## U.S. IMPORT AND EXPORT PRICE INDEXES – OCTOBER 2019

U.S. import prices fell 0.5 percent in October, the U.S. Bureau of Labor Statistics reported today, following a 0.1-percent increase the previous month. The decrease in October was driven by lower petroleum prices, which declined 3.7 percent; prices for all imports excluding petroleum fell 0.1 percent. The price index for U.S. exports decreased 0.1 percent in October, after declining 0.2 percent in September.

Chart 1. One-month and 12-month percent changes in the Import Price Index: October 2018 – October 2019

### Imports

Prices for U.S. imports decreased 0.5 percent in October, after rising 0.1 percent in September and declining 0.6 percent in August. The U.S. import price index declined 3.0 percent from October 2018 to October 2019. The 3.0-percent 12-month decrease was the largest over-the-year decline since the index fell 3.7 percent during the period ended July 2016. (See table 1.)

**Fuel Imports:** Import fuel prices declined 2.9 percent in October after increasing 1.5 percent the previous month. A 3.7-percent drop in petroleum prices drove the October decrease, more than offsetting a 32.0-percent increase in natural gas prices. Fuel prices declined 13.7 percent over the past year. Prices for import petroleum fell 14.7 percent for the year ended in October and natural gas prices declined 1.6 percent over the same period.

**All Imports Excluding Fuel:** Prices for nonfuel imports declined 0.2 percent in October following 2 consecutive monthly decreases. Falling prices for nonfuel industrial supplies and materials; foods, feeds, and beverages; consumer goods; and capital goods all contributed to the October decline. The price index for nonfuel imports declined 1.4 percent over the past 12 months, driven primarily by a 1.6-percent drop in capital goods prices and a 3.0-percent decrease in prices for nonfuel industrial supplies and materials.

*Nonfuel Industrial Supplies and Materials:* Prices for nonfuel industrial supplies and materials decreased 0.9 percent in October, after increasing 0.5 percent in September. The drop in October was driven by a 2.2-percent decrease in prices for unfinished metals.

*Finished Goods:* Prices for imported finished goods mostly decreased in October. The price indexes for both consumer and capital goods declined 0.1 percent in October after each decreased 0.1 percent in September. The price index for automotive vehicles was unchanged in October after declining 0.1 percent the previous month.

