Labor Force Characteristics by Race and Ethnicity, 2012

n 2012, the unemployment rate for the United States was 8.1 percent; however, the rate varied across race and ethnicity groups. The rates were highest for Blacks (13.8 percent) and for American Indians and Alaska Natives (12.3 percent) and lowest for Asians (5.9 percent) and for Whites (7.2 percent). The jobless rate was 10.3 percent for Hispanics, 11.8 percent for Native Hawaiians and Other Pacific Islanders, and 11.9 percent for people of Two or More Races.

Differences in labor force characteristics emerge when the race and ethnicity groups are compared. These differences reflect a variety of factors, not all of which are measurable. These factors include variations across the groups in educational attainment; the occupations and industries in which the groups work; the geographic areas of the country in which the groups are concentrated, including whether they tend to reside in urban or rural settings; and the degree of discrimination encountered in the workplace. This report describes the labor force characteristics and earnings patterns among the major race and ethnicity groups-Whites, Blacks, Asians, and Hispanics-and provides more detailed data through a set of supporting tables. The report also includes a limited amount of data for American Indians and Alaska Natives and for Native Hawaiians and Other Pacific Islanders-the two remaining race groups-and for people who are of Two or More Races. Due to their relatively small sample size, estimates for these additional groups are not included in all tables. These data are obtained from the Current Population Survey (CPS), a monthly survey of 60,000 households that is a rich source of information on the labor force. For definitions of terms and concepts used in this report, see the accompanying Technical Notes. Additional information about the CPS can be found at www.bls.gov/ cps/documentation.htm.

Labor force participation rates by race and Hispanic or Latino ethnicity, 2012 annual averages

Labor force participation rates

Note: People whose ethnicity is identified as Hispanic or Latino may be of any race. Source: U.S. Bureau of Labor Statistics, Current Population Survey (CPS).

The following sections highlight some of the major findings on the labor force characteristics of race and ethnicity groups in 2012.

Composition of the labor force

Whites made up the majority of the labor force in 2012 (80 percent). Blacks and Asians made up an additional 12 percent and 5 percent, respectively. American Indians and Alaska Natives made up 1 percent of the labor force, while Native Hawaiians and Other Pacific Islanders made up less than 1 percent. People of Two or More Races composed 2 percent of the labor force. (See table 1.)

Sixteen percent of the labor force were people of Hispanic or Latino ethnicity in 2012. People of Hispanic or Latino ethnicity may be of any race. In 2012, the majority of Hispanics (89 percent) were White, 5 percent were Black, and 1 percent were Asian. (See tables 1 and 2.) The majority of Hispanics in the labor force were Mexican (62 percent). The remainder consisted of Central and South Americans (20 percent), Puerto Ricans (9 percent), Cubans (5 percent), and Other Hispanics or Latinos (5 percent). (See table 2.)

Labor force participation

In 2012, Native Hawaiians and Other Pacific Islanders had the highest labor force participation rates (71.4 percent) among the race and ethnicity groups, while American Indians and Alaska Natives and Blacks had the lowest participation rates (59.3 percent and 61.5 percent, respectively). The participation rates for Hispanics, Whites, and Asians, were 66.4 percent, 64.0 percent, and 63.9 percent, respectively. The participation rate for people of Two or More Races was 65.3 percent. (See tables 1, 2, 3, and 4 and chart 1.)

Among adult men (age 20 and over) in the major race and ethnicity groups, Hispanics (81.0 percent) were more likely to be labor force participants than were the other groups, while Blacks (67.7 percent) were less likely. The labor force participation rate was 76.2 percent for Asian men and 73.5 percent for White men. (See table 3.) Among adult women, Blacks (62.6 percent) were more likely than

Chart 1

Chart 2

Educational attainment of the labor force age 25 and over by race and Hispanic or Latino ethnicity, 2012 annual averages

Hispanics (59.5 percent), Whites (58.7 percent), and Asians (58.7 percent) to participate in the labor force.

