## Occupational Employment and Wages in Indianapolis-Carmel-Anderson — May 2020

Workers in the Indianapolis-Carmel-Anderson, IN Metropolitan Statistical Area had an average (mean) hourly wage of \$25.51 in May 2020, about 6 percent below the nationwide average of \$27.07, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Jason Palmer noted that, after testing for statistical significance, wages in the local area were lower than their respective national averages in 15 of the 22 major occupational groups, including management, legal, and computer and mathematical. Two groups had significantly higher wages than their respective national averages.

When compared to the nationwide distribution, Indianapolis area employment was more highly concentrated in 3 of the 22 occupational groups: transportation and material moving; healthcare practitioners and technical; and life, physical, and social science. Eight groups had employment shares significantly below their national representation, including educational instruction and library, healthcare support, and personal care and service. (See [table A.](#))

**Table A. Occupational employment and wages by major occupational group, United States and the Indianapolis metropolitan area, and measures of statistical significance, May 2020**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Indianapolis	United States	Indianapolis	Percent difference <sup>(1)</sup>
Total, all occupations .....	100.0	100.0	\$27.07	\$25.51*	-6
Management .....	5.7	5.8	60.81	52.77*	-13
Business and financial operations .....	6.0	6.0	38.79	34.57*	-11
Computer and mathematical .....	3.3	3.5	46.53	39.67*	-15
Architecture and engineering .....	1.8	1.5*	43.41	38.68*	-11
Life, physical, and social science .....	0.9	1.2*	38.15	37.27	-2
Community and social service .....	1.6	1.5*	25.09	23.02*	-8
Legal .....	0.8	0.7	54.00	46.40*	-14
Educational instruction and library .....	6.1	4.6*	28.75	27.07	-6
Arts, design, entertainment, sports, and media .....	1.3	1.4	30.96	25.97*	-16
Healthcare practitioners and technical .....	6.2	7.2*	41.30	40.66	-2
Healthcare support .....	4.6	3.6*	15.50	15.40	-1
Protective service .....	2.4	2.3*	25.11	21.92*	-13
Food preparation and serving related .....	8.1	8.0	13.30	12.26*	-8
Building and grounds cleaning and maintenance .....	2.9	2.6*	15.75	15.28	-3
Personal care and service .....	1.9	1.5*	15.68	14.54*	-7

Office and administrative support .....	13.3	13.3	20.38	19.94*	-2
Farming, fishing, and forestry .....	0.3	(2)	16.02	18.77*	17
Construction and extraction .....	4.3	4.1	25.93	24.78*	-4

Note: See footnotes at end of table.

**Table A. Occupational employment and wages by major occupational group, United States and the Indianapolis metropolitan area, and measures of statistical significance, May 2020 - Continued**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Indianapolis	United States	Indianapolis	Percent difference <sup>(1)</sup>
Installation, maintenance, and repair .....	3.9	3.9	25.17	23.85*	-5
Production .....	6.1	6.2	20.08	18.68*	-7
Transportation and material moving .....	8.7	12.2*	19.08	18.00*	-6

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Indianapolis-Carmel-Anderson, IN Metropolitan Statistical Area is above the national mean wage, while a negative difference reflects a lower wage.

(2) Indicates a value of less than 0.05 percent.

\* The mean hourly wage or percent share of employment is significantly different from the national average of all areas at the 90-percent confidence level.

One occupational group—transportation and material moving—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Indianapolis had 124,480 jobs in transportation and material moving, accounting for 12.2 percent of local area employment, significantly higher than the 8.7-percent share nationally. The average hourly wage for this occupational group locally was \$18.00, significantly below the national wage of \$19.08.