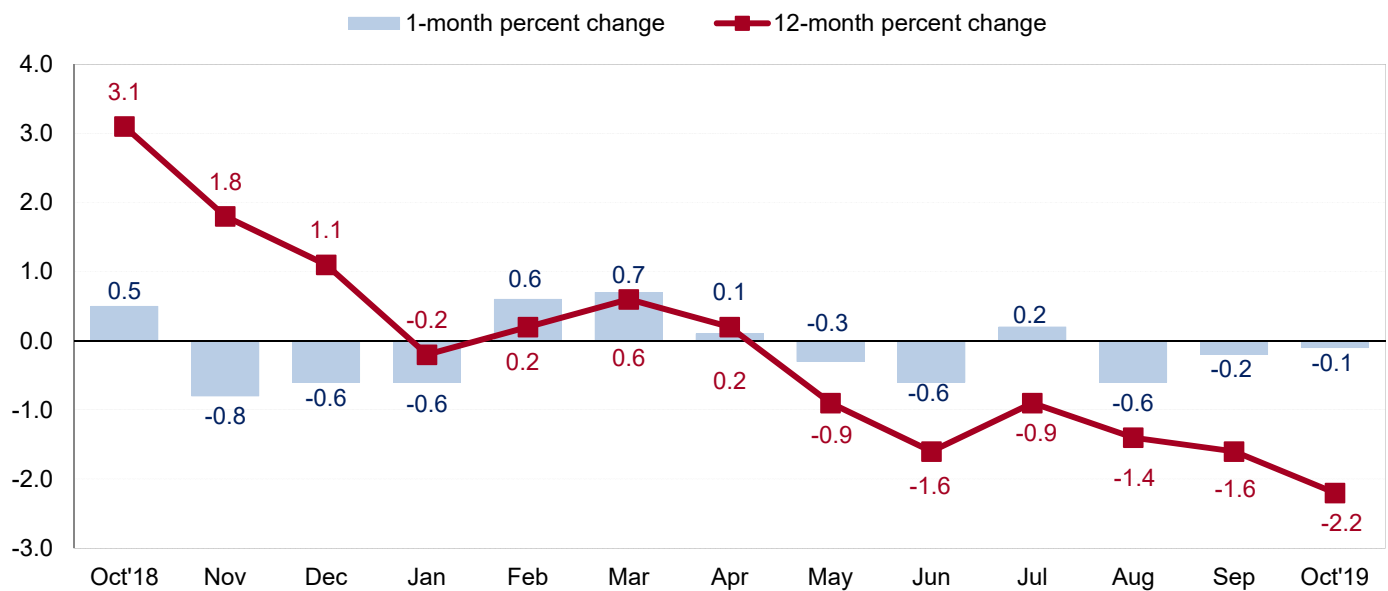

*Foods, Feeds, and Beverages:* The price index for import foods, feeds, and beverages fell 0.4 percent in October following a 0.8-percent decrease in September. A 3.6-percent decrease in vegetable prices led the October decline.

r Revised

**Chart 2. One-month and 12-month percent change in the Export Price Index: October 2018 – October 2019**

## Exports

The price index for U.S. exports decreased 0.1 percent in October following a 0.2-percent drop in September and a 0.6-percent decrease in August. Price decreases for nonagricultural exports in October offset increased prices for agricultural exports. Overall export prices declined 2.2 percent over the past year, the largest 12-month decrease in the index since a 2.4-percent drop in August 2016. (See table 2.)

**Agricultural Exports:** Agricultural export prices increased 1.9 percent in October, after falling 1.7 percent the previous month. A 4.9-percent increase in soybean prices drove the October advance. Agricultural export prices increased 2.2 percent from October 2018 to October 2019.

**All Exports Excluding Agriculture:** Prices for nonagricultural exports decreased 0.3 percent in October following a 0.1-percent drop in September and a 0.3-percent decline in August. Price declines for nonagricultural industrial supplies and materials, capital goods, and consumer goods led the October decrease. The price index for nonagricultural exports fell 2.7 percent during the 12 months ended in October, the largest over-the-year decline since a 3.0-percent drop in July 2016. Lower prices for nonagricultural industrial supplies and materials led the October 12-month drop.

*Nonagricultural Industrial Supplies and Materials:* The price index for nonagricultural industrial supplies and materials decreased 0.6 percent in October following a 0.2-percent drop in September. The October decline was driven by lower prices for paper, chemicals, and nonferrous metals. Nonagricultural industrial supplies and materials prices fell 8.4 percent over the past year, the largest 12-month drop since a 9.8-percent decline in June 2016.

*Finished Goods:* Prices for export finished goods were mostly down in October. Capital goods prices fell 0.3 percent; consumer goods prices decreased 0.2 percent; and prices for automotive vehicles were unchanged. The October decline in capital goods prices was led by a 1.5-percent drop in the price index for computers, peripherals, and semiconductors. Consumer goods prices were driven down by lower prices for household goods.

## **Measures of Import and Export Prices by Locality**

**Imports by Locality of Origin:** Prices for imports from China decreased 0.1 percent in October, after falling 0.1 percent in each of the 2 previous months; import prices from China have not increased on a monthly basis since advancing 0.1 percent in May 2018. The price index for imports from China declined 1.6 percent over the past year. Import prices from Japan edged up 0.1 percent in October following a decrease of 0.1 percent in September. Import prices from Japan increased 0.2 percent over the past 12 months. Prices for imports from the European Union decreased 0.1 percent in October, after increasing 0.1 percent the previous month. The price index for imports from Canada decreased 1.5 percent in October, the largest monthly decline since falling 4.4 percent in June 2019. Import prices from Canada rose 2.2 percent over the past year. Prices for imports from Mexico declined 0.3 percent in October following a 0.2-percent drop in September. (See table 7.)

