Consumer Price Index, Midwest Region – July 2017 Prices in the Midwest unchanged in July and 1.3 percent higher over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Midwest was unchanged for the third month in a row in July, the U.S. Bureau of Labor Statistics reported today. Higher costs for recreation and medical care had the largest upward impact on the index, while lower prices for lodging away from home, airline fares, and household furnishings and operations had the largest offsetting downward movements. The all items less food and energy index was essentially unchanged (+0.1 percent) in July, energy costs were down 0.5 percent and food prices were unchanged. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

The CPI-U for the Midwest rose 1.3 percent from July 2016 to July 2017. (See chart 1 and table A.) The energy index, which includes motor fuel and household fuels, rose 3.5 percent and food prices increased 0.4 percent. Excluding food and energy, the CPI-U advanced 1.3 percent over the year. (See table 1.)

Chart 1. Over-the-year percent change in CPI-U, Midwest region, July 2014-July 2017

Food

Food prices in the Midwest were unchanged from June to July. Costs for food away from home edged up 0.1 percent while prices for food at home recorded no change.

From July 2016 to July 2017, the index for food was 0.4 percent higher and attributable to an increase of 0.9 percent in costs for food away from home. Prices for food at home were little changed (+0.1 percent).

Energy

The energy index declined 0.5 percent in July following an increase of 2.2 percent in June. Lower prices for both gasoline (-1.0 percent) and utility (piped) gas service (-0.6 percent) were responsible for the decline in the energy component. A 0.2 percent increase in electricity costs in July moderated the overall decline.

Energy costs were 3.5 percent higher from July 2016 to July 2017 due to increases among all three major subcategories: utility (piped) gas service (7.6 percent), electricity (2.9 percent), and gasoline (2.4 percent).

All items less food and energy

The index for all items less food and energy for the Midwest was little changed, +0.1 percent, in July after registering little movement in June, -0.1 percent. Increases in the indexes for recreation (1.4 percent) and medical care (0.9 percent) had the largest upward impact on the index. Costs for lodging away from home, airline fares, and household furnishings and operations were down in July.

The index for all items less food and energy was up 1.3 percent from July 2016 to July 2017. Higher costs for shelter (2.5 percent), medical care (2.5 percent), and recreation (2.9 percent) led the increase. Annual declines in the indexes for education and communication (-2.8 percent) and new and used motor vehicles (-2.2 percent) only partially offset these advances.

The Midwest Consumer Price Index for All Urban Consumers (CPI-U) stood at 229.820 in July 2017. A typical market basket of goods and services that cost \$100.00 in the 1982-84 base period cost \$229.82 in July 2017.

CPI-W

In July, the Midwest Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was 223.626, unchanged over the month. The CPI-W increased 1.2 percent over the year.

Table A. Midwest region CPI-U 1-month and 12-month percent changes, all items index, not seasonally adjusted

| Month | 2013 | | 2014 | | 2015 | | 2016 | | 2017 | |

The August 2017 Consumer Price Index for the Midwest region is scheduled to be released on Thursday, September 14, 2017.

Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/homch17_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between areas; they only measure the average change in prices for each area since the base period.**

The Midwest region is comprised of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.

⁽²⁾ Index is on a December 1982=100 base.

⁽³⁾ Indexes on a December 1997=100 base.

⁽⁴⁾ Special index based on a substantially smaller sample.

⁽⁵⁾ Indexes on a December 1993=100 base.

| All items less food and energy | 226.924 | 226.630 | 226.739 | 1.1 | -0.1 | 0.0 | |
| Commodities less food and energy commodities | 147.789 | 146.709 | 146.638 | -0.7 | -0.8 | 0.0 | |
| Energy commodities | 209.868 | 206.141 | 204.091 | 2.5 | -2.8 | -1.0 | |
| Services less energy services | 287.247 | 287.540 | 287.786 | 1.7 | 0.2 | 0.1 | |

Footnotes(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.

⁽²⁾ Index is on a December 1984=100 base.

⁽³⁾ Indexes on a December 1997=100 base.

⁽⁴⁾ Special index based on a substantially smaller sample.

⁽⁵⁾ Indexes on a December 1993=100 base.