Employment

In 2012, the employment-population ratio (that is, the proportion of the population that is employed) ranged from 52.1 percent for American Indians and Alaska Natives to 63.0 percent for Native Hawaiians and Other Pacific Islanders. The employment-population ratio was 53.0 percent for Blacks, 57.6 percent for individuals of Two or More Races, 59.4 percent for Whites, 59.5 percent for Hispanics, and 60.1 percent for Asians. (See tables 1, 2, 3, and 5.)

Among adult men (age 20 and older), Hispanics (73.8 percent) continued to have the highest employmentpopulation ratio in 2012, followed by Asians (72.0 percent) and Whites (68.6 percent). The employment-population ratio for Black men, at 58.3 percent, was lower than the ratios for men in other major race and ethnicity groups in 2012, continuing a long-term pattern. Among adult women, the employment-population ratio was 55.3 percent for Asians, 55.1 percent for Blacks, 54.9 percent for Whites, and 53.5 percent for Hispanics in 2012. (See table 3.)

Among teenagers age 16 to 19, the employment-population ratio was higher for Whites than for Hispanics, Blacks, or Asians. In 2012, the ratio for White teens (29.0 percent) was nearly twice that for Asian teens (15.9 percent) and Black teens (16.6 percent). The ratio for Hispanic teens was 22.1 percent.

Educational attainment

Among people age 25 and older, the share of the labor force with at least a high school diploma was about 90 percent for Whites, Blacks, and Asians in 2012. By contrast, 70 percent of Hispanics in the labor force had completed high school. Asians were the most likely of the groups to have graduated from college; 58 percent of Asians in the labor force had a bachelor's degree or higher, compared with 36 percent of Whites, 26 percent of Blacks, and 17 percent of Hispanics. (See table 6 and chart 2.)

Chart 3

Employed people by occupation, race, and Hispanic or Latino ethnicity, 2012 annual averages

Percent of employed

Notes: People whose ethnicity is identified as Hispanic or Latino may be of any race. Data may not sum to 100 percent due to rounding. Source: U.S. Bureau of Labor Statistics, Current Population Survey (CPS).

For all major race and ethnicity groups, higher levels of education are generally associated with a greater likelihood of employment and a lower likelihood of unemployment. Individuals with higher levels of education generally are more likely to be employed in higher paying jobs—such as those in management, professional, and related occupations—than are individuals with less education. However, at nearly every level of education, Blacks and Hispanics were more likely to be unemployed in 2012 than were Whites or Asians. (See table 6.)

Occupation and industry

Occupational categories. The highest paying major occupational category is management, professional, and related occupations. In 2012, 49 percent of employed Asians worked in this occupational group, compared with 39 percent of employed Whites, 30 percent of employed Blacks, and 21 percent of employed Hispanics. (See table 7 and chart 3.) Among employed men, half (50 percent) of Asians worked in management, professional, and related occupations in 2012, compared with 35 percent of Whites, 24 percent of Blacks, and 17 percent of Hispanics. In 2012, 23 percent of employed Black men and 22 percent of employed Hispanic men worked in service occupations, whereas 15 percent of employed Asian men and 14 percent of employed White men worked in these occupations. Employed Black and Hispanic men also were more likely than White or Asian men to work in production, transportation, and material moving occupations. One quarter of employed Hispanic men (25 percent) worked in natural resources, construction, and maintenance occupations, a higher share than for White men (17 percent), Black men (11 percent), or Asian men (6 percent).

In 2012, employed Asian and White women were more likely than other women to work in management, professional, and related occupations—47 percent of Asian women and 43 percent of White women. By contrast, 34 percent of employed Black women and 26 percent of employed Hispanic women worked in this occupational group. Among employed women, 63 percent of Hispanics worked in two job groups—service occupations and sales and office occupations—compared with about 58 percent of Blacks, 51 percent of Whites, and 47 percent of Asians.

