Chicago Area Employment — August 2016

Local Rate of Employment Growth Below National Average

Total nonfarm employment for the Chicago-Naperville-Elgin, Ill.-Ind.-Wis. Metropolitan Statistical Area stood at 4,681,500 in August 2016, up 62,200, or 1.3 percent, over the year, the U.S. Bureau of Labor Statistics reported today. During the same period, the national job count increased 1.7 percent. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the Chicago metropolitan area has had over-the-year employment increases each month since October 2010. (See [chart 1](#) and [table 1](#); the [Technical Note](#) at the end of this release contains metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Total nonfarm employment, over-the-year net change in the Chicago metropolitan area and its divisions, August 2011–August 2016

Net change (in thousands)

Source: U.S. Bureau of Labor Statistics.

The Chicago metropolitan area is made up of four metropolitan divisions—separately identifiable employment centers within the larger metropolitan area. The Chicago-Naperville-Arlington Heights Metropolitan Division, which accounted for 80 percent of the area's workforce, added 46,800 jobs from August a year ago.

Employment in the Lake County-Kenosha County, Ill.-Wis. Metropolitan Division increased by 6,300, while employment in the Gary, Ind. Metropolitan Division and the Elgin, Ill. Metropolitan Division grew by 5,700 and 3,400, respectively, over the year.

Industry employment

In the Chicago metropolitan area, the leisure and hospitality industry had the largest employment gain from August 2015 to August 2016, up 22,100 or 4.7 percent. The Chicago division added 19,200 of these jobs. Nationwide, employment in leisure and hospitality rose 2.7 percent from the previous August. (See [chart 2.](#))

Two other supersectors gained more than 9,000 jobs locally over the year. The professional and business services supersector gained 13,500 jobs since last August. However, the Chicago area's 1.6-percent growth in professional and business services employment was less than the nationwide increase of 2.7 percent. Local employment growth in this industry was concentrated in the Chicago division, up 11,900 jobs. Construction added 9,500 jobs locally, up 5.4 percent from the previous August. Nationwide, construction employment grew by 2.7 percent.

Trade, transportation, and utilities, the largest supersector in the Chicago area, added 6,300 jobs, a 0.7-percent gain from August a year ago. This supersector has had over-the-year employment increases each month since October 2010. From August 2015 to August 2016, the Lake division added 2,500 jobs and the Gary division added 2,400 jobs. Nationally, employment in the trade, transportation, and utilities supersector increased 1.4 percent from August 2015.

Manufacturing lost 3,900 jobs locally, down 0.9 percent, from August 2015 to August 2016. The job losses were concentrated in the Chicago division, where 3,300 jobs were lost. Nationwide, manufacturing employment declined 0.3 percent during the same period.

Two other local supersectors lost more than 1,000 jobs from August a year ago: financial activities (-2,700) and information (-1,600). Nationally, employment in financial activities and information increased over the year.

Chart 2. Total nonfarm and selected industry supersector employment, over-the-year percent change, United States and the Chicago metropolitan area, August 2016

Source: U.S. Bureau of Labor Statistics.

Employment in the 12 largest metropolitan areas

Chicago was 1 of the nation's 12 largest metropolitan statistical areas in August 2016. (See [chart 3](#) and [table 2](#).) All 12 areas experienced over-the-year job growth during the period, with the rates of growth in 10 areas exceeding the national average of 1.7 percent. The fastest rate of job growth was in Dallas-Fort Worth-Arlington, 3.4 percent, followed by Atlanta-Sandy Springs-Roswell at 2.7 percent. The Houston-The Woodlands-Sugar Land area had the slowest rate of job growth, up 0.5 percent. (See [chart 3](#) and [table 2](#).)

The New York-Newark-Jersey City area added the largest number of jobs, 184,200, since August 2015. Employment in Dallas and Los Angeles-Long Beach-Anaheim also added over 100,000 jobs each. Houston had the smallest gain, adding just 14,200 jobs over the 12-month period.

Education and health services had the most job growth in 5 of the 12 metropolitan areas from August a year ago—Boston-Cambridge-Nashua, Los Angeles, New York, Phoenix-Mesa-Scottsdale, and San Francisco-Oakland-Hayward. Professional and business services added the most jobs in three areas—Miami-Fort Lauderdale-West Palm Beach, Philadelphia-Camden-Wilmington, and Washington-Arlington-Alexandria.

Manufacturing had the largest over-the-year loss of jobs in six areas—Boston, Chicago, Dallas, Houston, Los Angeles, and Miami. New York and Philadelphia were the only areas to experience no job losses for any supersector since last August.

Chart 3. Total nonfarm employment, over-the-year percent change, United States and 12 largest metropolitan areas, August 2016

Percent change

Metropolitan area employment data for September 2016 are scheduled to be released on Friday, October 21, 2016.

Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a "link relative" technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates

between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates. The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

Employment estimates. Measures of sampling error for state CES data at the supersector level are available on the BLS Web site at www.bls.gov/sae/790stderr.htm. Information on recent benchmark revisions for states is available at www.bls.gov/sae/.

Area definitions. The substate area data published in this release reflect the delineations issued by the U.S. Office of Management and Budget on February 28, 2013. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Chicago-Naperville-Elgin, Ill.-Ind.-Wis. Metropolitan Statistical Area (MSA)** includes Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, McHenry, and Will Counties in Illinois; Jasper, Lake, Newton, and Porter Counties in Indiana; and Kenosha County in Wisconsin.

- The **Chicago-Naperville-Arlington Heights, Ill. Metropolitan Division (MD)** includes Cook, DuPage, Grundy, Kendall, McHenry, and Will Counties in Illinois.
- The **Elgin, Ill. Metropolitan Division (MD)** includes DeKalb and Kane Counties.
- The **Lake County-Kenosha County, Ill.-Wis. Metropolitan Division (MD)** includes Lake County in Illinois and Kenosha County in Wisconsin.
- The **Gary, Ind. Metropolitan Division (MD)** includes Jasper, Lake, Newton, and Porter Counties in Indiana.

Additional information

More complete information on the technical procedures used to develop these estimates and additional data appear in Employment and Earnings, which is available online at www.bls.gov/opub/ee/home.htm. Industry employment data for states and metropolitan areas from the Current Employment Statistics program are also available in the above mentioned news releases and from the Internet at www.bls.gov/sae/.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