Some of the larger detailed occupations within the transportation and material moving group included laborers and freight, stock, and material movers, hand (47,280); stockers and order fillers (18,660); and heavy and tractor-trailer truck drivers (17,550). Among the higher-paying jobs in this group were transportation inspectors and crane and tower operators, with mean hourly wages of \$38.66 and \$33.78, respectively. At the lower end of the wage scale were parking attendants (\$10.88) and automotive and watercraft service attendants (\$12.60). (Detailed data for the transportation and material moving occupations are presented in [table 1](#); for a complete listing of detailed occupations available go to [www.bls.gov/oes/current/oes\\_26900.htm](http://www.bls.gov/oes/current/oes_26900.htm).)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Indianapolis area, above-average concentrations of employment were found in some of the occupations within the transportation and material moving group. For instance, laborers and freight, stock, and material movers, hand were employed at 2.3 times the national rate in Indianapolis, and industrial truck and tractor operators, at 1.7 times the U.S. average. Light truck drivers had a location quotient of 1.0 in Indianapolis, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment and Wage Statistics (OEWS) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Indiana Department of Workforce Development.

## **Occupational Employment and Wage Statistics (OEWS) Name Change**

The Occupational Employment Statistics (OES) program has changed its name to Occupational Employment and Wage Statistics (OEWS) to better reflect the range of data available from the program. Data released on or after March 31, 2021, will reflect the new program name. Webpages, publications, and other materials associated with previous data releases will retain the Occupational Employment Statistics name.

## **Coronavirus (COVID-19) Impact on May 2020 Occupational Employment and Wage Statistics**

Due to features of the OEWS methodology, the May 2020 OEWS estimates do not fully reflect the impact of the COVID-19 pandemic. The May 2020 OEWS estimates are based on survey panels collected for May 2020, November 2019, May 2019, November 2018, May 2018, and November 2017. Because 5 of the 6 survey panels used to produce the estimates date from before the COVID-19 pandemic, only the most recent (May 2020) survey panel reflects changes in occupational proportions related to the COVID-19 pandemic.

The May 2020 OEWS employment estimates are benchmarked to the average of May 2020 and November 2019 employment from the Quarterly Census of Employment and Wages (QCEW). Although the May 2020 QCEW data reflect the early employment effects of the COVID-19 pandemic, the November 2019 QCEW employment data precede the pandemic, and therefore do not reflect its impact.

In addition, as a result of the pandemic, response rates for the November 2019 and May 2020 panels were lower in some areas. Lower response rates may negatively affect data availability and data quality. More information is available at [www.bls.gov/covid19/effects-of-covid-19-pandemic-on-occupational-employment-and-wage-statistics.htm](http://www.bls.gov/covid19/effects-of-covid-19-pandemic-on-occupational-employment-and-wage-statistics.htm).

## **Implementing the 2018 Standard Occupational Classification (SOC) System**

With the May 2019 estimates, the OEWS program began implementing the 2018 Standard Occupational Classification (SOC) system. Because the May 2019 and May 2020 estimates are based on a combination of survey data collected using the 2010 SOC and survey data collected using the 2018 SOC, these estimates use a hybrid of the two classification systems that contains some combinations of occupations that are not found in either the 2010 or 2018 SOC. This is the second and final year that the hybrid occupational structure will be used. The May 2021 estimates, to be published in Spring 2022, will be the first OEWS estimates based entirely on survey data collected using the 2018 SOC. For more information on the occupational classification system used in the May 2019 and May 2020 estimates, please see [www.bls.gov/oes/soc\\_2018.htm](http://www.bls.gov/oes/soc_2018.htm) and [www.bls.gov/oes/oes\\_ques.htm#qf10](http://www.bls.gov/oes/oes_ques.htm#qf10).

## **Upcoming Changes to the Occupational Employment and Wage Statistics Methodology**

With the May 2021 estimates, to be released in Spring 2022, the OEWS program plans to begin using a new estimation methodology. The new model-based methodology, called MB3, has advantages over the existing methodology, as described in the Monthly Labor Review article at [www.bls.gov/opub/mlr/2019/article/model-based-estimates-for-the-occupational-employment-statistics-program.htm](http://www.bls.gov/opub/mlr/2019/article/model-based-estimates-for-the-occupational-employment-statistics-program.htm). OEWS estimates for the years 2015-2018 were recalculated using the new estimation methodology and are available as research estimates at [www.bls.gov/oes/oes-mb3-methods.htm](http://www.bls.gov/oes/oes-mb3-methods.htm).