In 2012, Hispanics accounted for 15 percent of total employment but were overrepresented by a substantial amount in several occupation categories, including miscellaneous agricultural workers (49 percent), grounds maintenance workers (44 percent), and maids and housekeeping cleaners (43 percent). Blacks made up 11 percent of all employed workers, but accounted for about one-quarter or more of those in several specific occupations, including nursing, psychiatric, and home health aides (35 percent); security guards and gaming surveillance officers (27 percent); and bus drivers (25 percent). Asians accounted for 5 percent of all employed workers but made up a much larger share of workers in several occupation categories, including miscellaneous personal appearance workers (60 percent), software developers (29 percent), and physicians and surgeons (18 percent). Whites made up 81 percent of all employed people, but accounted for 96 percent of farmers, ranchers, and other agricultural managers; 92 percent of construction managers; and 91 percent of carpenters. (See table 8.)

Industry. Employed Hispanic men were more likely to work in the construction industry (17 percent) in 2012 than were White (12 percent), Black (6 percent), and Asian men (4 percent). Hispanic men were less likely than men in the other groups to work in education and health services. Black men were more likely than other men to work in transportation and utilities (12 percent). Eighteen percent of Asian men worked in professional and business services, higher than the shares of White (13 percent), Black (12 percent), and Hispanic men (12 percent). A large share of women in all race and ethnicity groups worked in education and health services in 2012—Black (41 percent), White (36 percent), Asian (31 percent), and Hispanic (30 percent). (See table 9.)

Families and mothers

In 2012, 88 percent of Asian families had an employed family member, compared with 85 percent of Hispanic families and 80 percent of White families. Black families

remained the least likely to have an employed family member (75 percent). (See table 10.)

In 2012, women without a spouse present maintained 44 percent of Black families and 26 percent of Hispanic families. Women without a spouse present maintained about 16 percent of White families and 13 percent of Asian families. Among families maintained by women with no spouse present, Asian families were most likely to have an employed family member (82 percent), while Black families were the least likely to have an employed family member (68 percent). The proportion of White and Hispanic families who were maintained by women with an employed family member was 74 and 73 percent, respectively. In general, families maintained by women without a spouse present are less likely to have an employed family member than married-couple families and families maintained by men.

Among mothers with children under 18, Black mothers were more likely to be in the labor force than White, Asian, or Hispanic mothers. In 2012, 75.4 percent of Black mothers were labor force participants, compared with 70.3 percent for White mothers and 63.2 percent for both Asian and Hispanic mothers. (See table 11.)

Unemployment and not in the labor force

Unemployment. Jobless rates varied considerably by race and ethnicity. In 2012, Blacks (13.8 percent) and American Indians and Alaska Natives (12.3 percent) had the highest unemployment rates, while Asians (5.9 percent) and Whites (7.2 percent) had the lowest. The unemployment rates were 10.3 percent for Hispanics, 11.8 percent for Native Hawaiians and Other Pacific Islanders, and 11.9 percent for individuals of Two or More Races. (See tables 1, 2, 3, and 12 and charts 4 and 5.)

Among the major race and ethnicity groups, the jobless rates in 2012 for adult Black men and women (age 20 and older) were 14.0 and 11.9 percent, respectively. The unemployment rate for adult Hispanic men was 8.9 percent, and the rate for adult Hispanic women was 10.1 percent. The jobless rates for adult Asian men and women were 5.4 and 5.8 percent, respectively. The unemployment rates for

Unemployment rates by race and Hispanic or Latino ethnicity, 2012 annual averages

Note: People whose ethnicity is identified as Hispanic or Latino may be of any race. Source: U.S. Bureau of Labor Statistics, Current Population Survey (CPS).

adult White men and women were similar, at 6.7 and 6.5 percent, respectively. (See table 3.)

