Fatal Occupational Injuries in West Virginia — 2018

Fatal work injuries totaled 57 in 2018 for West Virginia, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau's regional commissioner, noted that the number of work-related fatalities in West Virginia increased from 51 in the previous year. Fatal occupational injuries in the state have ranged from a high of 95 in 2010 to a low of 35 in 2015. (See [chart 1.](#))

Nationwide, a total of 5,250 fatal work injuries were recorded in 2018, up from the 5,147 fatal injuries in 2017, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, West Virginia, 2009–2018

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

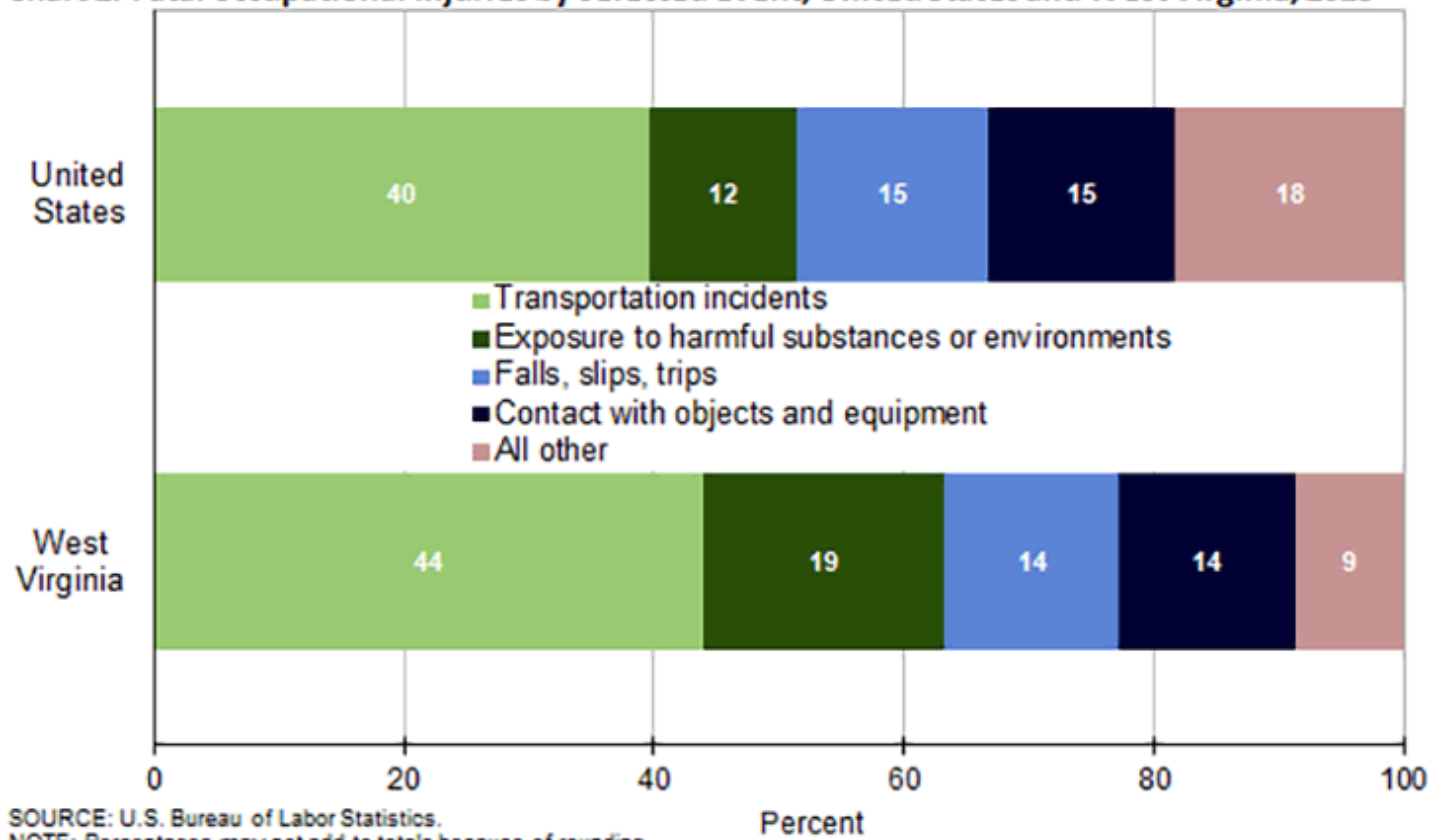

In West Virginia, transportation incidents resulted in 25 fatal work injuries and exposure to harmful substances or environments accounted for 11 fatalities. These two major categories accounted for 63 percent of all workplace fatalities in the state. (See [table 1.](#)) The number of worker deaths from transportation incidents rose

from 19 in 2017, and worker fatalities due to exposure to harmful substances or environments increased from 8. Unintentional overdoses due to nonmedical use of drugs or alcohol while at work accounted for 7 of the 11 worker deaths among exposure to harmful substances and environments.

