Average Energy Prices, Chicago-Gary-Kenosha – February 2015

Gasoline prices averaged \$2.425 a gallon in the Chicago-Gary-Kenosha area in February 2015, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Charlene Peiffer noted that area gasoline prices were down \$1.178 compared to February 2014 when they averaged \$3.603 per gallon. Chicago area households paid an average of 17.2 cents per kilowatt hour (kWh) of electricity in February 2015, up from 13.8 cents per kWh in February 2014. The average cost of utility (piped) gas at 78.1 cents per therm in February was down from 96.9 cents per therm a year earlier. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

At \$2.425 a gallon, costs for gasoline in the Chicago area were 5.1 percent higher than the national average of \$2.308 a gallon in February 2015. Average gasoline costs in Chicago had been higher by 18.1 cents or more, compared to the U.S. average in the previous two Februarys (2013-2014). (See [chart 1.](#))

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, the 3 population size classes, 10 region/size-class cross-classifications, and the 14 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.