Black teenagers had the highest unemployment rate among the major race and ethnicity groups—38.3 percent in 2012. The unemployment rates for Hispanic, White, and Asian teenagers were 28.6 percent, 21.5 percent, and 20.8 percent, respectively. Unemployed Blacks and Asians experienced longer periods of unemployment than did Whites and Hispanics. In 2012, the median duration of unemployment for Blacks and Asians was

24.7 weeks and 24.0 weeks, respectively, compared with 17.6 weeks for Whites and 16.7 weeks for Hispanics. (See table 13.) There were 12.5 million unemployed people in 2012; 55 percent (6.9 million) of whom were job losers (that is, those workers who lost their jobs and those who completed temporary jobs). Reentrants to the labor force (27 percent), new entrants (11 percent), and job leavers (7 percent) constituted the balance of unemployed people. Of the total unemployed for each major race and ethnicity group, 57 percent of Whites and 55 percent of Hispanics were job losers in 2012, compared with about half of unemployed Blacks and Asians. Of the total

unemployed, about 14 percent of Asians, 13 percent of Blacks, 12 percent of Hispanics, and 10 percent of Whites were new entrants to the labor force in 2012. (See table 14.)

Not in the labor force. Blacks made up about 12 percent of the civilian labor force in 2012, but 23 percent of people marginally attached to the labor force. People marginally attached to the labor force are individuals who were not in the labor force, wanted and were available for work, and had looked for a job sometime in the previous 12 months-but not in the 4 weeks preceding the survey. Hispanics and Asians were represented among the marginally attached nearly proportionately to their shares of the labor force. Whites were underrepresented among the marginally attached relative to their share of the labor force-80 percent of the labor force versus 67 percent of the marginally attached. Blacks also made up a high proportion of discouraged workers (27 percent) relative to their share of the labor force. Discouraged workers, a subset of the marginally attached, are people not currently looking for work because they believe no jobs are available for them. (See table 15.)

Unemployment rates by race and Hispanic or Latino ethnicity, 1973–2012 annual averages

Notes: People whose ethnicity is identified as Hispanic or Latino may be of any race. Data for Asians only available since 2000. Source: U.S. Bureau of Labor Statistics, Current Population Survey (CPS).

Earnings

Chart 5

Among the major race and ethnicity groups, Hispanics and Blacks had considerably lower earnings than Whites and Asians. In 2012, the median usual weekly earnings of full-time wage and salary workers were \$568 for Hispanics, \$621 for Blacks, \$792 for Whites, and \$920 for Asians. Among men, the earnings of Whites (\$879), Blacks (\$665), and Hispanics (\$592) were 83, 63, and 56 percent, respectively, of the earnings of Asians (\$1,055). The median earnings of White women (\$710), Black women (\$599), and Hispanic women (\$521) were 92, 78, and 68 percent, respectively, of the earnings of Asian women (\$770). (See table 16.)

Men. The earnings disparity across the major race and ethnicity groups for men holds for nearly all major occupational groups. For example, in 2012, median usual weekly earnings of Asian men (\$1,464) and White men (\$1,339) working full time in management, professional, and related occupations (the highest paying major occupation group) were well above the earnings of Black men (\$1,021) and Hispanic men (\$985) in the same occupation group. Among those employed in natural resources, construction, and maintenance occupations, the earnings ratios of White, Black, and Hispanic men to Asian men were 96 percent, 85 percent, and 72 percent, respectively. In sales and office occupations, the earnings of White men employed full time (\$802) were higher than the earnings of Asian, Hispanic, and Black men (\$748, \$620, and \$606, respectively). (See table 18.)

