

NEWS RELEASE

For Release: Thursday, March 13, 2014

14-416-NEW

NEW YORK–NEW JERSEY INFORMATION OFFICE: New York City, N.Y.

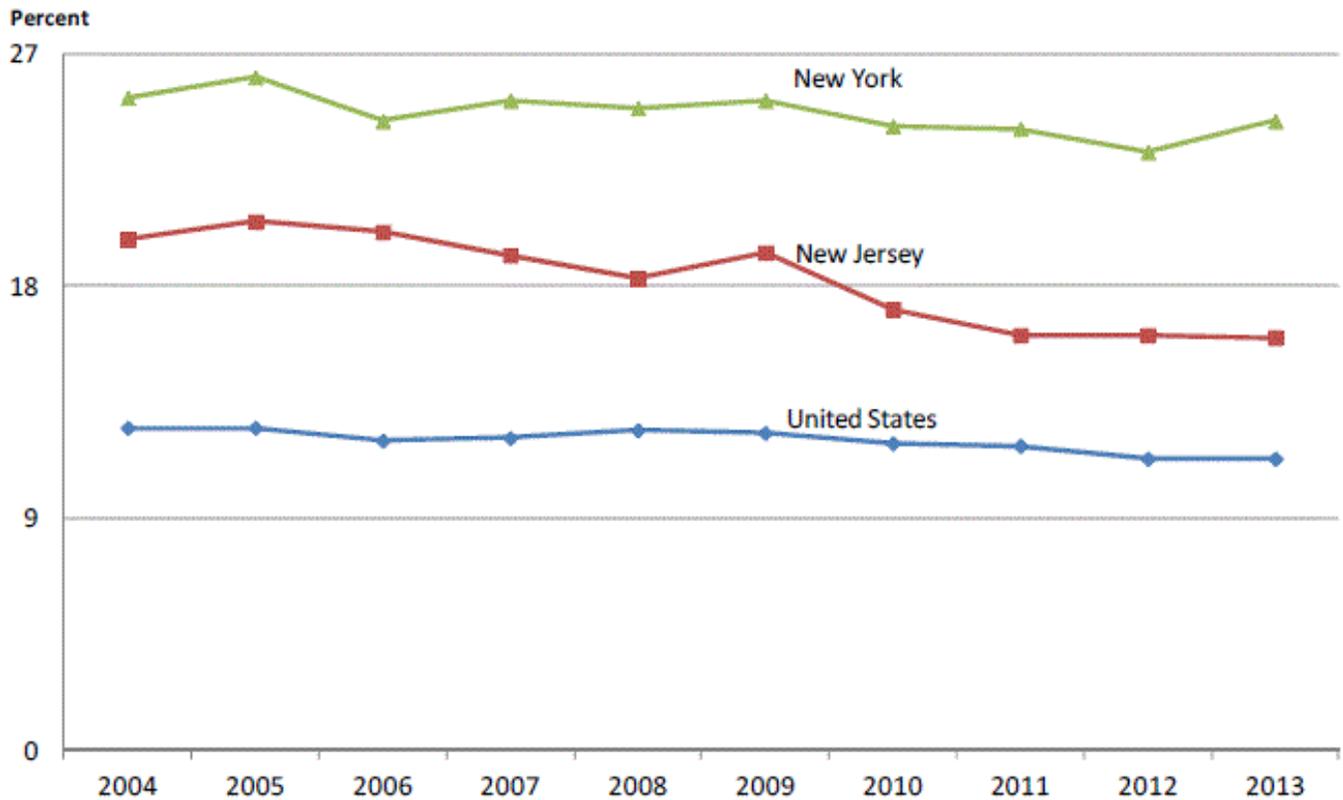

Technical information: (646) 264-3600 • BLSinfoNY@bls.gov • www.bls.gov/regions/new-york-new-jersey/

Media contact: (646) 264-3620

Union Membership in New York and New Jersey, 2013

In 2013, union members accounted for 24.4 percent of wage and salary workers in New York and 16.0 percent in New Jersey, compared with 23.2 percent and 16.1 percent, respectively, in 2012, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that in New York, the union membership rate in 2013 rose to the highest level recorded since 2009. In contrast, the union membership rate in New Jersey was the lowest recorded since 1989, when the state series began. Both states, however, had union membership rates well above that for the nation in 2013, as union members accounted for 11.3 percent of employed wage and salary workers in the United States. New York's union membership rate was the highest in the nation in 2013.. (See [chart 1](#) and [table A](#).)

