# Fatal Work Injuries in Illinois — 2017

Fatal work injuries totaled 163 in 2017 for Illinois, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the number of work-related fatalities in Illinois was down from the previous year. Fatal occupational injuries in the state have ranged from a high of 262 in 1996 to a low of 146 in 2012. (See chart 1.)

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries reported in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

■Wage and salary ■Self-employed

Chart 1. Total fatal occupational injuries, Illinois, 2008–2017

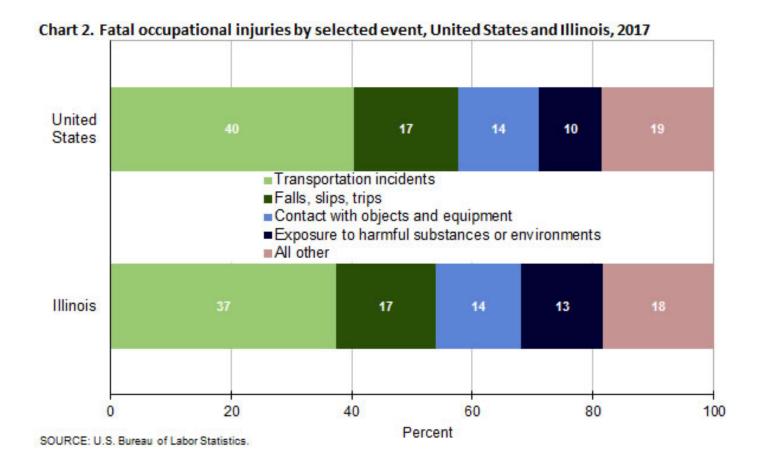

Type of incident

SOURCE: U.S. Bureau of Labor Statistics.

In Illinois, transportation incidents resulted in 61 fatal work injuries and falls, slips, or trips acounted for 27 fatalities. These two major categories accounted for 54 percent of all workplace fatalities in the state. (See table 1.) Over the year, the number of worker deaths from transportation incidents increased from 54, while worker fatalities due to falls, slips, or trips were down from 37.

Contact with objects or equipment was the third-most frequent fatal work event with 23 fatalities, down from 28 in the prior year. Exposure to harmful substances or environments resulted in 22 work-related deaths compared to 14 in 2016.

Nationally, transportation incidents were the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. (See chart 2.) Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by violence and other injuries by persons or animals (16 percent) and contact with objects and equipment (14 percent).

# **Industry**

The private transportation and warehousing industry had the highest number of fatalities in Illinois with 42, up from 35 in the previous year. (See table 2.) Transportation incidents resulted in 23 of the 42 fatalities in the sector.

The private construction industry had 26 workplace fatalities, down from 29 in the previous year. The specialty trade contractors sector accounted for 21 of the 26 workplace fatalities in the construction industry.

# Occupation

The transportation and material moving occupational group had the highest number of workplace fatalities with 59. (See table 3.) Heavy and tractor-trailer truck drivers suffered 34 of the work-related deaths within the transportation and material moving group. The construction and extraction occupational group had the second highest number of workplace fatalities with 25, followed by management occupations with 14. Construction trades workers accounted for 20 of the 25 fatalities among construction and extraction workers. Farmers, ranchers, and other agricultural managers accounted for 10 of the 14 management occupational fatalities.

# **Additional highlights**

- Men accounted for 149 or 91 percent of the work-related fatalities in Illinois, compared to 93 percent nationwide. (See table 4.) Transportation incidents made up 37 percent of the fatalities for men in Illinois.
- White non-Hispanics accounted for 80 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.
- Workers 25-54 years old accounted for 52 percent of the state's work-related fatalities in 2017, compared to 55 percent of on-the-job fatalities nationally.
- Of the 163 fatally-injured workers in Illinois, 124, or 76 percent, worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for both groups of workers was transportation incidents.

## **Technical Note**

**Background of the program.** The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2017 national data, over 23,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

**Federal/State agency coverage.** The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm.

Acknowledgments. BLS thanks the Illinois Department of Public Health for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

<sup>(1)</sup> Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

- (1) Industry data are based on the North American Industry Classification System, 2012.
- (2) Includes fatal injuries at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2012, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.
- (3) Includes fatal injuries to workers employed by governmental organizations regardless of industry.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