**Exports by Locality of Destination:** Prices for exports to China declined 0.2 percent in October, after edging down 0.1 percent in September. Export prices to China fell 1.6 percent over the past year. Prices for exports to Japan rose 0.7 percent in October following a 0.3-percent increase the previous month. The price index for exports to Japan advanced 0.5 percent over the past year. Prices for exports to the European Union decreased 0.4 percent in October. Despite the October decline, export prices to the European Union rose 0.8 percent over the past 12 months. The price index for exports to Canada increased 0.2 percent in October and export prices to Mexico decreased 0.2 percent. (See table 8.)

**Terms of Trade Indexes:** Terms of Trade indexes are based on country, region, or grouping and measure the change in the purchasing power of exports relative to imports. The U.S. terms of trade with China decreased 0.1 percent in October, after recording no change in September. In October, lower export prices to China more than offset price declines for imports from China. The index for U.S. terms of trade with China was unchanged from October 2018 to October 2019. U.S. terms of trade with Japan increased 0.5 percent in October following a 0.4-percent advance in September. The U.S. terms of trade with Japan rose 0.2 percent over the year ended in October. The index for U.S. terms of trade with the European Union decreased 0.3 percent in October, after declining 0.1 percent the previous month. The U.S. terms of trade with Mexico ticked up 0.1 percent in October and decreased 1.3 percent over the past 12 months. U.S. terms of trade with Canada increased 1.7 percent in October and declined 2.6 percent over the past year. (See table 9.)

## **Import and Export Services**

**Imports:** Import air passenger fares rose 3.4 percent in October following a 9.1-percent advance in September. Higher Asian fares drove the October increase. Import air passenger fares fell 4.9 percent over the 12 months ended in October. Import air freight prices increased 1.4 percent in October and fell 9.2 percent over the past year. (See table 10.)

**Exports:** The index for export air passenger fares declined 2.1 percent in October, after a 5.2-percent decrease the previous month. Lower Asian, Latin American/Caribbean, and European fares contributed to the October decline. Export air passenger fares fell 3.6 percent from October 2018 to October 2019. Export air freight prices increased 0.4 percent in October following a 1.4-percent drop in September. Prices for export air freight declined 1.5 percent over the past 12 months, the largest over-the-year decrease since a 2.9-percent drop in November 2018.

---

**Import and Export Price Index data for November are scheduled for release on Friday, December 13, 2019 at 8:30 a.m. (EST).**

## TECHNICAL NOTE

**Import and Export Goods and Services Price Indexes** - All indexes use a modified Laspeyres formula and are not seasonally adjusted. Price indexes are reweighted annually, with a 2-year lag in the weights. Published series use a base year of 2000=100 where possible. More detailed index series and additional information may be obtained at [www.bls.gov/mxp](http://www.bls.gov/mxp) or by calling (202) 691-7101.

**Merchandise Goods Classification Systems** - The merchandise price indexes are published using three classification systems. Items are classified by end use according to the Bureau of Economic Analysis Classification System, by industry according to the North American Industry Classification System (NAICS), and by product category according to the Harmonized System (HS). While classification by end use and product category are self-explanatory, some notes are in order for classifying items by industry. In the NAICS imports and exports tables, items are classified by output industry, not input industry. As an example, NAICS import index 326 (plastics and rubber products manufacturing) includes outputs such as manufactured plastic rather than inputs such as petroleum. The NAICS classification structure also matches the classification system used by the Producer Price Index (PPI) to produce the NAICS primary products indexes.

**Import Price Goods Indexes** - Items are classified by the Harmonized Tariff Schedule of the United States Annotated (TSUSA). Import prices are based on U.S. dollar prices paid by the U.S. importer. The prices are generally either "free on board" (f.o.b.) foreign port or "cost, insurance, and freight" (c.i.f.) U.S. port transaction prices, depending on the practices of the individual industry. The index for crude petroleum is calculated from data collected by the U.S. Department of Energy.