Women. Among the race and ethnicity groups, the median weekly earnings for women in some major occupational groups were fairly close. For example, in service occupations, the median usual weekly earnings of White (\$433) and Black (\$437) women were about the same in 2012; the earnings of Asian and Hispanic women were \$463 and \$397, respectively. By contrast, in management, professional, and related occupations, the earnings of Asian women were higher than women in other race and ethnicity groups. In 2012, the earnings of White, Black, and Hispanic women in this occupational group were 84 percent, 73 percent, and 72 percent, respectively, of the earnings of Asian women.

| Table 4. Labor force participation rates by gender, race, and Hispanic or Latino ethnicity, 1972–2012 annual averages | |
|---|--|
| —Continued | |
| (Percent) | |

Note: Beginning in 2003, estimates for White, Black or African American, Asian, American Indian and Alaska Native, and Native Hawaiian and Other Pacific Islander race groups include people who selected that race group only; people who selected more than one race group are included in the Two or More Races category. Prior to 2003, people who reported more than one race were included in the group they identified as the main race. Asian estimates for 2000–2002 are for Asians and Pacific Islanders; beginning in 2003, Asian is a separate category, as is Native Hawaiian and Other Pacific Islander. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates data not available.

Table 5. Employment-population ratio by gender, race, and Hispanic or Latino ethnicity, 1972–2012 annual averages —Continued (Percent)

Note: Beginning in 2003, estimates for White, Black or African American, Asian, American Indian and Alaska Native, and Native Hawaiian and Other Pacific Islander race groups include people who selected that race group only; people who selected more than one race group are included in the Two or More Races category. Prior to 2003, people who reported more than one race were included in the group they identified as the main race. Asian estimates for 2000–2002 are for Asians and Pacific Islanders; beginning in 2003, Asian is a separate category, as is Native Hawaiian and Other Pacific Islander. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates data not available.

Note: Estimates for the above race groups (White, Black or African American, and Asian) do not sum to totals because data are not presented for all races. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 50,000).

Table 11. Labor force participation rates by presence and age of youngest child, gender, race, and Hispanic or Latino ethnicity, 1994–2012 annual averages—Continued (Percent)

Note: Beginning in 2003, estimates for White, Black or African American, and Asian race groups include people who selected that race group only; persons who selected more than one race group are not included in these groups. Prior to 2003, people who reported more than one race were included in the group they identified as the main race. Asian estimates for 2000–2002 are for Asians and Pacific Islanders; beginning in 2003, Asian is a separate category. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Children are "own" children and include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children. Dash indicates data not available.

Table 12. Unemployment rates by gender, race, and Hispanic or Latino ethnicity, 1972–2012 annual averages —Continued (Percent)

Note: Beginning in 2003, estimates for White, Black or African American, Asian, American Indian and Alaska Native, and Native Hawaiian and Other Pacific Islander race groups include people who selected that race group only; people who selected more than one race group are included in the Two or More Races category. Prior to 2003, people who reported more than one race were included in the group they identified as the main race. Asian estimates for 2000–2002 are for Asians and Pacific Islanders; beginning in 2003, Asian is a separate category, as is Native Hawaiian and Other Pacific Islander. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates data not available.

Table 13. Unemployed people by duration of unemployment, gender, race, and Hispanic or Latino ethnicity, 2012 annual averages

| Duration of unemployment | Total | White | Black or African American | Asian | Hispanic or Latino ethnicity |
|--|--------|-------|---------------------------------|-------|------------------------------------|

¹ The sum of the employed plus the unemployed.

² People "marginally attached to the labor force" are those who want a job, have searched for work during the prior 12 months, and were available to take a job during the reference week. but had not looked for work in the past 4 weeks.

³ Discouraged workers are people marginally attached to the labor force who did not actively look for work in the prior 4 weeks for reasons such as thinks no work available, could not find work, lacks school or training, employer thinks too young or old, and other types of discrimination.

⁴ Includes those who did not actively look for work in the prior 4 weeks for such reasons as child-care and transportation problems, as well as a small number for which reason nonparticipation was not ascertained.

Note: Estimates for the above race groups (White, Black or African American, and Asian) do not sum to totals because data are not presented for all races. People whose ethnicity is identified as Hispanic or Latino may be of any race.

