Fatal Work Injuries in Wisconsin – 2012

Fatal work injuries totaled 114 in 2012 for Wisconsin, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Charlene Peiffer noted that while the 2012 count was preliminary, the number of work-related fatalities in Wisconsin rose by 25 over the year. Fatal occupational injuries in the state have ranged from a high of 138 in 1993 to a low of 77 in 2008. (See [chart 1.](#))

Nationwide, a preliminary total of 4,383 fatal work injuries were recorded in 2012, down from a revised count of 4,693 fatalities in 2011, according to results from the Census of Fatal Occupational Injuries (CFOI) program. Final 2012 CFOI data will be released in Spring 2014.

Chart 1. Total fatal occupational injuries, Wisconsin, 2003–2012

NOTE: Data for 2012 are preliminary.

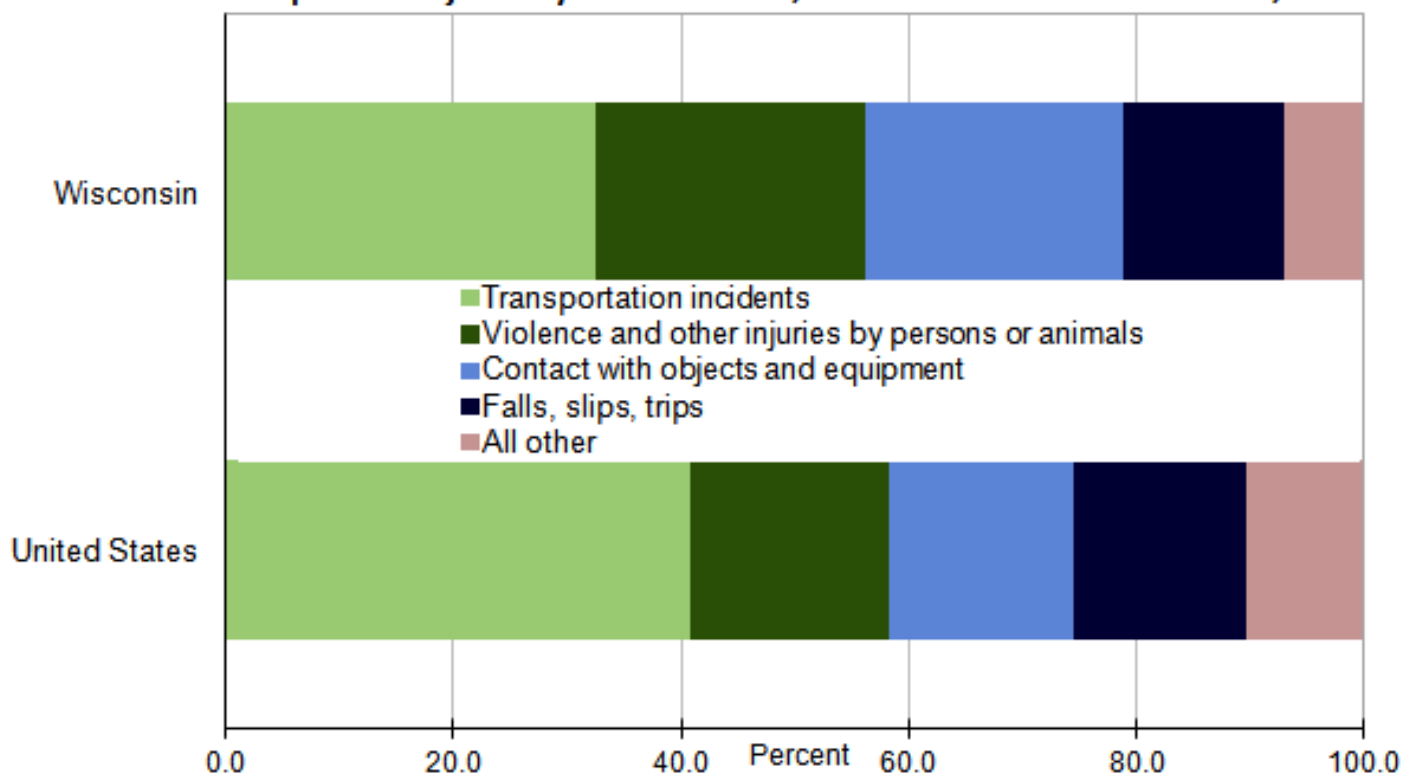

SOURCE: U.S. Bureau of Labor Statistics.