## Technical Note

The Occupational Employment and Wage Statistics (OEWS) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OEWS data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 580 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-digit, most 4-digit, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OEWS data are available at [www.bls.gov/oes/tables.htm](http://www.bls.gov/oes/tables.htm).

The OEWS survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OEWS estimates are constructed from a sample of about 1.1 million establishments. Each year, two semiannual panels of approximately 180,000 to 185,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2020 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2020, November 2019, May 2019, November 2018, May 2018, and November 2017. The unweighted sample employment of 83 million across all six semiannual panels represents approximately 56 percent of total national employment. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 69 percent based on establishments and 66 percent based on weighted sampled employment. The sample in the Indianapolis-Carmel-Anderson, IN Metropolitan Statistical Area included 4,913 establishments with a response rate of 76 percent. For more information about OEWS concepts and methodology, go to [www.bls.gov/oes/current/oes\\_tec.htm](http://www.bls.gov/oes/current/oes_tec.htm).

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

### Metropolitan area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Indianapolis-Carmel-Anderson, IN Metropolitan Statistical Area** includes Boone, Brown, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, Putnam, and Shelby Counties.

### For more information

Answers to frequently asked questions about the OEWS data are available at [www.bls.gov/oes/oes\\_ques.htm](http://www.bls.gov/oes/oes_ques.htm). Detailed information about the OEWS program is available at [www.bls.gov/oes/oes\\_doc.htm](http://www.bls.gov/oes/oes_doc.htm).

Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

**Table 1. Employment and wage data for transportation and material moving occupations, Indianapolis metropolitan area, May 2020**

Occupation <sup>(1)</sup>	Employment		Mean wages	
	Level <sup>(2)</sup>	Location quotient <sup>(3)</sup>	Hourly	Annual <sup>(4)</sup>
Transportation and material moving occupations.....	124,480	1.4	\$18.00	\$37,450
First-line supervisors of transportation and material moving workers, except aircraft cargo handling supervisors .....	5,240	1.5	26.93	56,020
Airline pilots, copilots, and flight engineers .....	(5)	(5)	(6)	106,490
Commercial pilots .....	240	0.9	(6)	71,470
Airfield operations specialists .....	60	0.8	25.89	53,860
Ambulance drivers and attendants, except emergency medical technicians .....	(5)	(5)	16.16	33,600
Driver/sales workers .....	2,900	0.9	16.53	34,380
Heavy and tractor-trailer truck drivers .....	17,550	1.3	23.26	48,390
Light truck drivers .....	6,570	1.0	20.81	43,290
Bus drivers, transit and intercity .....	(5)	(5)	21.32	44,350
Passenger vehicle drivers, except bus drivers, transit and intercity .....	5,010	1.1	15.75	32,760
Motor vehicle operators, all other .....	570	1.5	20.65	42,940
Parking attendants .....	1,120	1.2	10.88	22,630
Automotive and watercraft service attendants .....	800	1.0	12.60	26,200
Transportation inspectors .....	230	1.1	38.66	80,420
Aircraft service attendants and transportation workers, all other.....	260	1.1	16.75	34,850
Conveyor operators and tenders.....	250	1.5	15.09	31,380
Crane and tower operators.....	310	1.0	33.78	70,260
Industrial truck and tractor operators.....	8,170	1.7	18.25	37,960
Cleaners of vehicles and equipment .....	3,130	1.3	12.99	27,010
Laborers and freight, stock, and material movers, hand .....	47,280	2.3	16.03	33,330
Machine feeders and offbearers.....	1,080	2.3	(5)	(5)

Stockers and order fillers.....	18,660	1.2	14.67	30,510
Refuse and recyclable material collectors.....	200	0.2	18.02	37,470

Footnotes:

(1) For a complete listing of all detailed occupations in the Indianapolis-Carmel-Anderson, IN Metropolitan Statistical Area, see [www.bls.gov/oes/current/oes\\_26900.htm](http://www.bls.gov/oes/current/oes_26900.htm)

(2) Estimates for detailed occupations may not sum to the totals due to rounding, and because the totals may include occupations that are not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(5) Estimate not released.

(6) Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries depending on how they are typically paid.
