these data are produced using a "weighted link relative" estimation technique in which a ratio of current month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria. For some employment series, the estimates are produced with a model that uses direct sample estimates (described above) combined with other regressors to compensate for smaller sample sizes.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to

adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Seasonal adjustment.** Payroll employment data are seasonally adjusted for states, metropolitan areas, and metropolitan divisions at the total nonfarm level. For states, data are seasonally adjusted at the supersector level as well. Revisions to historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

Payroll employment data are seasonally adjusted concurrently, using all available estimates, including those for the current month, to develop sample-based seasonal factors. Concurrent sample-based factors are created every month for the current month's preliminary estimate as well as the previous month's final estimate.

## **Reliability of the estimates**

The estimates presented in this news release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

## **Use of error measures**

**Civilian labor force and unemployment estimates.** Measures of sampling error are not available for metropolitan areas or metropolitan divisions. Model-based error measures for states are available on the BLS website at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm). Measures of nonsampling error are not available for the areas contained in this news release. Information on recent data revisions for states and local areas is available online at [www.bls.gov/lau/launews1.htm](http://www.bls.gov/lau/launews1.htm).

**Employment estimates.** Changes in metropolitan area nonfarm payroll employment are cited in the analysis of this news release only if they have been determined to be statistically significant at the 90-percent confidence level. Measures of sampling error for the total nonfarm employment series are available for metropolitan areas and metropolitan divisions at [www.bls.gov/web/laus/790stderr.htm](http://www.bls.gov/web/laus/790stderr.htm). Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states at the supersector level and for the private service providing, goods-producing, total private and total nonfarm levels are available on the BLS website at [www.bls.gov/web/laus/790stderr.htm](http://www.bls.gov/web/laus/790stderr.htm). Information on recent benchmark revisions is available online at [www.bls.gov/web/laus/benchmark.pdf](http://www.bls.gov/web/laus/benchmark.pdf).

## **Area definitions**

The substate area data published in this news release reflect the delineations issued by the U.S. Office of Management and Budget on April 10, 2018. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available online at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

## **Additional information**

Estimates of unadjusted and seasonally adjusted civilian labor force and unemployment data for states and seven substate areas are available in the news release *State Employment and Unemployment*. Estimates of civilian labor force and unemployment for all states, metropolitan areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available online at [www.bls.gov/lau/](http://www.bls.gov/lau/). Employment data from the CES program for states and metropolitan areas are available on the BLS website at [www.bls.gov/sae/](http://www.bls.gov/sae/).

<sup>1</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>2</sup> The area boundary does not reflect the Office of Management and Budget delineation.

<sup>p</sup> Preliminary

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data refer to place of residence. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, NJ, are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, DC-VA-MD-WV, the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> Data for Colorado and the Denver-Aurora-Lakewood, CO MSA featured in this table were incorrectly published on May 19, 2023. BLS corrected the data in the LABSTAT database on June 16, 2023. See [https://www.bls.gov/bls/errata/sae\\_errata.htm](https://www.bls.gov/bls/errata/sae_errata.htm) for a complete listing of impacted series and BLS products.

<sup>2</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>3</sup> Area boundary does not reflect official OMB delineation.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area delineations are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