Table 16. Median usual weekly earnings of full-time wage and salary workers by gender, race, and Hispanic or Latino ethnicity, 1979–2012 annual averages—Continued

Note: Beginning in 2003, estimates for White, Black or African American, and Asian race groups include people who selected that race group only; persons who selected more than one race group are not included in these groups. Prior to 2003, people who reported more than one race were included in the group they identified as the main race. Asian estimates for 2000–2002 are for Asians and Pacific Islanders; beginning in 2003, Asian is a separate category. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates data not available.

Table 17. Median usual weekly earnings of full-time wage and salary workers by educational attainment, gender, race, and Hispanic or Latino ethnicity, 2012 annual averages

¹ Includes people with a high school diploma or equivalent.

² Includes people with bachelor's, master's, professional, and doctoral degrees.

Note: People whose ethnicity is identified as Hispanic or Latino may be of any race.

Table 18. Median usual weekly earnings of full-time wage and salary workers by occupation, gender, race, and Hispanic or Latino ethnicity, 2012 annual averages

| Occupation and gender | Total | White | Black or African American | Asian | Hispanic or Latino ethnicity |
|--|-------|-------|---------------------------------|-------|------------------------------------|
| Total, 16 years and older | \$768 | \$792 | \$621 | \$920 | \$568 |

Table 18. Median usual weekly earnings of full-time wage and salary workers by occupation, gender, race, and Hispanic or Latino ethnicity, 2012 annual averages—Continued

Note: People whose ethnicity is identified as Hispanic or Latino may be of any race.

The estimates in this report were obtained from the Current Population Survey (CPS), a national monthly sample survey of approximately 60,000 eligible households that provides a wide range of information on the labor force, employment, and unemployment. Earnings data are collected from one-fourth of the CPS monthly sample. The survey is conducted for the U.S. Bureau of Labor Statistics (BLS) by the U.S. Census Bureau using a scientifically selected national sample with coverage in all 50 states and the District of Columbia.

Material in this report is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory-impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Concepts and definitions

Civilian noninstitutional population. Included are people 16 years of age and older residing in the 50 states and the District of Columbia who are not confined to institutions, such as nursing homes and prisons, and who are not on active duty in the Armed Forces.

Employed. Employed people are all those who, during the survey reference week (which is generally the week including the 12th day of the month), (a) did any work at all as paid employees; (b) worked in their own business, profession, or on their own farm; (c) worked 15 hours or more as unpaid workers in a family member's business. People who were temporarily absent from their jobs or businesses because of illness, vacation, labor dispute, or another reason also are counted as employed.

Unemployed. The unemployed are people who had no employment during the reference week, were available for work (except for temporary illness), and had made specific efforts to find employment sometime during the 4-week period ending with the reference week. People who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

Duration of unemployment. This represents the length of time (through the reference week) that people classified as unemployed had been looking for work. For people on layoff, duration of unemployment represents the number of full weeks they had been on layoff. Mean duration is the arithmetic average computed from single weeks of unemployment; median duration is the midpoint of a distribution of weeks of unemployment.

Reason for unemployment. Unemployment also is categorized according to the status of individuals at the time they began to look for work. The reasons for unemployment are divided into four major groups:

1. Job losers, comprising (a) people on temporary layoff, who have been given a date to return to work or who expect to return within 6 months (people on layoff need not be looking for work to qualify as unemployed), (b) permanent job losers, whose employment ended involuntarily and who began looking for work, and (c) people who completed temporary jobs, who began looking for work after the jobs ended.

2. Job leavers, people who quit or otherwise terminated their employment voluntarily and immediately began looking for work.

3. Reentrants, people who previously worked but who were out of the labor force prior to beginning their job search.

4. New entrants, people who had never worked.

Civilian labor force. This group comprises all people classified as employed or unemployed in accordance with the criteria described above.

Unemployment rate. This rate is the number unemployed as a percent of the civilian labor force.

Labor force participation rate. This rate is the labor force as a percent of the population.

Employment-population ratio. This ratio is the number of employed as a percentage of the population.

