## Average Energy Prices, New York-Northern New Jersey-Long Island – November 2015

Gasoline prices averaged \$2.246 per gallon in the New York-Northern New Jersey-Long Island area in November 2015, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that gasoline prices were down \$0.785 compared to last November when area households paid \$3.031 per gallon. Electricity prices averaged 18.6 cents per kilowatt hour (kWh), down from the 19.8 cents per kWh paid in November 2014. The average price of utility (piped) gas, at \$0.934 per therm, was unchanged from last year. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

At \$2.246 a gallon, the price of gasoline in the New York area nearly matched the \$2.249 national average in November 2015. A year earlier, consumers in the New York area paid \$3.031, close to the national average of \$2.945. For the past five years, the local price of a gallon of gasoline has been within 11 percent of the national average in the month of November. (See [chart 1](#).)

The average price paid by New York area consumers for utility (piped) gas, commonly referred to as natural gas, was 93.4 cents per therm, close to the national average in November 2015 (90.3 cents per therm). A year earlier, area consumers paid 10 percent less than the national average for a therm of natural gas, but from 2011 to 2013, the per-therm cost for natural gas in November exceeded the national average by at least 8 percent and as much as 22 percent. (See [chart 3.](#))

**The Consumer Price Index for December 2015 is scheduled to be released on Wednesday, January 20, 2016 at 8:30 a.m. (ET).**

### **Technical Note**

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, the 3 population size classes, 10 region/size-class cross-classifications, and the 14 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm, are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
