Fatal Occupational Injuries in Virginia — 2016

Fatal work injuries totaled 153 in 2016 for Virginia, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau's regional commissioner, noted that the number of work-related fatalities in Virginia increased by 47 from the previous year and was the highest level on record since 2008. Fatal occupational injuries in the state have ranged from a high of 186 in 2005 to a low of 106 in 2015. (See [chart 1.](#))

Nationwide, a total of 5,190 fatal work injuries were recorded in 2016, a 7-percent increase from the 4,836 fatal injuries reported in 2015, according to the results from the Census of Fatal Occupational Injuries (CFOI) program. This was the third consecutive increase in annual workplace fatalities and the first time more than 5,000 fatalities have been recorded since 2008.

Chart 1. Total fatal occupational injuries, Virginia, 2007–2016

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

In Virginia, transportation incidents resulted in 48 fatal work injuries while violence and other injuries by persons or animals accounted for 41 fatalities. These two major categories accounted for 58 percent of all workplace fatalities in the state. (See [table 1.](#)) The number of worker deaths from transportation incidents increased 25 percent over the year and the number of worker fatalities due to violence and other injuries by

persons or animals more than tripled. In the transportation incidents category, 17 of the 48 work-related deaths were caused by a vehicle striking an object or animal on the side of roadway. Homicides accounted for slightly more than half of the worker deaths in the violence and other injuries by persons or animals category, while suicides accounted for 17 of these 41 deaths.

Contact with objects and equipment was the third-most frequent fatal work event with 24 fatalities, 4 more than the count for 2015. Falls, trips, or slips was the fourth-most frequent fatal event with 20, the same count as last year. A third of the deaths in the contact with objects and equipment category were the result of being struck by a falling object or equipment. For falls, trips, or slips, the majority of the fatalities were due to falls to a lower level (17). Exposure to harmful substances or environments resulted in 18 fatalities, half of the which were overdoses from the non-medical use of drugs or alcohol at work.

Nationally, transportation incidents remained the most frequent fatal workplace event in 2016, accounting for 40 percent of fatal work injuries. (See [chart 2.](#)) Violence and other injuries by persons or animals was the second-most frequent type of event, with 17 percent of work-related fatalities, followed by falls, slips, or trips (16 percent) and contact with objects and equipment (15 percent).

Chart 2. Fatal occupational injuries by selected event, United States and Virginia, 2016

SOURCE: U.S. Bureau of Labor Statistics.

Industry

The private transportation and warehousing industry had the largest number of fatalities in Virginia with 27, up from 18 in 2015. (See [table 2.](#)) The most frequent event in this industry was transportation incidents causing 22 of the 27 worker deaths. Two-thirds of the fatal injuries in this industry were to workers in general freight trucking.

The private construction sector had 24 workplace fatalities, slightly lower than count in the previous year (25). Falls, slips, or trips was the most frequent fatal event in the construction sector with 10 worker deaths. Forty-six percent of those fatally injured in this sector worked in specialty trade contracting.

Occupation

Transportation and material moving occupations and construction and extraction occupations had the highest numbers of workplace fatalities with 39 and 23, respectively. (See [table 3](#).) The majority of the fatalities within the transportation and material moving group were heavy and tractor-trailer truck drivers, with 29 worker deaths. Construction laborers accounted for 11 of the fatalities among construction and extraction workers.

Contracted Workers

A contracted worker is defined as a worker employed by one firm but working at the behest of another firm that exercises overall responsibility for the operations at the site of the fatal injury. In 2016, Virginia had 19 fatally-injured workers identified as fitting the contracted worker criteria; of those, eight were contracted by companies in the private construction industry and five were contracted by companies in the private manufacturing industry.

Additional highlights:

- Men accounted for 91 percent of the work-related fatalities in Virginia, comparable to the 93-percent national share. (See [table 4](#).) Transportation incidents made up 32 percent of the fatalities for men in Virginia. Among women, half of the 14 fatalities in the workplace were the result of violence and other injuries by persons or animals.
- White, non-Hispanic workers accounted for 60 percent of those who died from a workplace injury. Black, non-Hispanic workers comprised 20 percent of Virginia's fatal injuries at work, while Hispanic or Latino workers made up 13 percent of the fatalities. Nationwide, white, non-Hispanic workers accounted for 67 percent of work-related deaths, while Hispanic or Latino and non-Hispanic black workers represented 17 and 11 percent of the national share, respectively.
- Workers 25-54 years old accounted for 63 percent of the state's work-related fatalities in 2016, higher than the national share of 57 percent.
- Of the 153 fatally-injured workers in Virginia, 79 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was transportation incidents, while for the self-employed it was violence and other injuries by persons or animals.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. Nationwide, for the 2016 data, over 23,300 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm.

Acknowledgments. BLS thanks the Virginia Department of Labor and Industry for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release is available to sensory-impaired individuals. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Driver/sales workers and truck drivers	24	32	21
Driver/sales workers.....	-	3	2
Heavy and tractor-trailer truck drivers	22	29	19
Water transportation workers	-	1	1
Sailors and marine oilers.....	-	1	1
Sailors and marine oilers.....	-	1	1

Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Table 4. Fatal occupational injuries by worker characteristics, Virginia, 2015-16

Worker characteristics	2015	2016	
	Number	Number	Percent
Total.....	106	153	100
Employee status			
Wage and salary workers ⁽¹⁾	81	121	79
Self-employed ⁽²⁾	25	32	21
Gender			
Women.....	8	14	9
Men.....	98	139	91
Age ⁽³⁾			
18 to 19 years.....	3	1	1
20 to 24 years.....	9	8	5
25 to 34 years.....	17	26	17
35 to 44 years.....	21	41	27
45 to 54 years.....	23	30	20
55 to 64 years.....	22	33	22
65 years and over.....	11	14	9
Race or ethnic origin ⁽⁴⁾			
White (non-Hispanic).....	78	92	60
Black or African-American (non-Hispanic).....	18	31	20
Hispanic or Latino.....	9	20	13
Asian (non-Hispanic).....	-	9	6

Footnotes:

(1) May include volunteers and workers receiving other types of compensation.

(2) Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

(3) Information may not be available for all age groups.

(4) Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanics and Latinos.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
