Fatal Work Injuries in South Dakota — 2017

Fatal work injuries totaled 30 in 2017 for South Dakota, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the number of work-related fatalities in South Dakota was little changed from the previous year. Fatal occupational injuries in the state have ranged from a high of 46 in 1999 to a low of 20 in 2013. (See [chart 1](#).)

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries reported in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, South Dakota, 2008–2017

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

In South Dakota, transportation incidents resulted in 17 fatal work injuries and accounted for 57 percent of all workplace fatalities in the state. Falls, slips, or trips accounted for six workplace fatalities. (See [table 1](#).) Over the year, the number of worker deaths from transportation incidents increased from seven, while worker fatalities due to falls, slips, or trips were little changed.

Nationally, transportation incidents were the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. (See [chart 2.](#)) Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by violence and other injuries by persons or animals (16 percent) and contact with objects and equipment (14 percent).

Industry

Three private industries had six fatalities each: agriculture, forestry, fishing and hunting; construction; and transportation and warehousing. Fatalities in the agriculture, forestry, fishing and hunting industry were down from 16 in the previous year and worker deaths in the construction industry fell from 11 in 2016. (See [table 2.](#))

Occupation

The transportation and material moving occupational group had the highest number of workplace fatalities with 10. (See [table 3.](#)) Heavy and tractor-trailer truck drivers suffered five of the work-related deaths within the transportation and material moving group. The construction and extraction occupational group and the management occupational group each had five workplace fatalities. Construction trades workers accounted for 3 of the 5 fatalities among construction and extraction workers. Farmers, ranchers, and other agricultural managers accounted for all five of the fatalities within the management occupational group.

Additional highlights

- Men accounted for 87 percent of the work-related fatalities in South Dakota, compared to the 93-percent national share. (See [table 4.](#)) Transportation incidents made up 54 percent of the fatalities for men in South Dakota.
- White non-Hispanics accounted for 93 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.

- Workers 25-54 years old accounted for 37 percent of the state's work-related fatalities in 2017, compared to 55 percent of on-the-job fatalities nationally.
- Of the 30 fatally-injured workers in South Dakota, 63 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for both groups of workers was transportation incidents.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2017 national data, over 23,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm and www.bls.gov/opub/hom/cfoi/concepts.htm.

Acknowledgments. BLS appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
