Fatal Work Injuries in South Dakota — 2016

Fatal work injuries totaled 31 in 2016 for South Dakota, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the number of work-related fatalities in South Dakota increased from 21 in the previous year. Fatal occupational injuries in the state have ranged from a high of 46 in 1999 to a low of 20 in 2013. (See [chart 1.](#))

Nationwide, a total of 5,190 fatal work injuries were recorded in 2016, a 7-percent increase from the 4,836 fatal injuries in 2015, according to the results from the Census of Fatal Occupational Injuries (CFOI) program. This was the third consecutive increase in annual workplace fatalities and the first time more than 5,000 fatalities have been recorded since 2008.

Chart 1. Total fatal occupational injuries, South Dakota, 2007–2016

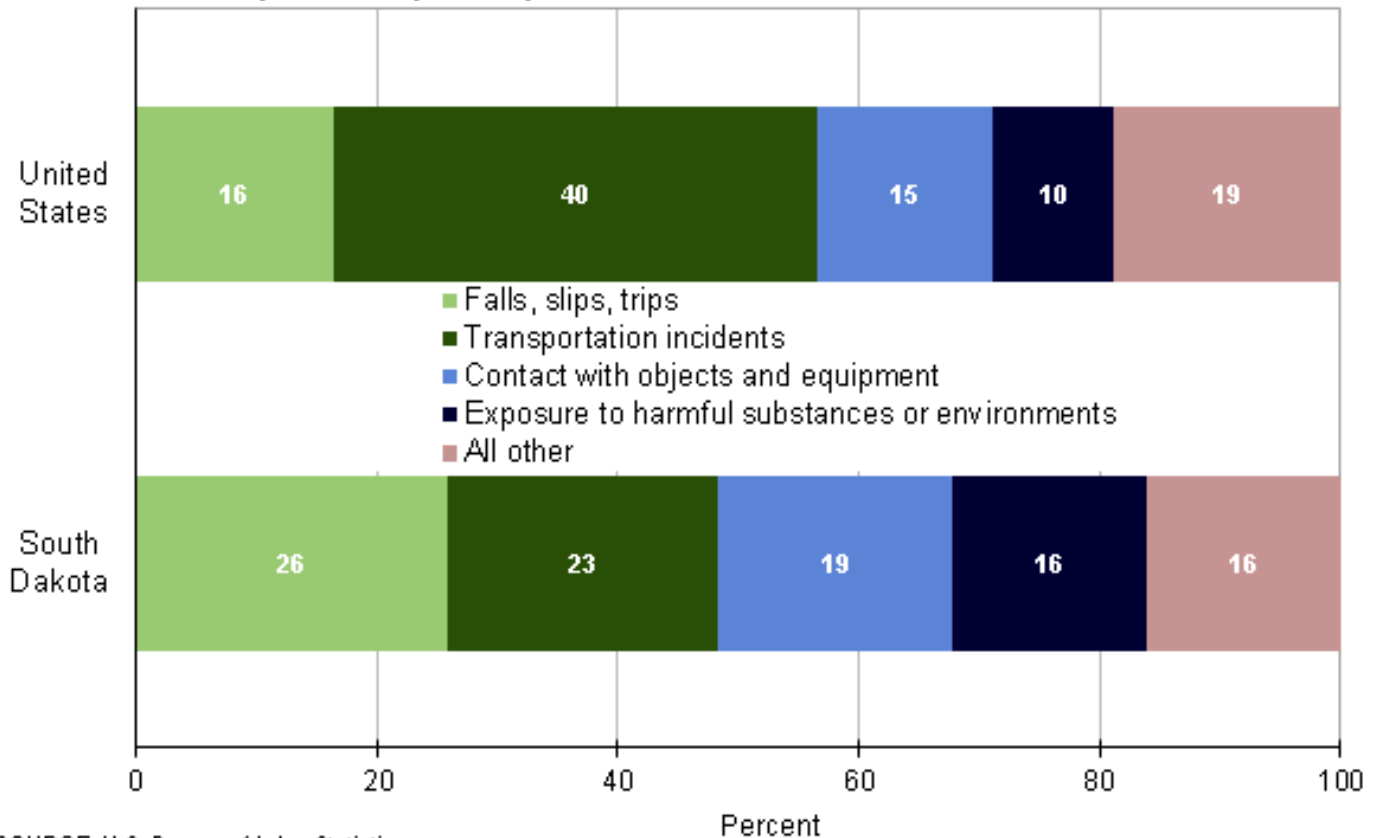

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

In South Dakota, falls, slips, or trips resulted in eight fatal work injuries and transportation incidents resulted in seven fatalities. These two major categories accounted for approximately 48 percent of all workplace fatalities in the state. (See [table 1.](#)) The number of worker deaths from falls, slips, or trips were up from three over the year and worker fatalities due to transportation incidents declined by two from the previous year.

Nationally, transportation incidents were the most frequent fatal workplace event in 2016, accounting for 40 percent of fatal work injuries. (See [chart 2.](#)) Violence and other injuries by persons or animals was the second-most common fatal event (17 percent), followed by falls, slips, or trips (16 percent).

Chart 2. Fatal occupational injuries by selected event, United States and South Dakota, 2016

Industry

The private agriculture, forestry, fishing and hunting sector had the largest number of fatalities in South Dakota with 16, up from 9 in the previous year. (See [table 2.](#)) Nine of the 16 fatalities occurred in crop production.

Occupation

Management occupations and construction and extraction occupations had the highest number of workplace fatalities with 12 each. (See [table 3.](#)) Farmers, ranchers, and other agricultural managers accounted for all of the fatalities within the management occupations. Ten of the 12 fatalities within the construction and extraction group were construction trade workers.

Additional highlights

- Men accounted for 97 percent of the work-related fatalities in South Dakota, compared to the 93-percent national share. (See [table 4.](#)) Falls, slips, or trips made up 27 percent of the fatalities for men in South Dakota.
- White non-Hispanics accounted for 84 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.
- Workers 25-54 years old accounted for 48 percent of the state’s work-related fatalities in 2016, compared to 57 percent of on-the-job fatalities nationally.

- Of the 31 fatally-injured workers in South Dakota, 52 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was falls, slips, or trips; for self-employed workers, the most frequent fatal event was transportation incidents.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2016 national data, over 23,300 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm.

Acknowledgments. BLS appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
