Business Employment Dynamics in Kansas – Fourth Quarter 2016

From September 2016 to December 2016, gross job gains in private sector establishments in Kansas totaled 66,916, while gross job losses numbered 64,620, the U.S. Bureau of Labor Statistics reported today. Gross job gains exceeded gross job losses by 2,296. Assistant Commissioner for Regional Operations Stanley W. Suchman noted that gross jobs gains exceeded gross job losses by 6,842 during the previous quarter.

Chart 1. Private sector gross job gains and losses in Kansas, December 2011–December 2016, seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. Business Employment Dynamics (BED) statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross job gains and the number of gross job losses is the net change in employment. (See the [Technical Note](#) for more information.)

The number of gross job gains in Kansas fell from 70,015 in September 2016 to 66,916 in December 2016, a decline of 3,099. Conversely, gross job losses increased by 1,447 in the three months ended in December 2015. (See [chart 1.](#)) With one exception, gross job losses have been below 70,000 since September 2009.

Chart 2. Private sector gross job gains and losses as a percent of employment, United States and Kansas, December 2011–December 2016, seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

Gross job gains represented 5.9 percent of private sector employment in Kansas in the quarter ended December 2016, while nationally gross job gains accounted for 6.2 percent of private sector employment. (See [chart 2.](#))

Generally, the rate of gross job gains in Kansas has been below the U.S. rate since March 2009. Kansas's rate of gross job losses as a percent of private sector employment was 5.7 percent in the fourth quarter of 2016, similar to the national rate of 5.8 percent. From June 2008 to March 2015, the state's rate of gross job losses was equal to or below the U.S. rate in each quarter. In three of the seven quarters since March 2015, Kansas's rate of gross job losses has exceeded the national rate.

During the fourth quarter of 2016, gross job gains exceeded gross job losses in 6 of the 10 published industry sectors in Kansas. For example, within transportation and warehousing, gross job gains exceeded gross job losses by 2,549. While 4,584 jobs in the industry were created by opening and expanding establishments, 2,035 jobs were lost in closing and contracting establishments in the three months ended in December 2016.

Professional and business services was among four industries in Kansas with gross job losses that exceeded gross job gains during the fourth quarter of 2016. In professional and business services, the 13,513 jobs lost in closing and contracting establishments offset the 12,514 jobs created in opening and expanding establishments, resulting in a net loss of 999 jobs. (See [table 1.](#))

For More Information

BED data for the states have been included in [table 2](#) of this release. For more information on the Business Employment Dynamics data, visit the BED website at www.bls.gov/bdm/.

The Business Employment Dynamics for First Quarter 2017 are scheduled to be released on Wednesday, November 8, 2017 at 10:00 a.m. (EST).

Technical Note

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW), or the ES-202 program. The BED data are compiled from existing quarterly QCEW records. The QCEW reports are sent by the State Employment Security Agencies (SESAs) to BLS and form the basis of the Bureau's QCEW program and establishment universe sampling frame. These reports are also used to produce the QCEW data on total employment and wages. Other important Bureau uses of the QCEW reports are in the Current Employment Statistics (CES) program. The CES program produces monthly estimates of employment, net changes, and earnings by detailed industry.

In the BED program, the QCEW records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. BED statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross jobs gained and the number of gross jobs lost is the net change in employment.

Gross job gains and gross job losses are expressed as rates by dividing their levels by the average of employment in the current and previous quarters. The rates are calculated for the components of gross job gains and gross job losses and then summed to form their respective totals. These rates can be added and subtracted just as their levels can. For instance, the difference between the gross job gains rate and the gross job losses rate is the net growth rate.

The formal definitions of employment changes are as follows:

Openings. These are either establishments with positive third month employment for the first time in the current quarter, with no links to the prior quarter, or with positive third month employment in the current quarter following zero employment in the previous quarter.

Expansions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net increase in employment over this period.

Closings. These are either establishments with positive third month employment in the previous quarter, with no employment or zero employment reported in the current quarter.

Contractions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net decrease in employment over this period.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
