**ERRATA**

BLS identified errors in average price data for natural gas for Chicago from May 2018–July 2018. For more information on errors and correction plans, please visit: <https://www.bls.gov/bls/errata/cpi-errata-08082018.htm>

## **Average Energy Prices, Chicago-Naperville-Elgin — May 2018**

Gasoline prices averaged \$3.132 per gallon in the Chicago-Naperville-Elgin area in May 2018, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that area gasoline prices were up 59.4 cents compared to May 2017 when they averaged \$2.538 per gallon. Chicago area households paid an average of 15.6 cents per kilowatt-hour (kWh) of electricity in May 2018, up 4.0 percent from May 2017. In May, the average cost of utility (piped) gas was 84 cents per therm, lower than its average price of 87.5 cents per therm a year earlier. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

The \$3.132 per gallon Chicago households paid for gasoline in May 2018 was 16.9 cents more than the nationwide average of \$2.963. In each of the previous four years in May (2014-2017), Chicago area gasoline prices also surpassed those of the nation, ranging from 9 cents to 17.5 cents more. (See [chart 1.](#))

The **Chicago-Naperville-Elgin, Ill.-Ind.-Wis.**, core based statistical area consists of Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, McHenry, and Will Counties in Illinois; Jasper, Lake, Newton, and Porter Counties in Indiana; and Kenosha County in Wisconsin.

Historical average energy prices for the U.S. and select metropolitan areas are available at [www.bls.gov/regions/midwest/data/averageenergyprices\\_selectedareas\\_table.htm](http://www.bls.gov/regions/midwest/data/averageenergyprices_selectedareas_table.htm)

**The Consumer Price Index for June 2018 is scheduled to be released on Thursday, July 12, 2018.**

### Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