Falls, slips, or trips and contact with objects and equipment were tied for the third-most frequent fatal work event in the state with eight fatalities each. Fatalities due to falls, slips, or trips decreased over the year from 11, while fatalities due to contact with objects and equipment decreased from 9.

Nationally, transportation incidents were the most frequent fatal workplace event in 2018, accounting for 40 percent of fatal work injuries. (See [chart 2.](#)) Violence and other injuries by persons or animals was the second-most common fatal event (16 percent), followed by falls, slips, and trips (15 percent) and contact with objects and equipment (15 percent).

Chart 2. Fatal occupational injuries by selected event, United States and West Virginia, 2018

Industry

The private mining, quarrying, and oil and gas extraction industry had the largest numbers of fatalities in West Virginia with 13, followed by the private transportation and warehousing industry with 10 fatalities in 2018. (See [table 2.](#)) Mining, quarrying, and oil and gas extraction industry fatalities were up from 12 in the previous year, while those in the transportation and warehousing industry decreased from 12 in 2017. Support activities for oil and gas operations accounted for 8 of the 13 fatal incidents in the mining sector, while general freight trucking accounted for the 7 of the 10 fatalities in the transportation and warehousing sector.

The most frequent event in both the private mining, quarrying, and oil and gas extraction industry and the private transportation and warehousing industry was transportation incidents causing six and seven of the fatalities in these industries, respectively.

Occupation

Transportation and material moving occupations and construction and extraction occupations had the highest number of workplace fatalities with 20 and 18, respectively. (See [table 3.](#)) The majority of the fatalities within the transportation and material moving group were heavy and tractor-trailer truck drivers (15). In the construction and extraction group, extraction workers accounted for seven fatal injuries, followed by construction trades workers with five fatalities.

Contracted Workers

A contractor is defined as a worker employed by one firm but working at the behest of another firm that exercises overall responsibility for the operations at the site of the fatal injury. In 2018, West Virginia had 10 fatally-injured workers identified as fitting the contractor criteria; of those, 5 were in construction and extraction occupations.

Additional highlights:

- Men accounted for 98 percent of the work-related fatalities in West Virginia, higher than the 92-percent national share. (See [table 4.](#)) The most frequent fatal event for men was transportation incidents (25), followed by exposure to harmful substances or environments (10).
- White, non-Hispanic workers accounted for 88 percent of those who died from a workplace injury in the state. Nationwide, this group accounted for 65 percent of work-related deaths.
- Workers 25-54 years old accounted for 72 percent of the state's work-related fatalities in 2018, higher than the 58 percent of on-the-job fatalities nationally.
- Of the 57 fatally-injured workers in West Virginia, 91 percent worked for wages and salaries; the remainder were self-employed. Transportation incidents accounted for 46 percent of the fatalities to wage and salary workers.
- The most frequent day of occurrence for workplace fatalities in the state was Monday, accounting for 23 percent. This day accounted for 16 percent of workplace fatalities nationally.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the Bureau of Labor Statistics (BLS) Occupational Safety and Health Statistics (OSHS) program, is a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI uses a variety of state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2018 national data, over 24,800 unique source documents were reviewed as part of the data collection process. For technical information and definitions for the CFOI, see the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, some of which may be outside the scope of other agencies or regulatory coverage. Comparisons between CFOI counts and those released by other agencies should account for the different coverage requirements and definitions used by each agency. For more information on the scope of CFOI, see www.bls.gov/iif/cfoiscope.htm and www.bls.gov/opub/hom/cfoi/concepts.htm.

Acknowledgments. BLS appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad

Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release is available to sensory-impaired individuals. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Struck by falling object or equipment--other than powered vehicle.....	6	4	7

Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Footnotes:

(1) Industry data are based on the North American Industry Classification System, 2012.

(2) Includes fatal injuries at all establishments categorized as Mining, quarrying, and oil and gas extraction (Sector 21) in the North American Industry Classification System, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

(3) Includes fatal injuries to workers employed by governmental organizations regardless of industry

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