Not in the labor force. Included in this group are all people in the civilian noninstitutional population who are neither employed nor unemployed. People marginally attached to the labor force are those individuals who are not in the labor force who wanted and were available for work and had looked for a job sometime in the prior 12 months (or since the end of their last job if they held one within the past 12 months). They were not counted as unemployed because they had not searched for work in the 4 weeks preceding the survey. Discouraged workers, a subset of the marginally attached, were not looking for work because they believed no jobs were available for them.

Occupation and industry. This information applies to the job held during the reference week. People with two or more jobs are classified in the occupation and industry in which they worked the greatest number of hours. The occupational and industry classification of CPS data is based on the 2010 Census Occupational Classification system and the 2007 Census Industrial Classification system, which are derived from the 2010 Standard Occupation Classification (SOC) and the 2007 North American Industry Classifications is available online at http://www.bls.gov/cps/cpsoccind.htm.

White, Black or African American, Asian, American Indian and Alaska Native, and Native Hawaiian and Other Pacific Islander. In accordance with the Office of Management and Budget guidelines, these terms are used to describe the race of people. Beginning in 2003, people in these categories are those who selected that race group only. Those who identify multiple race groups are categorized as people of Two or More Races. (Previously, people identified a group as their main race.) Estimates for American Indians and Alaska Natives, Native Hawaiians and Other Pacific Islanders, and people of Two or More Races are not shown separately in all tables because the number of survey respondents is too small to develop estimates of sufficient quality. In the enumeration process, race is determined by the household respondent. More information on the 2003 changes to questions on race and Hispanic ethnicity is available on the BLS website at **http://www.bls.gov/cps/rvcps03.pdf**.

Hispanic or Latino ethnicity. This refers to people who identified themselves in the enumeration process as being Spanish, Hispanic, or Latino. People whose ethnicity is identified as Hispanic or Latino may be of any race. More information on the 2003 changes in questions on race and Hispanic ethnicity is available online at <u>http://www.bls.gov/cps/rvcps03.pdf</u>.

Usual weekly earnings. Data represent earnings before taxes and other deductions, and include any overtime pay, commissions, or tips usually received (at the main job, in the case of multiple jobholders). Earnings reported on a basis other than weekly (for example, annual, monthly, hourly) are converted to weekly. The term "usual" is as perceived by the respondent. If the respondent asks for a definition of usual, interviewers are instructed to define the term as more than half the weeks worked during the past 4 or 5 months. Data refer to the sole or primary job of wage and salary workers (excluding all self-employed people regardless of whether their businesses were incorporated).

Median earnings. These figures indicate the value that divides the earnings distribution into two equal parts, one part having values above the median and the other having values below the median. The medians shown in this publication are calculated by linear interpolation of the \$50 centered interval within which each median falls.

Family. A family is defined as a group of two or more people residing together who are related by birth, marriage, or adoption; all such people are considered as members of one family. Families are classified either as married-couple families or as families maintained by women or men without spouses.

Children. Data on children refer to one's own children under age 18 that live in the household. Included are sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, other related children, and all unrelated children living in the household.

Reliability of the estimates

Statistics based on the CPS are subject to both sampling and nonsampling error. When a sample, rather than an entire population, is surveyed, there is a chance that the sample estimates may differ from the true population values they represent. The component of this difference that occurs because samples differ by chance is known as sampling error, and its variability is measured by the standard error of the estimate. There is about a 90 percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.6 standard errors from the true population value because of sampling error. BLS analyses are generally conducted at the 90 percent level of confidence.

All other types of error are referred to as nonsampling error. Nonsampling error can occur for many reasons, including the failure to sample a segment of the population, inability to obtain information for all respondents in the sample, inability or unwillingness of respondents to provide correct information, and errors made in the collection or processing of data.

A more detailed discussion of the reliability of data from the CPS and information on estimating standard errors is available online at http://www.bls.gov/cps/documentation.htm#reliability.
