Business Employment Dynamics in Colorado – Second Quarter 2014

From March 2014 to June 2014, gross job gains in private sector establishments in Colorado totaled 147,457, while gross job losses numbered 122,734, the U.S. Bureau of Labor Statistics reported today. Gross job gains exceeded gross job losses by 24,723. Regional Commissioner Stanley W. Suchman noted that gross jobs gains exceeded gross job losses by 17,768 during the previous quarter.

Chart 1. Private sector gross job gains and losses of employment in Colorado, June 2009–June 2014 by quarter, seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

Note: Shaded area represents National Bureau of Economic Research (NBER) defined recession period.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. Business Employment Dynamics (BED) statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross job gains and the number of gross job losses is the net change in employment. (See the [Technical Note](#) for more information.)

Gross job gains in Colorado have trended upward since bottoming out at 110,520 in March 2009. Additionally, Colorado's gross job gains have been above 130,000 in each of the last nine quarters. Gross job losses increased by 5,650 in the three months ended in June 2014, after declining in each of the two previous quarters. (See [chart 1](#).)

Chart 2. Private sector gross job gains and losses as a percent of employment, United States and Colorado, June 2009–June 2014, seasonally adjusted

Gross job gains represented 7.3 percent of private sector employment in Colorado in the quarter ended June 2014, while nationally gross job gains accounted for 6.5 percent of private employment. (See [chart 2](#).) The rates of both gross job gains and gross job losses in Colorado have been above the U.S. rate since data were first published in 1992.

During the second quarter 2014, gross job gains exceeded gross job losses in 10 of the 11 industry sectors in Colorado. For example, within leisure and hospitality, gross job gains exceeded gross job losses by 3,842. While 30,825 jobs in the industry were created by opening and expanding establishments, 26,983 jobs were lost in closing and contracting establishments in the three months ended in June 2014. In professional and business services, 29,096 jobs were created in opening and expanding establishments and 25,536 jobs were lost in closing and contracting establishments. (See [table 1](#).)

In contrast, gross job losses exceeded gross job gains in the information sector during the second quarter of 2014. The 2,793 jobs lost in contracting and closing establishments offset the 2,557 jobs created in expanding and opening establishments, resulting in a net loss of 236 jobs.

For More Information

BED data for the states have been included in [table 2](#) of this release. For more information on the Business Employment Dynamics data, visit the BED web site at www.bls.gov/bdm/.

The Business Employment Dynamics for Third Quarter 2014 are scheduled to be released on Wednesday, April 29, 2015 at 10:00 a.m. (EDT).

Technical Note

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW), or the ES-202 program. The BED data are compiled from existing quarterly QCEW records. The QCEW reports are sent by the State Employment Security Agencies (SESAs) to BLS and form the basis of the Bureau's QCEW program and establishment universe

sampling frame. These reports are also used to produce the QCEW data on total employment and wages. Other important Bureau uses of the QCEW reports are in the Current Employment Statistics (CES) program. The CES program produces monthly estimates of employment, net changes, and earnings by detailed industry.

In the BED program, the QCEW records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. BED statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross jobs gained and the number of gross jobs lost is the net change in employment.

Gross job gains and gross job losses are expressed as rates by dividing their levels by the average of employment in the current and previous quarters. The rates are calculated for the components of gross job gains and gross job losses and then summed to form their respective totals. These rates can be added and subtracted just as their levels can. For instance, the difference between the gross job gains rate and the gross job losses rate is the net growth rate.

The formal definitions of employment changes are as follows:

Openings. These are either establishments with positive third month employment for the first time in the current quarter, with no links to the prior quarter, or with positive third month employment in the current quarter following zero employment in the previous quarter.

Expansions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net increase in employment over this period.

Closings. These are either establishments with positive third month employment in the previous quarter, with no employment or zero employment reported in the current quarter.

Contractions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net decrease in employment over this period.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