Of the 114 fatal work injuries reported in Wisconsin in 2012, 37 resulted from transportation incidents, 27 from violence and other injuries by persons or animals, and 26 from contact with objects and equipment. These three major categories accounted for more than three-quarters of all fatal work injuries. Other major event categories each reported 16 or fewer deaths. (See [table 1.](#))

Within transportation incidents, roadway incidents involving motorized land vehicles was the most frequent type of workplace fatality with 22 deaths. In the violence and other injuries by persons or animals category, 24 deaths occurred from intentional injury by a person. In the contact with objects and equipment category, 18 fatalities resulted from workers being struck by objects or equipment. (Note that transportation counts presented in this release are expected to rise when updated 2012 data are released in spring 2014 because key source documentation detailing specific transportation-related incidents has not yet been received.)

In the United States, transportation incidents were also the most frequent fatal workplace event in 2012, accounting for 41 percent of fatal work injuries. Wisconsin's 32-percent share of fatalities due to this event was smaller than the nationwide share. (See [chart 2](#).) Violence and other injuries by persons or animals was the second most frequent type of event nationally with 17 percent of work-related fatalities. This was less than the 24-percent share in Wisconsin. Contact with objects or equipment (16 percent) and falls, slips, and trips (15 percent) were the third and fourth most frequent events, respectively, in the nation.

Chart 2. Fatal occupational injuries by selected event, Wisconsin and the United States, 2012

NOTE: Data for 2012 are preliminary.
SOURCE: U.S. Bureau of Labor Statistics.

Additional key characteristics:

- The agriculture, forestry, fishing, and hunting industry sector had the largest number of fatalities in the state with 30, up from 22 the previous year. (See [table 2](#).) Within this industry, contact with objects and equipment accounted for 12 worker deaths, while 11 fatalities were due to transportation incidents.
- The manufacturing industry had the second highest fatality count with 16, up from 12 fatalities in 2011. Contact with objects and equipment accounted for eight worker deaths in this sector.
- Management and transportation and material moving occupations had the highest numbers of fatal work injuries with 27 and 23 fatalities, respectively. (See [table 3](#).) The majority of these fatalities were farmers, ranchers, and other agricultural managers (18) within the management group and heavy and tractor-trailer truck drivers (12) within the transportation and material moving occupational group.

- Men accounted for 103, or 90 percent, of the work-related fatalities in the state. (See [table 4.](#)) Transportation incidents made up one-third of these fatalities.
- In Wisconsin, 88 percent of those who died from a workplace injury were white non-Hispanics. Nationwide, this group accounted for 68 percent of work-related deaths.
- Workers 25-54 years old—the prime working age group—accounted for 58 individuals, or just over half of the state’s work-related fatalities in 2012. Nationally, workers in this group accounted for 59 percent of on-the-job fatalities.
- Of the 114 persons that suffered fatal work injuries in Wisconsin, 63 percent worked for wages and salaries; the remaining were self-employed. The most frequent fatal event for wage and salary workers was transportation incidents (25) while for self-employed workers there were 12 fatalities each resulting from transportation incidents and contact with objects and equipment.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries, part of the BLS occupational safety and health statistics program, compiles a count of all fatal work injuries occurring in the United States during the calendar year. The program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This assures counts are as complete and accurate as possible.

For technical information about the CFOI program, please go to the BLS Handbook of Methods on the BLS web site at www.bls.gov/opub/hom/homch9.htm.

Federal/State agency coverage. The Census of Fatal Occupational Injuries includes data for all fatal work injuries, whether the decedent was working in a job covered by the Occupational Safety and Health Administration (OSHA) or other federal or state agencies or was outside the scope of regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency.

Acknowledgments. The Bureau of Labor Statistics appreciates the efforts of all federal, state, local, and private sector entities that submitted source documents used to identify fatal work injuries, in particular the Wisconsin State Laboratory of Hygiene.
