Unemployment in the Washington Area by County – March 2020

21 of 22 Area Counties had Unemployment Rates Lower than the National Average

In March, Arlington County, VA, had the lowest unemployment rate in the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area at 2.2 percent, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau's regional commissioner, noted that the District of Columbia had an unemployment rate of 5.9 percent, the highest among the 22 counties and equivalents that make up the metropolitan area. No other county or equivalent in the area had a rate above the U.S. rate of 4.5 percent. The rates for the remaining 20 counties and equivalents in the area ranged from 3.7 percent in Fredericksburg County, VA, to 2.3 percent in Falls Church City, VA. (See [chart 1](#). The Technical Note at the end of this release contains the metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Unemployment rates for the United States and counties in the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area, March 2020, not seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

Unemployment rates in 6 of the 22 Washington-area counties and equivalents were lower in March 2020 than in March 2019. Calvert County, MD, had the area's largest over-the-year decline at 0.5 percentage point. The remaining 16 counties and equivalents had rate increases that were below the national rate increase of 0.6 percentage point. The District of Columbia and Prince William County, VA, had the largest jobless rate increase at 0.3 point each. (See [table A](#).)

Footnotes

(1) Data for the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area and its components are preliminary for the most recent month.

Jobless rates in 10 of the 22 counties and equivalents in the Washington metropolitan area were lower in March 2020 than two years earlier. Calvert County, MD, had the largest rate decline, down 0.8 percentage point since March 2018. Eight other counties and equivalents had rates that were unchanged over the two year period. The remaining four counties had jobless rate increases, with District of Columbia having the largest rate increase at 0.2 percentage point.

March 2020 unemployment rates for the two metropolitan divisions in the Washington-Arlington-Alexandria metropolitan area—Washington-Arlington-Alexandria, DC-VA-MD-WV and Silver Spring-Frederick-Rockville, MD—were at 3.4 and 2.8 percent, respectively. The jobless rate in the Washington-Arlington-Alexandria division increased over the year, up 0.1 point, while the rate in Silver Spring-Frederick-Rockville decreased 0.3 point.

The Metropolitan Area Employment and Unemployment news release for April is scheduled to be released on Wednesday, June 3, 2020, at 10:00 a.m. (EDT).

Technical Note

This release presents unemployment rate data for states and counties from the Local Area Unemployment Statistics (LAUS) program, a federal-state cooperative endeavor.

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or

more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Methods of Estimation. The LAUS program is a hierarchy of non-survey methodologies for indirectly estimating employment and unemployment in states and local areas. Statewide data are produced through a modeling technique that uses estimates of payroll jobs from the Current Employment Statistics survey and unemployment insurance claims counts from the state workforce agencies to mitigate volatility in the direct CPS tabulations of employment and unemployment, respectively. Data for counties are developed through a building-block approach and adjusted proportionally to state model-based totals. For multi-county areas, such as the metropolitan areas and metropolitan divisions delineated by the Office of Management and Budget, estimates are summed from the data for their component counties. Estimates for cities and towns are produced through a disaggregation technique. A detailed description of the LAUS estimation procedures is available in chapter 4 of the BLS Handbook of Methods at www.bls.gov/opub/hom/lau/pdf/lau.pdf.

Annual revisions. Labor force and unemployment data for prior years reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget, dated April 10, 2018. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area** includes the District of Columbia; Arlington, Clarke, Fairfax, Fauquier, Loudoun, Prince William, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, Frederick, Montgomery, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.

The **Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Division** includes the District of Columbia; Arlington, Clarke, Fairfax, Fauquier, Loudoun, Prince William, Spotsylvania, Stafford, and Warren Counties, and Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; Calvert, Charles, and Prince George's Counties in Maryland; and Jefferson County in West Virginia.

The **Silver Spring-Frederick-Rockville, MD Metropolitan Division** includes Frederick and Montgomery Counties in Maryland.