**Export Price Goods Indexes** - Items are classified by the Harmonized Schedule B classification system of the U.S. Bureau of the Census. The prices used are generally either "free alongside ship" (f.a.s.) factory or "free on board" (f.o.b.) transaction prices, depending on the practices of the individual industry. Prices used in the grain index, excluding rice, are obtained from the U.S. Department of Agriculture.

**Services Price Indexes** - Indexes for import and export air passenger fares calculate changes in the average revenue received per passenger by foreign carriers from U.S. residents and by U.S. carriers from foreign residents, respectively. Data are obtained from an airline consulting service and report on tickets sold by travel agencies, travel websites, and directly by the airlines. Taxes and fees are included in both the import and export air passenger fares indexes. Import air passenger fares data have used the airline consulting service source since September 2008. Before April 2018, the export air passenger fares data were collected directly by BLS from U.S. airlines. The air freight indexes are calculated from data collected directly from airlines. These data exclude mail and passenger baggage. The scope of the service being priced is the movement of freight from airport to airport only, and does not include any ground transportation or port service. The air freight indexes are presented using two definitions: balance of payments (which represents transactions between U.S. and foreign residents) and international (which represents transactions inbound to and outbound from the United States.) Fact sheets specifying detailed information for each services industry are available at [www.bls.gov/mxp](http://www.bls.gov/mxp) under "MXP Publications."

**Import Price Indexes by Locality of Origin** - Prices used in these indexes are a subset of the data collected for the import price indexes. The indexes are specific to a country, region, or grouping and, beginning with January 2002, are based on the North American Industry Classification System (NAICS) covering goods-producing industries. Nonmanufactured goods are defined as NAICS 11 and 21, and manufactured goods are defined as NAICS 31-33.

**Export Price Indexes by Locality of Destination** - Prices used in these indexes are a subset of the data collected for the export price indexes. The indexes are specific to a country, region, or grouping and are based on the North American Industry Classification System (NAICS) covering goods-producing industries. Nonmanufactured goods are defined as NAICS 11 and 21, and manufactured goods are defined as NAICS 31-33.

**Terms of Trade Indexes** - Terms of trade indexes measure the relative price of exports in terms of import prices for a specific country, region, or grouping. The indexes are calculated as one country, region, or grouping's all-export goods price index divided by the corresponding all-import goods price index on a scale of 100.

**Relative Importance** - A relative importance is a specific index's price-updated value share (expressed as a percentage) of overall imports or exports at a specific point in time. Relative importance values are affected by the trade weights at the point indexes are reweighted and index changes relative to other indexes since the reweight point. If an index is rising in value relative to other indexes over time, the relative importance will increase as well.

**Revision Policy** - To reflect the availability of late reports and corrections by respondents, monthly data may be revised in each of the 3 months after original publication. After 3 months, no further data revisions take place. For example, data first published in the January release will be subject to revision in the releases for February, March, and April.

**Rounding Policy** - Index values are rounded to the tenth decimal place after being calculated. All percent changes are then derived from the rounded index values and subsequently rounded to the tenth decimal place.

**Uses of the Data** - The primary use of the indexes is to deflate trade statistics, notably the foreign trade sector of the National Income and Product Accounts (NIPA) constructed by the Department of Commerce. Other published indexes are useful for general market analysis. For trade in international services, balance of payments indexes are used for deflating NIPA, while international indexes are more appropriate for market analysis.

**Email Subscription** - The U.S. import and export price indexes news release is available through an email subscription service at [www.bls.gov/bls/list.htm](http://www.bls.gov/bls/list.htm).

**Additional Information** - More detailed data are available on the Import/Export Price Indexes home page at [www.bls.gov/mxp](http://www.bls.gov/mxp). For import and export price indexes data requests, send an email to [mxpinfo@bls.gov](mailto:mxpinfo@bls.gov).

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: (202)-691-5200; Federal Relay Service: 1-(800)-877-8339.