## ESTABLISHMENT DATA

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

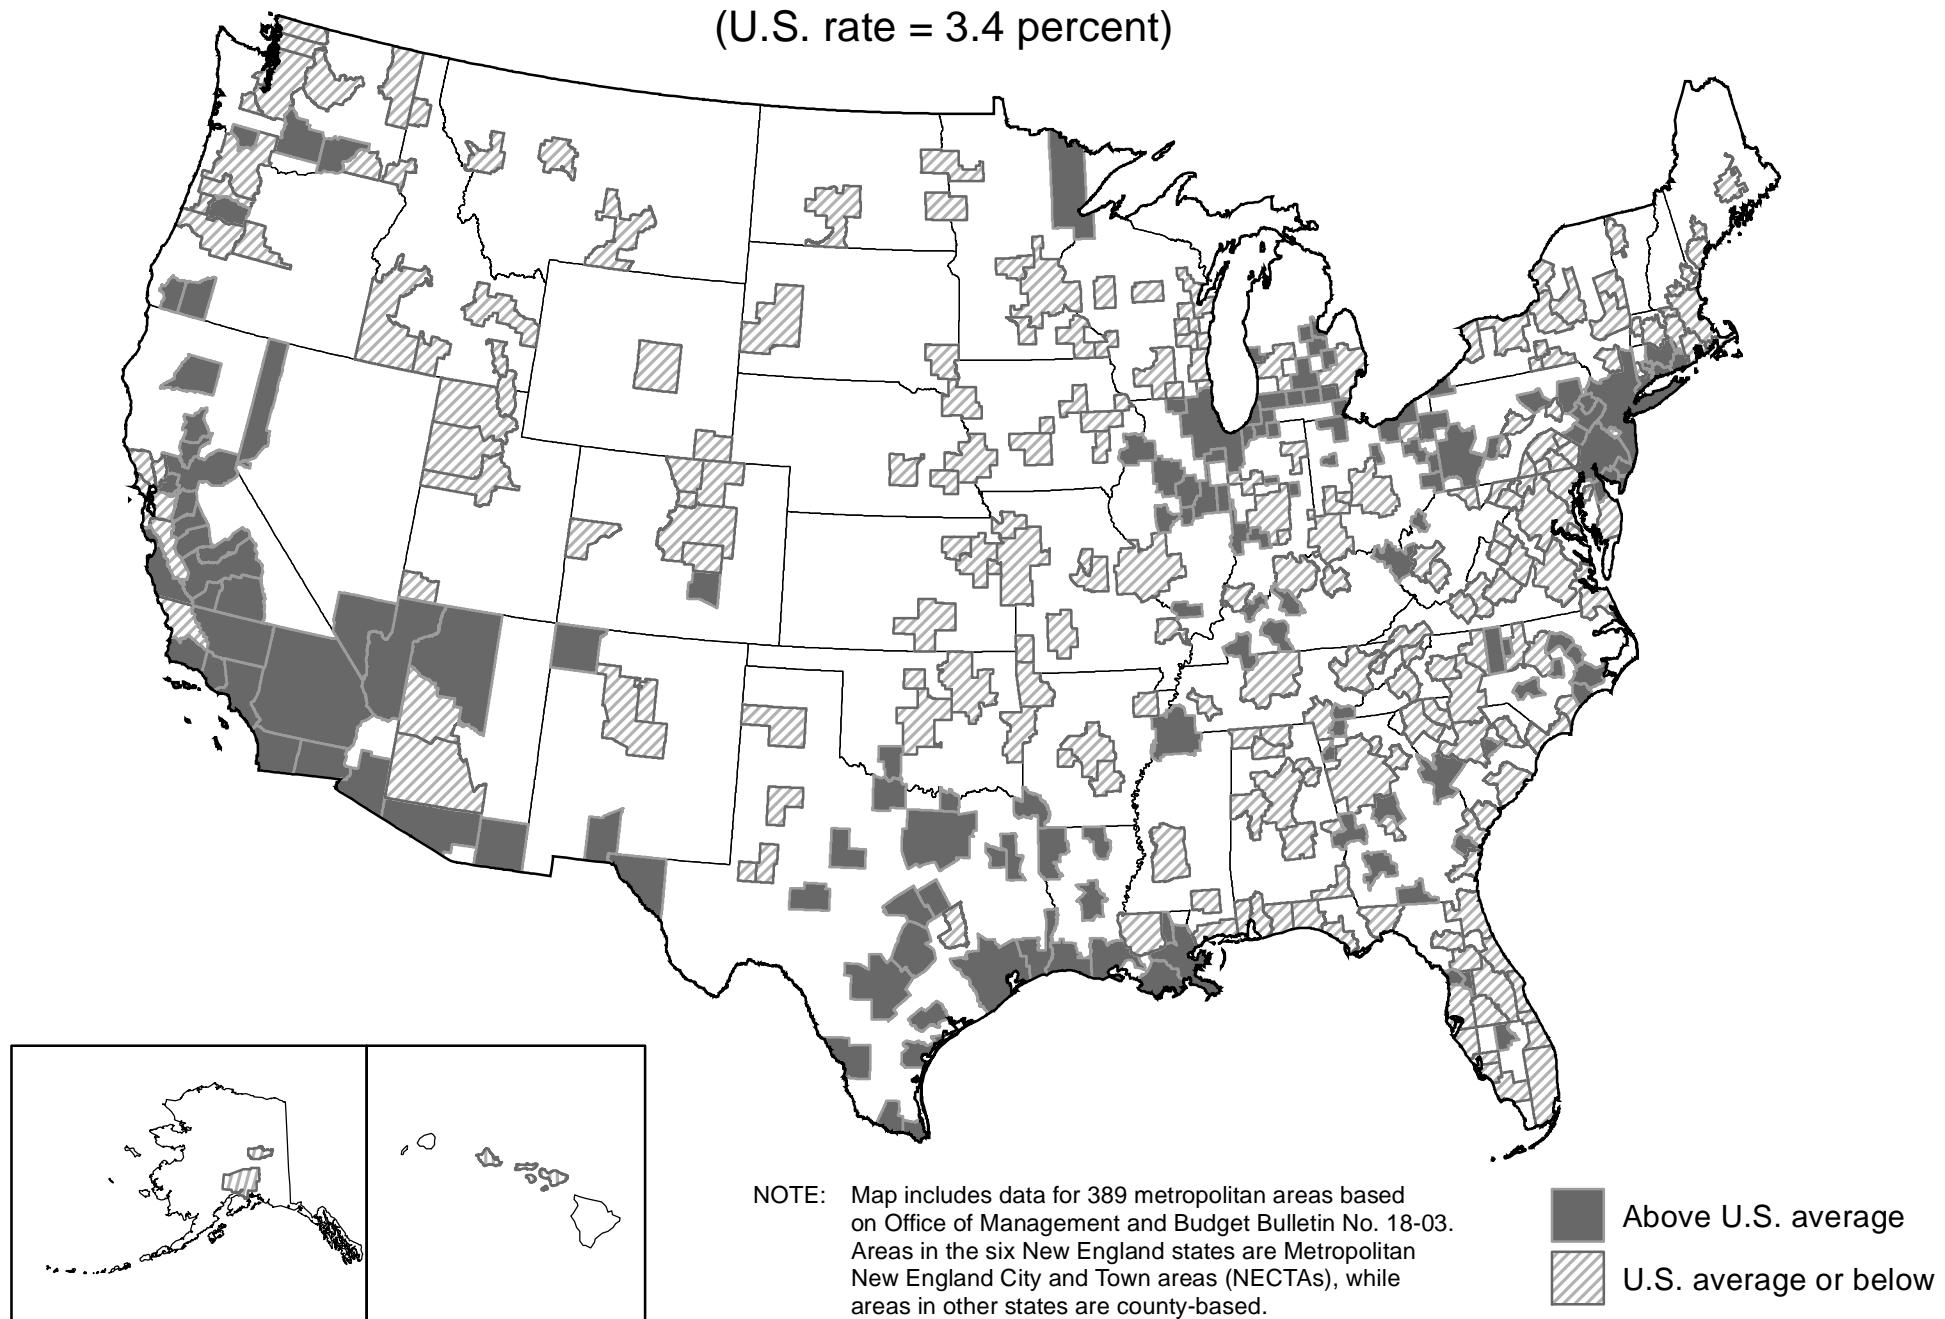

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

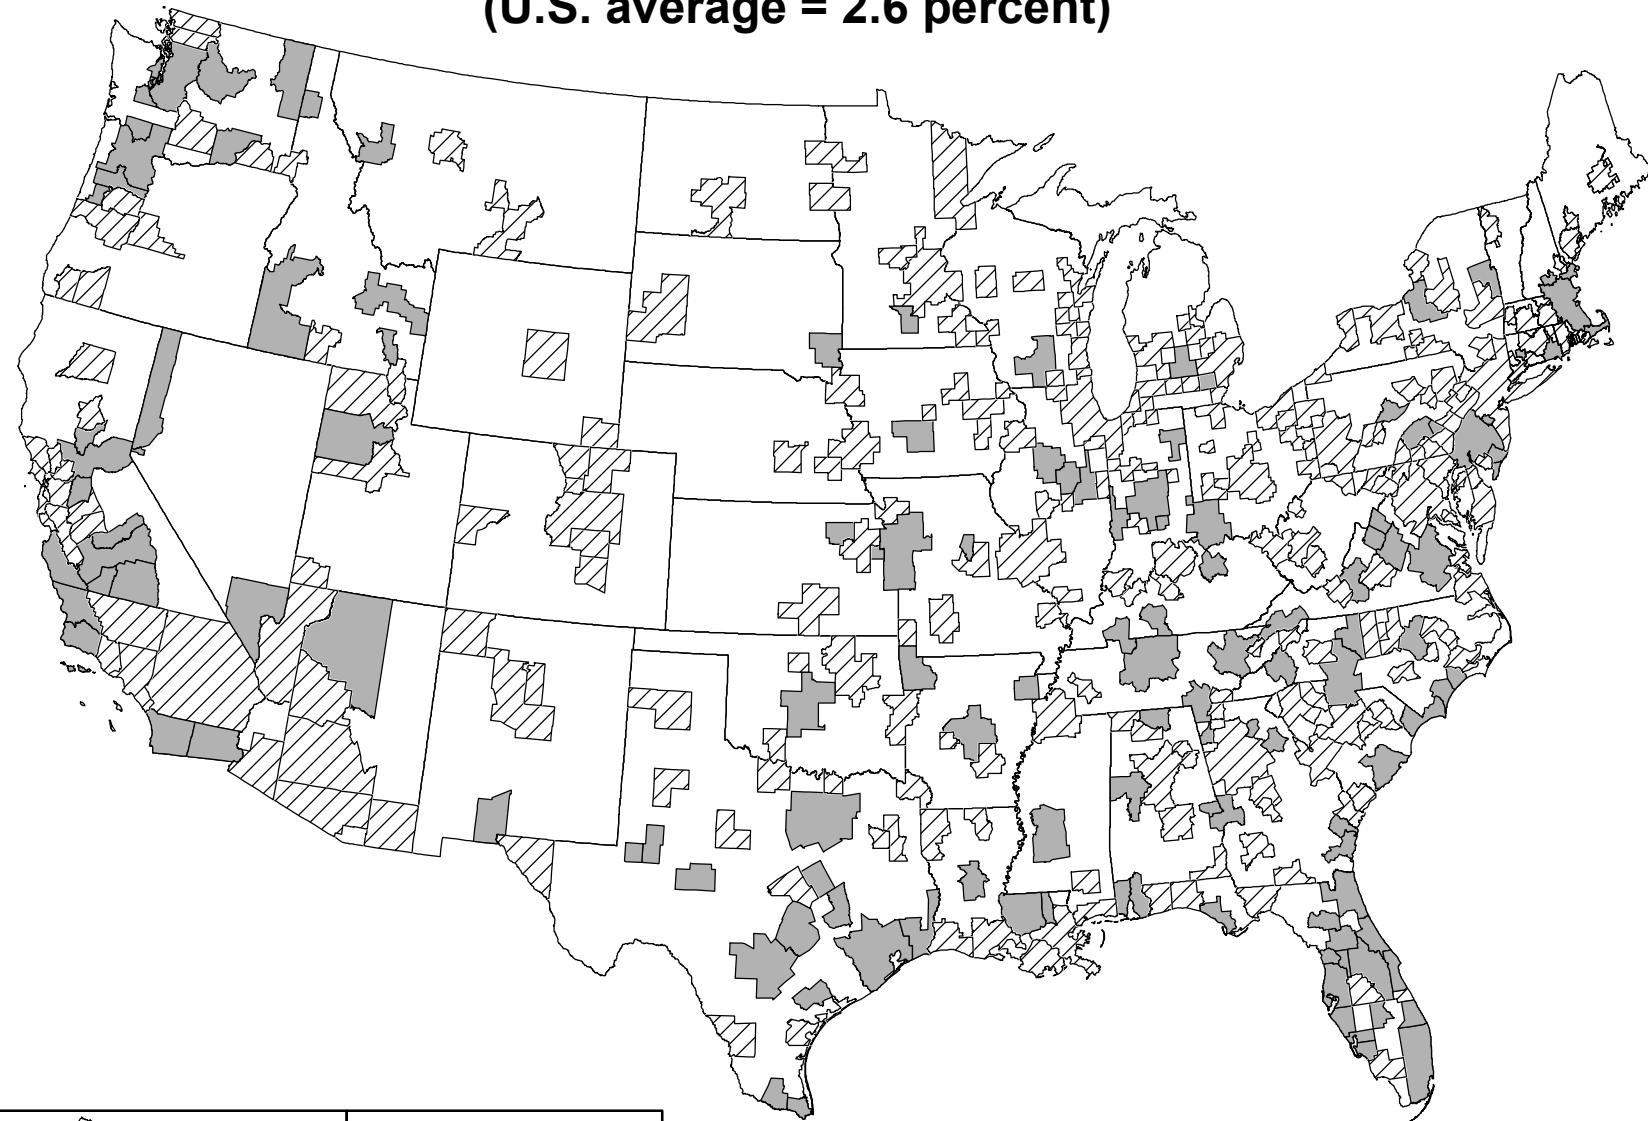

NOTE: Data are counts of jobs by place of work. Data have been revised to reflect 2022 benchmark levels. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 18-03, dated April 10, 2018, and available at <https://www.bls.gov/lau/usmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, NJ, are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, DC-VA-MD-WV, the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.

# Map 1. Unemployment rates for metropolitan areas, not seasonally adjusted, May 2023

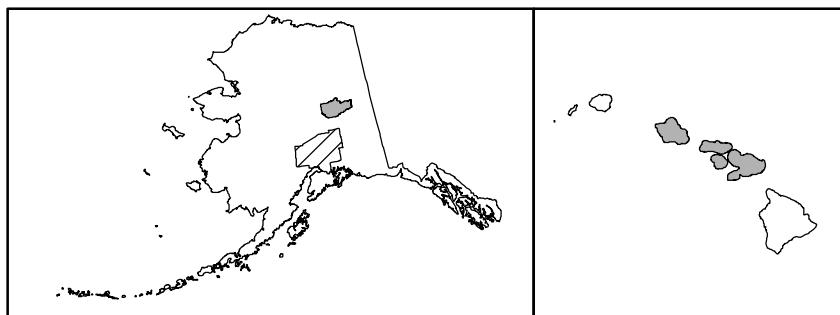

(U.S. rate = 3.4 percent)

**Map 2. Over-the-year percentage change in employment, by metropolitan area,  
not seasonally adjusted, May 2023  
(U.S. average = 2.6 percent)**

NOTE: Map includes data for 389 metropolitan areas based on Office of Management and Budget Bulletin No. 18-03. Areas in the six New England states are Metropolitan New England City and Town areas (NECTAs), while areas in other states are county based.
