## Consumer Price Index, Midwest Region – September 2015

**Prices in the Midwest down 0.3 percent in September and 0.8 percent lower over the year**

The Consumer Price Index for All Urban Consumers (CPI-U) in the Midwest declined 0.3 percent in September after registering no change in each of the previous two months, the U.S. Bureau of Labor Statistics reported today. The monthly decrease was largely attributable to a 10.7-percent drop in motor fuel prices. Overall, energy costs were 6.6 percent lower over the month. Food prices rose 0.4 percent and the index for all items less food and energy was up 0.3 percent. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

The CPI-U for the Midwest decreased 0.8 percent from September 2014 to September 2015, the ninth consecutive month of over-the-year decline. (See [chart 1](#) and [table A](#).) Food prices increased 1.4 percent and the energy index, which includes motor fuel and household fuels, fell 19.2 percent. Excluding food and energy, the CPI-U rose 1.3 percent over the year. (See [table 1](#).)

**Chart 1. Over-the-year percent change in CPI-U, Midwest region, September 2012–September 2015**

Source: U.S. Bureau of Labor Statistics.

### Food

Food prices in the Midwest increased 0.4 percent in September. The index for food at home rose 0.5 percent and costs for food away from home were 0.4 percent higher.

From September 2014 to September 2015, the index for food advanced 1.4 percent led by a 3.0-percent rise in costs for food away from home. Prices for food at home also contributed to the increase with a gain of 0.4 percent.

## Energy

The energy index registered its third consecutive monthly decline, falling 6.6 percent in September, and had the greatest downward impact on the all items index. The decrease in energy costs was largely attributable to a 10.7-percent drop in motor fuel prices, the largest one-month decline since January 2015. Lower costs for electricity (-2.8 percent) and utility (piped) gas service (-1.8 percent) also contributed to the monthly decline.

Energy prices fell 19.2 percent from September 2014 to September 2015, led by a drop of 29.8 percent in motor fuel prices. The index for motor fuel has registered consecutive over-the-year declines since August 2014. Costs for utility (piped) gas service were 18.1 percent lower over the year, while electricity prices were little changed (0.1 percent).

## All items less food and energy

The index for all items less food and energy for the Midwest rose 0.3 percent in September. Expenditure categories registering higher prices over the month included apparel (3.8 percent), shelter (0.3 percent), and education and communication (0.5 percent). In contrast, used cars and trucks (-1.6 percent) was among the expenditure categories posting lower prices over the month.

The index for all items less food and energy was up 1.3 percent from September 2014 to September 2015. Higher costs for shelter (2.3 percent) and medical care services (2.2 percent) led the advance.

The Midwest Consumer Price Index for All Urban Consumers (CPI-U) stood at 225.184 in September 2015. A typical market basket of goods and services that cost \$100.00 in the 1982-84 base period cost \$225.18 in September 2015. Because regional CPI data are not adjusted for seasonal price variation, consumers and businesses should be cautious in drawing conclusions about long-term retail price trends from short-term changes in the regional indexes.

## CPI-W

In September, the Midwest Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was 220.121, down 0.5 percent over the month. The CPI-W decreased 1.3 percent over the year.

**Table A. Midwest region CPI-U 1-month and 12-month percent changes, all items index, not seasonally adjusted**

**The October 2015 Consumer Price Index for the Midwest region is scheduled to be released on Tuesday, November 17, 2015.**

### **Technical Note**

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at [www.bls.gov/cpi](http://www.bls.gov/cpi) and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at [www.bls.gov/opub/hom/homch17\\_a.htm](http://www.bls.gov/opub/hom/homch17_a.htm).

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between areas; they only measure the average change in prices for each area since the base period.**

The Midwest region is comprised of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339

**Footnotes**

(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

(2) Index is on a December 1982=100 base.

(3) Indexes on a December 1997=100 base.

(4) Special index based on a substantially smaller sample.

(5) Indexes on a December 1993=100 base.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.

Energy .....	214.066	211.181	196.639	-20.0	-8.1	-6.9
All items less energy .....	223.774	224.189	224.780	1.2	0.4	0.3
All items less food and energy .....	220.754	221.087	221.573	1.2	0.4	0.2
Commodities less food and energy commodities .....	149.253	149.490	150.033	-0.7	0.5	0.4
Energy commodities .....	245.462	239.832	214.743	-29.8	-12.5	-10.5
Services less energy services .....	275.282	275.688	276.129	2.0	0.3	0.2

**Footnotes**

(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

(2) Index is on a December 1984=100 base.

(3) Indexes on a December 1997=100 base.

(4) Special index based on a substantially smaller sample.

(5) Indexes on a December 1993=100 base.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.
