

MONTHLY LABOR REVIEW

Volume 135, Number 6

June 2012

Time use of youths by immigrant and native-born parents: ATUS results 3

American Time Use Survey data indicate that native-born and immigrant youths pass their days in similar ways, but differences exist in time spent studying and in paid employment

Yelizavetta Kofman and Suzanne M. Bianchi

Which industries are shifting the Beveridge curve? 25

The failure of the unemployment rate to improve much despite growth in the economy is attributable to a shortfall in hires per vacancy in all industries, especially construction

Regis Barnichon, Michael Elsby, Bart Hobijn, and Ayşegül Şahin

The hard truth about telecommuting 38

NLSY and CPS data are used to analyze trends over time in the prevalence of telecommuting among employees and the relationship between telecommuting and longer work hours

Mary C. Noonan and Jennifer L. Glass

Industry shifts in hours and nonfatal work injuries and illnesses, 2003–2008 46

Data from the SOII indicate that the total recordable injury and illness rate in the private sector fell during the time period

Alexander Measure