Chart 1. Members of unions as a percent of employed, New York, New Jersey, and the United States, 2004-2013

Source: U.S. Bureau of Labor Statistics.

New York had 1,986,000 union members in 2013 and New Jersey, 611,000. In addition to these members, another 118,000 wage and salary workers in New York and 21,000 in New Jersey were represented by a union on their main job or were covered by an employee association or contract while not union members themselves. (See table A.) Nationwide, 14.5 million wage and salary workers were union members in 2013 and 1.5 million wage and salary workers were not affiliated with a union but had jobs covered by a union contract.

Table A. Union affiliation of employed wage and salary workers in New York and New Jersey, annual averages, 2004-2013 (numbers in thousands)

Year	Total employed	Members of unions ⁽¹⁾		Represented by unions ⁽²⁾

⁽¹⁾ Data refer to members of a labor union or an employee association similar to a union.

⁽²⁾ Data refer to both union members and workers who report no union affiliation but whose jobs are covered by a union or employee association contract.

Note: Data refer to the sole or principal job of full- and part-time wage and salary workers. All self-employed workers are excluded, both those with incorporated businesses as well as those with unincorporated businesses. Updated population controls are introduced annually with the release of January data.

In 2013, 20 states had union membership rates above the U.S. average, of which 9 had rates above 15 percent. (See [table 1](#).) Of the nine states with the highest rates, three were located in the Northeast, two were located in the Midwest, and the remaining four were in the West. (See [chart 2](#).) New York had the highest rate at 24.4 percent, followed by Alaska (23.1 percent) and Hawaii (22.1 percent). In fact, New York has had the highest union membership rate in the nation for 17 of the past 19 years.

Thirty states and the District of Columbia had union membership rates below the national average of 11.3 percent in 2013. Nine of these states had union membership rates below 5.0 percent with North Carolina having the lowest, 3.0 percent. The next lowest rates were recorded in Arkansas (3.5 percent), Mississippi and South Carolina (3.7 percent each), and Utah (3.9 percent).

Over half of the 14.5 million union members in the U.S. lived in just seven states (California, 2.4 million; New York, 2.0 million; Illinois, 0.9 million; Pennsylvania, 0.7 million; and Michigan, New Jersey, and Ohio, 0.6 million each), though these states accounted for only about one-third of wage and salary employment nationally.

State union membership levels depend on both the union membership rate and the employment level. For example, despite having 2.7 million fewer wage and salary employees statewide, New York had about four times as many union members as Texas. Similarly, New Jersey, with about 144,000 fewer wage and salary employees, had almost three times as many union members as Georgia.

Technical Note

The estimates in this release are obtained from the Current Population Survey (CPS), which provides the basic information on the labor force, employment, and unemployment. The survey is conducted monthly for the Bureau of Labor Statistics by the U.S. Census Bureau from a scientifically selected national sample of about 60,000 households. The union membership and earnings data are tabulated from one-

quarter of the CPS monthly sample and are limited to wage and salary workers. All self-employed workers are excluded.

Union membership data, particularly for levels, are not strictly comparable with data for earlier years because of the introduction of updated population controls used in the CPS. These updated controls have little or no effect on unemployment rates and other ratios, such as union membership rates. For technical documentation and related information, including reliability of the CPS estimates, see www.bls.gov/cps/documentation.htm.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200, Federal Relay Service: 1-800-877-8339.

The principal definitions used in this release are described briefly below.

Union members. Members of a labor union or an employee association similar to a union.

Represented by unions. Union members, as well as workers who have no union affiliation but whose jobs are covered by a union or an employee association contract.

Wage and salary workers. Workers who receive wages, salaries, commissions, tips, payment in kind, or piece rates. The group includes employees in both the private and public sectors, but, for the purposes of the union membership and earnings series, excludes all self-employed persons, regardless of whether or not their businesses are incorporated.
